Political Economy Of Manufacturing Protection:

The Political Economy of Manufacturing Protection Christopher Findlay, Ross Garnaut, 2017-10-10 Protection is a persistent feature of economic policy in developed and developing countries alike. However, it is now widely accepted that high protection holds back economic growth. Why is protection so pervasive when it is widely recognised to be against the national interest of the countries which impose it? This contradiction is the focus of this important volume, first published in 1986. Economists from the Philippines, Thailand, Malaysia, Singapore and Australia have written about their countries and draw conclusions on the causes of protection from statistical analysis and from interindustry structure.

The Political Economy of Manufacturing Protection in Indonesia 1975-1995 Muhammad Chatib Basri, 2001

The Political Economy of Policy Reform John Williamson, 1994. Policymakers around the world have increasingly agreed that macroeconomic discipline, microeconomic liberalization and outward orientation are prerequisites for economic success. But what are the political conditions that make economic transformation possible? At a conference held at the Institute for International Economics, leaders of economic reform recounted their efforts to bring about change and discussed the impact of the political climate on the success of their efforts. In this book, these leaders explore the political conditions conducive to the success of policy reforms. Did economic crisis strengthen the hands of the reformers? Was the rapidity with which reforms were instituted crucial? Did the reformers have a honeymoon period in which to transform the economy? The authors answer these and other questions as well as providing first-hand accounts of the politically charged atmosphere surrounding reform efforts in their countries.

[The Political Economy of Global Manufacturing, Business and Finance](#) Michael Tribe, George Kararach, 2023-04-21. This book is written as a tribute to Frederick Nixon's extensive work on industrial development in the Global South while seeking to actively engage with the latest arguments concerning development economics together with changes in manufacturing and industrial policy that continue to shape the role of the Global South in the international economy, the impact of the increased concentration of global multinational corporations in that space along with the rise of new financing tools and debt traps. The chapters pay homage to Fred's broad view of the international development process and reflect his breadth of perception both theoretically and geographically. The book targets both the scholarly and policymaking audience.

Pakistan - The Political Economy of Growth, Stagnation and the State, 1951-2009 Matthew McCartney, 2011-06-07. This book provides a comprehensive reassessment of the development of the economy of Pakistan since independence to the present. It employs a rigorous statistical methodology which has applicability to other developing economies to define and measure episodes of growth and stagnation and to examine how the state has contributed to each. Contesting the orthodox view that liberalisation has been an important driver of growth in Pakistan, the book places the state at the centre of economic development rather than the market. It examines the state in relation to its economic roles in mobilising resources and promoting a productive allocation of those resources and its political roles in

managing the conflict inherent in economic development The big conclusions for economic growth in Pakistan are that liberalisation the market and the external world economy in fact have less influence than that of the state and conflict Overall the book offers analyses of the different successive approaches to promoting economic growth and development in Pakistan relates these to medium term economic outcomes periods of growth and stagnation and thereby explains how the mechanisms by which the state can better promote growth and development

Indonesia's Industrial Transformation Hal Hill, 1997 Indonesia the world's fourth most populous nation has experienced a remarkable economic transformation over the past 30 years In the mid 1960s it was one of the poorest countries in the developing world but by the 1990s it had joined the group of Asian tiger economies This set of essays examines the record of industrialization which has been central to Indonesia's rapid development Successive sections provide an overview of the industrialization process case studies of selected industries the contribution of foreign investment and technological development the role of small medium industry and a range of industrial policy issues Drawing on the country's much improved statistical base this empirically oriented volume highlights both the achievements of the New Order regime and the many challenges which lie ahead

The Political Economy of U.S. Tariffs Réal P. Lavergne, 2014-05-12 The Political Economy of U S Tariffs An Empirical Analysis provides information pertinent to the political economy of trade barriers This book discusses the cross sectional regression analysis across industries to understand why some industries have been more privileged than others Organized into seven chapters this book begins with an overview of the structure of protection and identifies the primary actors or principles that condition the formation of trade policy more generally This text then evaluates the institutional and theoretical reasons why political leverage should not be expected to play a significant role in explaining tariffs Other chapters consider the notion that the structure of protection at any point in time represents some sort of equilibrium This book discusses as well the distinction between nominal and effective tariffs The final chapter deals with individual regressors and groups of regressors This book is a valuable resource for economists and specialists in quantitative analysis

Pacific Basin Developing Countries Marcus Noland, 1990 Discusses eight economies located in the Pacific Basin Hong Kong Singapore Taiwan Korea Malaysia Thailand the Philippines and Indonesia

The Political Economy of Trade Reform in Emerging Markets Peter Draper, Phil Alves, Razeen Sally, 2009-01-01 few if any other recent volumes offer a historical perspective on evolving trade policy in several countries this well written well edited volume is suitable for graduate and research libraries M Larudee Choice This book is a refreshing reminder of the benefits of unilateral trade liberalisation in countries whose leaders dare An important story told with clarity and authority Ross Garnaut The Australian National University Australia That trade liberalization is good for emerging market economies and not just for the rich ones is now widely accepted by both economists and policy makers But the question remains how can these reforms be implemented in practice The answer to that important question lies in understanding the political economy of each reforming country This book makes a splendid

contribution to our understanding of this issue by examining the experience of several countries. It is therefore an important book to be read by not just students and researchers but also policy makers worldwide. Jagdish Bhagwati, Columbia University, US. This timely book brings fresh analysis to the important issue of trade policy reform in emerging markets. The subject matter and its significance are comprehensively introduced with a review of developing country liberalization since the 1980s, providing an analytical framework for the seven country case studies that follow. The case studies: Australia, Brazil, Chile, India, Malaysia, New Zealand, and South Africa, cover a wide variety of political, historical, and economic issues, but all make clear the important role that crisis or the threat of it plays in meaningful trade policy reform. This is of particular relevance in the current global financial crisis. These studies, together with the conclusions which are drawn from them, show how important the trade liberalization agenda remains in the 21st century. Written by a combination of both experts and practitioners, this highly topical book will make productive reading for policy makers concerned with trade policy in developed and developing countries, as well as scholars working in trade policy. Postgraduate students studying international business, international relations, economics, politics, and international law should not be without this book. *Indonesia Rising*, Anthony Reid, 2012.

There are reasons for thinking that this is at last Indonesia's moment on the world stage. Having successfully negotiated its difficult transition to democracy after 1998, Indonesia has held three popular elections with a low level of violence by the standards of southern Asia. Recently its economic growth rate has been high, above 6 per cent a year, and rising, where China's has been dropping and the developed world has been in crisis. Indonesia's admission in 2009 to the G20 club of the world's most influential states seemed to confirm a status implied by its size as the world's fourth largest country by population and the largest with a Muslim majority. Some international pundits have been declaring that Indonesia is the new star to watch and that its long-awaited moment in the sun may at last have arrived.
