Political Landscape The Art History Of Nature:

Political Landscape Martin Warnke, 2013-06-01 We all know what the political landscape is and politicians and journalists never tire of referring to it But in this ingenious and original book Martin Warnke takes that well worn metaphor literally and uses it to reveal just how politicized the real landscape of continental Europe has been for centuries The author finds his evidence of humanity's intervention in nature in the form of monuments and milestones gardens roads and border crossings in landscape paintings and maps even in fact in the anthropomorphic interpretations once given to formations of hills and rocks The Political Landscape is underpinned with a fascinating array of examples and illustrations many of which will be new even to experts in the art of landscape and related disciplines **"Landscape Imagery, Politics, and Identity in a Divided Germany, 1968-1989"** Catherine Wilkins, 2017-07-05 Landscape Imagery Politics and Identity in a Divided Germany 1968-1989 explores the communicative relationship between German landscape painting and the viewing public that developed in the wake of the student revolutions of the late 1960s The book demonstrates that contrary to some historical thinking more similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study's analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are relevant for political and cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories Landscapes of Memory and Experience Jan Birksted, 2012-12-06 It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art history and visual studies because of a lack of engagement with the theories methods and concepts of these disciplines This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances since landscape studies would challenge the underlying assumptions of traditional phenomenological theory Thus the history and theory of twentieth century landscape might not only once again share concepts and methods with contemporary art and design history but might in turn influence them A complementary sequel to Relating Architecture to Landscape this volume of essays explores further areas of interest and

discussion in the landscape architecture debate and offers contributions from a team of well known researchers teachers and writers The choice of topics is wide ranging and features case studies of modern and contemporary schemes from the USA Far East and Australasia Eyewitnessing Peter Burke,2006-01-27 Eyewitnessing evaluates the place of images among other kinds of historical evidence **Landscape into Eco Art** Mark Cheetham,2018-02-14 Dedicated to an articulation of the earth from broadly ecological perspectives eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues In Landscape into Eco Art Mark Cheetham systematically examines connections and divergences between contemporary eco art land art of the 1960s and 1970s and the historical genre of landscape painting Through eight thematic case studies that illuminate what eco art means in practice reception and history Cheetham places the form in a longer and broader art historical context He considers a wide range of media from painting sculpture and photography to artists films video sound work animation and installation and analyzes the work of internationally prominent artists such as Olafur Eliasson Nancy Holt Mark Dion and Robert Smithson In doing so Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today s debates on climate science government policy and our collective and individual responsibility to the planet An ambitious intervention into eco criticism and the environmental humanities this volume provides original ways to understand the issues and practices of eco art in the Anthropocene Art historians humanities scholars and lay readers interested in contemporary art and the environment will find Cheetham s work valuable and invigorating Netherlandish and Italian Female Portraiture in the Fifteenth Century Elisabetta Toreno,2025-10-01 This book investigates the aesthetic and conceptual characteristics of fifteenth century female portraiture on panel Portraits of women increased substantially during this century They formed part of a material and a visual culture borne out of the rapid rise of an oligarchy from entrepreneurial activities that was especially advanced in the urbanised territories of Italy and Flanders For this reason the portraits in this book are by Netherlandish and Italian painters They are simultaneously illustrative of the emancipation of the genre from its medieval idiom and of the responses to the matrix of patriarchy under which society was organised Patriarchy is an androcentric structure that places women in a paradoxical situation of legal and social disenfranchisement on the account of purported psychophysical inadequacy whilst making them the catalysts through arranged marriages for the success of the spheres of power which are controlled by men Thus these portraits are also a window into women s lives in this structure This book is the first systematic study of their sign system and of the feminine experience of seeing and being seen at the intersection of disciplines that include art history anthropology legal history philosophy The surprising results suggest new interpretations of form and function in female portraiture women s active role in the imaging process and the early instances of a pro women ideology **Natural Beauty** Ronald Moore,2007-08-28 Natural Beauty was selected for the Choice Outstanding Academic Title list for 2008 Natural Beauty presents a bold new philosophical account of the principles

involved in making aesthetic judgments about natural objects. It surveys historical and modern accounts of natural beauty and weaves elements derived from those accounts into a syncretic theory that centers on key features of aesthetic experience specifically features that sustain and reward attention. In this way Moore's theory sets itself apart from both the purely cognitive and the purely emotive approaches that have dominated natural aesthetics until now. *Natural Beauty* shows why aesthetic appreciation of works of art and aesthetic appreciation of nature can be mutually reinforcing that is how they are cooperative rather than rival enterprises. Moore also makes a compelling case for how and why the experience of natural beauty can contribute to the larger project of living a good life.

Washed with Sun Jeremy A. Foster, 2008 Looking mainly at the years following the British victory in the second Boer War from 1902 to 1930 Foster examines the influence of painting writing architecture and photography on the construction of a shared romanticized landscape subjectivity that was perceived as inseparable from being South African and thus helped forge the imagined community of white South Africa.

Water and Human Societies David A. Pietz, Dorothy Zeisler-Vralsted, 2021-08-18 This book explores the historical relationships between human communities and water. Bringing together for the first time key texts from across the literature it discusses how the past has shaped our contemporary challenges with equitable access to clean and ample water supplies. The book is organized into chapters that explore thematic issues in water history including Water and Civilizations Water and Health Water and Equity and Water and Sustainability. Each chapter is introduced by a critical overview of the theme followed by four primary and secondary readings that discuss critical nodes in the historical and contemporary development of each chapter theme. Further readings at the end of each chapter invite the reader to further explore the dynamics of each theme. The foundational premise of the book is that in order to comprehend the complexity of global water challenges we need to understand the history of cultural forces that have shaped our water practices. These historical patterns shape the range of choices available to us as we formulate responses to water challenges. The book will be a valuable resource to all students interested in understanding the challenges of water use today.

Allan Kaprow, Robert Smithson, and the Limits to Art Philip Ursprung, Fiona Elliott, 2013-05-10 This innovative study of two of the most important artists of the twentieth century links the art practices of Allan Kaprow and Robert Smithson in their attempts to test the limits of art both what it is and where it is. Ursprung provides a sophisticated yet accessible analysis placing the two artists firmly in the art world of the 1960s as well as in the art historical discourse of the following decades. Although their practices were quite different they both extended the studio and gallery into desert landscapes abandoned warehouses industrial sites train stations and other spaces. Ursprung bolsters his argument with substantial archival research and sociological and economic models of expansion and limits.
