Political Theory And Animal Rights:

Zoopolis Sue Donaldson, Will Kymlicka, 2011-11-25 *Zoopolis* offers a new agenda for the theory and practice of animal rights. Most animal rights theory focuses on the intrinsic capacities or interests of animals and the moral status and moral rights that these intrinsic characteristics give rise to. *Zoopolis* shifts the debate from the realm of moral theory and applied ethics to the realm of political theory focusing on the relational obligations that arise from the varied ways that animals relate to human societies and institutions. Building on recent developments in the political theory of group differentiated citizenship, *Zoopolis* introduces us to the genuine political animal. It argues that different types of animals stand in different relationships to human political communities. Domesticated animals should be seen as full members of human animal mixed communities participating in the cooperative project of shared citizenship. Wilderness animals by contrast form their own sovereign communities entitled to protection against colonization, invasion, domination, and other threats to self-determination. Liminal animals who are wild but live in the midst of human settlement such as crows or raccoons should be seen as denizens resident of our societies but not fully included in rights and responsibilities of citizenship. To all of these animals we owe respect for their basic inviolable rights. But we inevitably and appropriately have very different relations with them with different types of obligations. Humans and animals are inextricably bound in a complex web of relationships and *Zoopolis* offers an original and profoundly affirmative vision of how to ground this complex web of relations on principles of justice and compassion.

The Political Theory of Animal Rights Robert Garner, 2005-07-22 Looking at the impact on political thinking caused by the idea that animals are morally important beings, this text suggests that liberalism, despite having weaknesses, is the most appropriate ideological position for the protection of animal interests.

An Introduction to Animals and Political Theory Alasdair Cochrane, 2010-10-12 Structured around the five most important schools within contemporary political theory: liberalism, utilitarianism, communitarianism, Marxism, and feminism, this is the first introductory level text to offer an accessible overview on the status of animals in contemporary political theory.

The Political Turn in Animal Ethics Robert Garner, Siobhan O'Sullivan, 2016-09-23 The debate about our treatment of nonhuman animals has been traditionally dominated by moral philosophers and the crucially important role of politics has been hitherto neglected. This innovative edited collection seeks to redress the imbalance by interrogating some vital questions about this so-called political turn in animal ethics. The questions tackled include: What can political philosophy tell us about our moral obligations to animals? Should the boundaries of the *demos* be expanded to allow for the inclusion of animals? What kind of political system is most appropriate for the protection of animals? Does the protection of animals require limits to democracy as in constitutional devices or a usurping of democracy as in direct action? What can the work of political scientists tell us about the governance of animal welfare? Leading scholars in the field explain how engaging with politics in its empirical and normative guises can throw much needed light on the question of how we treat animals and how we ought to treat them.

A Theory of Justice

for Animals Robert Garner, 2013-08-15 This innovative book is the first to couch the debate about animals in the language of justice and the first to develop both ideal and nonideal theories of justice for animals It rejects the abolitionist animal rights position in favor of a revised version of animal rights centering on sentience *The Political Theory of Animal Rights*, 2005-03 How do we treat animals How ought we to treat them These are the two central questions tackled in the extensively re written and up dated second edition of this well regarded and much cited text It remains the only book which combines in a single volume not only a concise and accessible account of the on going debate about animals in moral and legal philosophy but also a detailed analysis of how this debate is central to an understanding of the ways in which animals are treated In the last decade in Britain we have witnessed major campaigns and public controversy over the export of live animals and the use of animals in research Major campaigns have been mounted against companies such as Shamrock and Huntingdon Life Sciences The impact of genetic engineering on the welfare of animals has also emerged as an important area of concern In addition the controversy over hunting has become even more pronounced with the launch of the pro hunting Countryside Alliance **Should Animals Have Political Rights?** Alasdair Cochrane, 2019 All states must make decisions about how to regulate the treatment of animals In this book Alasdair Cochrane argues that this must go further In order to ensure that their interests are taken seriously it is imperative that we represent them throughout the political process not only rights to protection but also to democratic membership **Political Theory and Animal Rights** Paul A. B. Clarke, Andrew Linzey, 1990 No Political Animals and Animal Politics Marcel Wissenburg, David Schlosberg, 2018-02-17 While much has been written on environmental politics on the one hand and animal ethics and welfare on the other animal politics is underexamined There are key political implications in the increase of animal protection laws the rights of nature and political parties dedicated to animals *Animal Rights Without Liberation* Alasdair Cochrane, 2012 Alasdair Cochrane provides an entirely new theory of animal rights grounded in their interests as sentient beings He applies this theory to a whole range of different and under explored policy areas such as genetic engineering pet keeping indigenous hunting and religious slaughter In contrast to other proponents of animal rights Cochrane claims that the possession of rights by animals does not mean animals must never be owned or used by human beings He claims that because most sentient animals are not autonomous agents they have no intrinsic interest in liberty As such his book
