 Pocket Athens Official Steamship Guide International ,2000 **Imagining Atlantis** Richard Ellis, 2012-01-11 Ever since
 Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For
 two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules
 Verne to Jacques Cousteau to speculate on the island s origins nature and location and sometimes even to search for its
 physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let
 alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into
 this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with
 the story s origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre Columbians
 or ancient Egyptians Was Atlantis an extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove
 these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to
 explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the
 destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b c of the volcanic island of Thera or
 Santorini A fascinating historical and archaeological detective story Imagining Atlantis is a valuable addition to the literature
 on this essential aspect of our mythohistory *Encountering Nature* Thomas Heyd, 2016-04-29 This book argues that an
 attentive encounter with nature is of key importance for the development of an environmentally appropriate culture The
 fundamental idea is that the environmental degradation that we are increasingly experiencing is best conceived as the
 consequence of a cultural mismatch our cultures seem not to be appropriate to the natural environment in which we move

and on which we depend in thoroughgoing ways In addressing this problem Thomas Heyd weaves together a rich tapestry of perspectives on human interactions with the natural world ranging from traditional modes of managing human communities that include the natural environment to the consideration of poetic travelogues ecological restoration and botanic gardens The volume is divided into three parts which respectively consider the relation of human beings to nature in terms of ethics aesthetics and culture It engages the current literature in each of these areas with the help of inter disciplinary approaches as well as on the basis of personal encounters with natural spaces and processes The ultimate aim of this book is to make a contribution to the development of a cultural fabric that is suitable to the natural spaces and processes in which we may thrive and on which we all depend as individuals and as a species **Ford's International Cruise Guide** ,1989

across the great expanse of sea to conduct trade marking an age of immense cultural growth and technological development. These intersocietal lines of communication and paths for commerce relied on rigorous open water travel. And as a potential superhighway the Mediterranean demanded much in the way of seafaring knowledge and innovative ship design if it were to be successfully navigated. In *Seagoing Ships and Seamanship in the Bronze Age Levant*, Shelley Wachsmann presents a one-of-a-kind comprehensive examination of how the early eastern Mediterranean cultures took to the sea and how they evolved as a result. The author surveys the blue water ships of the Egyptians, Syro-Canaanites, Cypriots, Early Bronze Age Aegeans, Minoans, Mycenaeans, and Sea Peoples and discusses known Bronze Age shipwrecks. Relying on archaeological, ethnological, iconographic, and textual evidence, Wachsmann delivers a fascinating and intricate rendering of virtually every aspect of early sea travel, from ship construction and propulsion to war on the open water, piracy, and laws pertaining to conduct at sea. This broad study is further enhanced by contributions from other renowned scholars. J. Hoftijzer and W. H. van Soldt offer new and illuminating translations of Ugaritic and Akkadian documents that refer to seafaring. J. R. Lenz delves into the Homeric Greek lexicon to search out possible references to the birdlike shapes that adorned early ships' stem and stern. F. Hocker provides a useful appendix and glossary of nautical terms, and George F. Bass's foreword frames the study's scholarly significance and discusses its place in the nautical archaeological canon. This book brings together for the first time the entire corpus of evidence pertaining to Bronze Age seafaring and will be of special value to archaeologists, maritime historians, philologists, and Bronze Age textual scholars. Offering an abundance of line drawings and photographs and written in a style that makes the material easily accessible to the layperson, Wachsmann's study is certain to become a standard reference for anyone interested in the dawn of sea travel.
