Epics, Hymns, Omens, and Other Texts Albert T. Clay, 2005-09-14 The intention of Ancient Texts and Translations ATT is to make available a variety of ancient documents and document collections to a broad range of readers The series will include reprints of long out of print volumes revisions of earlier editions and completely new volumes The understanding of ancient societies depends upon our close reading of the documents however fragmentary that have survived K C Hanson Series Editor

Sargonic Akkadian Rebecca Hasselbach, 2005 Since the second edition of I J Gelb s *Old Akkadian Writing and Grammar* in 1961 which is still the standard grammar of Old Akkadian to this day a significant number of new texts from the Old Akkadian period has been discovered and important improvements have been made regarding the analysis of Old Akkadian and Early Semitic grammar particularly phonology and writing The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period 2350 2100 BCE which contains most of our evidence for the Akkadian used at this period It consists of a detailed investigation of the Sargonic Akkadian syllabary phonology and morphology with specific focus on geographical and dialectal variations that are noticeable in this text corpus but which have not yet been examined thoroughly The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects Babylonian and Assyrian in order to establish the position of the individual sub groups of Sargonic Akkadian within the dialect geography of Akkadian *Scribal Education in the Sargonic Period* Nicholas L. Kraus, 2020-10-12 *Scribal Education in the Sargonic Period* is an in depth analysis of the process of education for scribes during the period of Sargonic hegemony in ancient Mesopotamia c 2335 2150 BCE The book provides a holistic study

of the topic addressing the technology of writing the school texts used in education the languages of instruction and the social and historical context of scribal life and an education in cuneiform writing The topic of scribal education at such an early period of Mesopotamian history has never been addressed at length before Nicholas Kraus convincingly argues that scribal education during the Sargonic period was closely tied to the administrative institutions of the Sargonic Empire and prepared a scribe to become an effective administrator The Harvard Semitic Studies series publishes volumes from the Harvard Museum of the Ancient Near East Other series offered by Brill that publish volumes from the Museum include Studies in the Archaeology and History of the Levant and Harvard Semitic Monographs <https://hmane.harvard.edu/publications>

A Remarkable Collection of Babylonian Mathematical Texts Jöran Friberg, 2007-10-01 The sub collection of mathematical cuneiform texts in the Sch y en Collection makes a substantial addition to the known corpus of such texts It contains 121 texts not counting 151 multiplication tables and 53 small weight stones According to the catalog at the end of the Index of Subjects below where those 121 mathematical texts are ordered by content nearly all known kinds and some new kinds of mathematical cuneiform texts are represented in the collection Therefore it has been possible to organize the present work as a broad general account of Mesopotamian mathematics illustrated mainly by texts from the Sch y en Collection but occasionally also by previously published texts The general disposition of the book is borrowed from my own concise but comprehensive survey of Mesopotamian mathematics in the article on Mathematics in *Reallexikon der Assyriologie* vol 7 1990 My ambition has been to make the account easily accessible to all kinds of readers yet still as detailed and exhaustive as possible For that purpose there is for instance an introductory Chapter 0 on how to get a better understanding of mathematical cuneiform texts The chapter begins with a discussion of the danger of unintentional anachronisms in translations of pre Greek mathematical texts and continues with a presentation of the kind of conform transliterations translations and interpretations true to the original that will be used throughout the book in discussions of individual texts

History of the Akkadian Language (2 vols) Juan-Pablo Vita, 2021-08-09 Akkadian is after Sumerian the second oldest language attested in the Ancient Near East as well as the oldest known Semitic language It is also a language with one of history's longest written records And yet unlike other relevant languages written over a long period of time there has been

no volume dedicated to its own history The aim of the present work is to fill that void The outcome is presented in 26 chapters written by 25 leading authors and divided into two volumes the first covering the linguistic background and early periods and the second covering the second and first millennia BCE as well as its afterlife **Perspectives on the Song of Songs / Perspektiven der Hoheliedauslegung** Anselm C. Hagedorn,2012-02-13 The collection of essays contains nineteen contributions that aim at locating the Song of Songs in its ancient context as well as addressing problems of interpretation and the reception of this biblical book in later literature In contrast to previous studies this work devotes considerable attention to parallels from the Greek world without neglecting the Ancient Near East or Egypt Several contributions deal with the use of the Song in Byzantine Medieval German Romantic and modern Greek Literature Due to the interdisciplinary nature of the collection new perspectives and avenues of approach are opened Cuneiform Parallels to the Old Testament, Second Edition Robert W. Rogers,2005-07-19 The first major collection of cuneiform texts in English Despite its age this volume still has a major contribution to make Unlike other collections Rogers s volume includes the transliterated Akkadian for each text This provides an invaluable access to the original texts without having a library that includes every volume of the original publications A further asset is the collection of forty eight excellent photographs and line drawings Included here are tablets prisms cylinders seals boundary stones and bas reliefs The bibliography is composed of two parts The first includes the entries from Rogers s List of Books Quoted or Mentioned but with numerous corrections and supplying much missing data The second part is an updated list organized by major cuneiform languages Diverse Collections Sumerian Akkadian Hittite Hurrian Eblaite and Ugaritic This will direct the reader to the wealth of primary documents that is now our privilege to read **Current Research in Cuneiform Palaeography** Elena Devecchi,Gerfrid G. W. Muller,Jana Mynarova,2015-12-31 In recent years cuneiform studies have witnessed a growing interest in issues variously related to the broadly defined field of palaeography This led to the development of new methodologies and technologies as well as to the establishment of several projects devoted to the palaeographic analysis of cuneiform corpora from Mesopotamia Syria Anatolia and New Kingdom Egypt spanning from the 3rd to the 1st millennium BC This volume collects papers from scholars who had been working on topics such as writing space wedge order quantitative analysis text reconstruction sign identification and palaeographic dating providing an updated overview on the present state of the art **Mathematics in Ancient Iraq** Eleanor Robson,2020-06-30 This monumental book traces the origins and development of mathematics in the ancient Middle East from its earliest beginnings in the fourth millennium BCE to the end of indigenous intellectual culture in the second century BCE when cuneiform writing was gradually abandoned Eleanor Robson offers a history like no other examining ancient mathematics within its broader social political economic and religious contexts and showing that mathematics was not just an abstract discipline for elites but a key component in ordering society and understanding the world The region of modern day Iraq is uniquely rich in evidence for ancient mathematics because its prehistoric inhabitants

wrote on clay tablets many hundreds of thousands of which have been archaeologically excavated deciphered and translated Drawing from these and a wealth of other textual and archaeological evidence Robson gives an extraordinarily detailed picture of how mathematical ideas and practices were conceived used and taught during this period She challenges the prevailing view that they were merely the simplistic precursors of classical Greek mathematics and explains how the prevailing view came to be Robson reveals the true sophistication and beauty of ancient Middle Eastern mathematics as it evolved over three thousand years from the earliest beginnings of recorded accounting to complex mathematical astronomy Every chapter provides detailed information on sources and the book includes an appendix on all mathematical cuneiform tablets published before 2007

The Mathematics of Egypt, Mesopotamia, China, India, and Islam Victor J. Katz,2021-08-10 In recent decades it has become obvious that mathematics has always been a worldwide activity But this is the first book to provide a substantial collection of English translations of key mathematical texts from the five most important ancient and medieval non Western mathematical cultures and to put them into full historical and mathematical context The Mathematics of Egypt Mesopotamia China India and Islam gives English readers a firsthand understanding and appreciation of these cultures important contributions to world mathematics The five section authors Annette Imhausen Egypt Eleanor Robson Mesopotamia Joseph Dauben China Kim Plofker India and J Lennart Berggren Islam are experts in their fields Each author has selected key texts and in many cases provided new translations The authors have

also written substantial section introductions that give an overview of each mathematical culture and explanatory notes that put each selection into context This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and the purpose and significance of each text Addressing a critical gap in the mathematics literature in English this book is an essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non Western mathematical developments and how they helped shape and enrich world mathematics The book is also an indispensable guide for mathematics teachers who want to use non Western mathematical ideas in the classroom

Mesopotamian Mathematics, 2100-1600 BC Eleanor Robson, 1999 Mathematics was integral to Mesopotamian scribal culture indeed writing was invented towards the end of the fourth millennium BC for the express purpose of recording numerical information By the beginning of the second millennium the earliest known body of pure mathematics was one of the key elements of scribal training and is thus pivotal to our understanding of the educational practices and intellectual history of ancient Mesopotamia The main body of this book is a mathematical and philological discussion of the two hundred technical constants or coefficients found in early second millennium mathematics Their names and mathematical functions are established leading to improved interpretations of several large mathematical topics The origins of many coefficients and much of the more practical mathematics are traced to late third millennium accounting and quantity surveying practices Finally the coefficients are used to examine some aspects of mathematics education in early Mesopotamia

Where Kingship Descended from Heaven Deborah Bekken, Karen L. Wilson, 2023-04-10 From 1923 to 1933 the Chicago Field Museum and the University of Oxford conducted archaeological excavations at the site of Kish located on the floodplain of the Euphrates River in modern Iraq approximately 80 kilometers south of Baghdad Over the course of ten years of work the expedition explored seventeen different mounds both inside and outside the ancient boundaries of Kish The finds were divided at the end of each season with the Iraq Museum retaining half of the objects and any one of a kind items and the two excavating institutions splitting the remainder Beginning in 2004 the Field Museum undertook a reevaluation of its Kish holdings To highlight new research and insights into the material culture from Kish and our understanding of the importance of the site to Mesopotamian archaeology the Field Museum held a symposium in 2008 that brought together an international group of scholars who presented papers on various aspects of the ancient city This volume which grew out of that symposium presents a wide array of studies on the excavated material remains from Kish including cuneiform texts animal figurines human
