False Expectations Dale Eisler, University of Regina. Canadian Plains Research Center, 2006

Myth has played an important and ongoing role in the development of Saskatchewan's political economy First during the time of the National Policy Saskatchewan was portrayed to immigrants as a promised land This period served as the psychological and economic foundation for the province When belief in Saskatchewan as a promised land was shattered by the Great Depression and Dirty Thirties the myth was reconstituted through the inspiration of the social gospel It was then politically reinvigorated in the meaning of medicare and has been expressed in recent decades through the competing visions for economic development Through all these eras no matter what the tides of politics there remained one constant the singular collective idea that Saskatchewan was a special place with unrealized potential The challenge for the public dialogue of Saskatchewan as the province enters its second century is to not replay the mistakes of the past Saskatchewan people must recognize the role that myth has played and must continue to play in the life of the province But at the same time they must differentiate it from reality by understanding the power of myth as a force for progress and its potential to create false expectations
