From Ecclesiastes to Simone Weil Ernest Rubinstein, 2014-08-06 From Ecclesiastes to Simone Weil Varieties of Philosophical Spirituality reads major philosophers from the Western philosophical canon and beyond for the spirituality implicit in their metaphysics epistemology ethics aesthetics and logic Its aim is to revive for the modern reader the spiritual import of philosophy as an area of inquiry and study Spirituality is understood as a lived orientation towards the sacred The sacred is characterized as the source of all being and human wellbeing Philosophy is presented as an avenue of approach to the sacred alternative to the western religious traditions Philosophers treated include Plato Descartes Spinoza Kant Hegel Kierkegaard Emerson William James Bertrand Russell and Simone Weil *Making Sense of Suburbia through Popular Culture* Rupa Huq, 2013-06-20 We all know what suburbia is indeed the majority of us live in it Yet despite this ubiquity with no formal definition of the concept the suburbs have developed in our collective imagination through representations in popular culture from Terry and June to Desperate Housewives Rupa Huq examines how suburbia has been depicted in novels cinema popular music and on television charting changing trends both in the suburbs and popular media consumption and production She looks at the differences in defining suburbia in the US and UK and how characteristics associated with it have shifted in meaning and form Bertrand Russell Werner Martin, 2015-06-03 No detailed description available for Bertrand Russell **Darwin, God and the Meaning of Life** Steve Stewart-Williams, 2010-09-30 If you accept evolutionary theory can you also believe in God Are human beings superior to other animals or is this just a human prejudice Does Darwin have implications for heated issues like euthanasia and animal rights Does evolution tell us the purpose of life or does it imply that life has no ultimate purpose Does evolution tell us what is morally right and wrong or does it imply that ultimately nothing is right or wrong In this fascinating and intriguing book Steve Stewart Williams addresses these and other fundamental philosophical questions raised by evolutionary theory and the exciting new field of evolutionary psychology Drawing on biology psychology and philosophy he argues that Darwinian science supports a view of a godless universe devoid of ultimate purpose or moral structure but that we can still live a good life and a happy life within the confines of this view **Nuclear Realism** Rens van Munster, Casper Sylvest, 2016-04-14 What is a realist response to nuclear weapons This book is animated by the idea that contemporary attempts to confront the challenge of nuclear weapons and other global security problems would benefit from richer historical foundations Returning to the decade of deep thermonuclear anxiety inaugurated in the early 1950s the authors focus on four creative intellectuals G nther Anders John H Herz Lewis Mumford and Bertrand Russell whose work they reclaim under the label of nuclear realism This book brings out an important oppositional and resolutely global strand of political thought that combines realist insights about nuclear weapons with radical proposals for social and political transformation as the only escape from a profoundly endangered planet Nuclear Realism is a highly original and provocative study that will be of great use to advanced undergraduates graduates and scholars of political theory
