Broadband Satellite Communications for

Internet Access Sastri L. Kota, Kaveh Pahlavan, Pentti A. Leppänen, 2011-06-27 Broadband Satellite Communications for Internet Access is a systems engineering methodology for satellite communication networks. It discusses the implementation of Internet applications that involve network design issues usually addressed in standard organizations. Various protocols for IP and ATM based networks are examined and a comparative performance evaluation of different alternatives is described. This methodology can be applied to similar evaluations over any other transport medium. **Satellite Personal**

Communications for Future-generation Systems Enrico Del Re, Laura Pierucci, 2012-12-06 Consisting of selected technical contributions to the European Project COST252 Evolution of Satellite Personal Communications from 2nd to Future Generation Systems, this volume provides many innovative results which can be the basis for new global mobile terrestrial satellite telecommunications systems providing multimedia services at high rates. The latest research results and new perspectives on communications problems are presented in areas such as Satellite systems Management, signalling and resource allocation, CDMA system and receivers, Protocols, Coding, Satellite ATM and Satellite UMTS. The book deals with the satellite components for the third generation mobile UMTS/IMT 2000 Systems.
