new edition also examines critical success factors and how to avoid the pitfalls in selecting satellite and ground resources. The book covers all the fundamentals of satellites ground control systems and earth stations considering the design and operation of each major segment. You gain a practical understanding of the basic construction and usage of commercial satellite networks, how parts of a satellite system function, how various components interact, which role each component plays, and which factors are the most critical to success. Moreover, the book explores the economic, legal, and management issues involved in running the business of satellite communications.

On-Board Processing for Satellite Remote Sensing Images
Guoqing Zhou, 2023-05-12. On-board image processing systems are used to maximize image data transmission efficiency for large volumes of data gathered by Earth observation satellites. This book explains the methods, mathematical models, and key technologies used for these systems. It introduces the background, basic concepts, and the architecture of on-board image processing, along with on-board detection of the image feature and matching ground control point identification, on-board geometric correction, calibration, geographic registration, etc. Describes algorithms and methodologies for on-board image processing with FPGA chips. Migrates the traditional on-ground computing to on-board operation, and the image processing is implemented on-board, not on-ground. Introduces for the first time many key technologies and methods for on-board image processing. Emphasizes the recent progress in image processing by using on-board FPGA chips. Includes case studies from the author's extensive research and experience on the topic. This book gives insights into emerging technologies for on-board processing and will benefit senior undergraduate and graduate students of remote sensing, information technology, computer science, and engineering, electronic engineering, and geography, as well as researchers and professionals interested in satellite remote sensing image processing in academia and governmental and commercial sectors.

Satellite Broadcasting
Ralph Negrine, 2013-06-19. Originally published in 1988, this book provides a thorough examination of the possibilities and key issues in satellite technology, which at the time already seemed likely to change the face of broadcasting both within nations and internationally. It begins with a guide to the technical development of different systems of satellites and signal reception, and an outline of the international political and regulatory issues involved. It then examines the situation in various industrialised countries by analysing launching plans, funding, the interaction between satellite cable and VCRs, and the effect on existing broadcasting systems. Concerned throughout with a wide range of cultural considerations and the potential impacts of the new media, this is a useful reflection on the time.

Satellite Broadcasting: Implications for Foreign Policy
United States. Congress. House. Committee on Foreign Affairs. Subcommittee on National Security Policy and Scientific Developments, 1969. Examines foreign policy implications of international use of radio and TV broadcasting from satellites.
