Gilad James, PhD, Saudi Arabia is a Middle Eastern country bordered by Jordan Iraq Kuwait the United Arab Emirates Qatar Oman and Yemen It is the largest country in the region covering approximately 830 000 square miles The country has a population of over 34 million people with Riyadh as its capital city The Kingdom of Saudi Arabia is known for being the birthplace of Islam and is home to the two holiest cities in the religion Mecca and Medina The country is ruled by a monarchy with King Salman bin Abdulaziz Al Saud serving as the current monarch The economy of Saudi Arabia is heavily dependent on the oil industry with the country being the world's largest crude oil exporter The country is also well known for its rich cultural heritage including traditional dances music and culinary practices **The Economy of Saudi Arabia in the 21st Century**

John Sfakianakis, 2024-05-11 This book is about Saudi Arabia's efforts to overhaul its economy and the numerous prospects and challenges it faces in doing so As one of the world's leading oil producers the outcomes of the most ambitious wave of reforms Saudi Arabia has ever undertaken will provide valuable lessons not only for the kingdom itself but also for other oil dependent and resource based economies Since 2016 Saudi Arabia has embarked on an unparalleled economic if not social and political transformation project with an ultimate aim of diversifying away from oil New sources of growth such as tourism industry and entertainment have been identified but it remains to be seen whether these will be enough to sustain the economy in the post oil era Reforms including lowering energy subsidies instituting VAT and introducing indirect taxes on labor and businesses have already produced notable results Looking ahead the economy requires rigorous and continuous

processes of severe competition amongst its private sector participants as well as strong institutions. It also requires creative destruction to be allowed to run its course within the wider economy. The economic reform experiment undertaken by Saudi Arabia remains the most sweeping among emerging market economies and certainly in the entire Middle East. The changes are all encompassing and involve a complex redrawing of the political, economic, religious and social map.

American Higher Education in a Global Context Cristina González, 2022-02-14. *American Higher Education in a Global Context: Historical Perspectives* describes the current state of universities on each continent providing a comprehensive analysis of the numerous factors that have affected higher education systems around the world. This book studies higher education from its emergence in antiquity to the establishment of the American research university model and its adoption around the globe through the current Covid 19 pandemic and concomitant economic and political crisis. The author pays special attention to the shortcomings of the neoliberal trend of the last four decades which increased social stratification at institutions of higher learning. Calling for an expansion of access to tertiary education and in particular to research universities, this book examines the competition between China and the United States in the field of higher education stressing the importance of academic freedom without which there can be no true academic excellence.

China, Russia, and Twenty-first Century Global Geopolitics Paul J. Bolt, Sharyl Cross, 2018. This book provides a comprehensive analysis of the Chinese-Russian bilateral relationship grounded in a historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics. The volume compares the national worldviews, priorities and strategic visions for the Chinese and Russian leadership, examining several aspects of the relationship in detail. The energy trade is the most important component of economic ties, although both sides desire to broaden trade and investments. In the military realm, Russia sells advanced arms to China and the two countries engage in regular joint exercises. Diplomatically, these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria and also cooperate on non-traditional security issues including preventing coloured revolutions, cyber management and terrorism. These issue areas illustrate four themes: Russia and China have common interests that cement their partnership, including security, protecting authoritarian institutions and re-shaping aspects of the global order. They are key players not only influencing regional issues but also international norms and institutions. The Sino-Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape. Nevertheless, the West is still an important partner for China and Russia. Both seek better relations with the West but on the basis of mutual respect and equality. Lastly, Russia and China have frictions in their relationship and not all of their interests overlap. The Sino-Russian relationship has gained considerable momentum particularly since 2014 as Moscow turned to Beijing attempting to offset tensions with the West in the aftermath of Russia's annexation of Crimea and intervention in Ukraine. However, so far China and Russia describe their relationship as a comprehensive strategic

partnership but they are not allies *Saudi Arabia*, 1986 World Development Report 1981, 1981 This is the fourth in the World Bank's annual series assessing key development issues Adjustment global and national to promote sustainable growth in the changing world economy is the main theme of this report Recession and inflation in the industrial countries together with the rise in oil prices have been the main forces at work in the world economy in the 1970s The report examines their effect on developing countries to see how adjustment has been managed and what lessons may be learned for the 1980s Adjustment occurs through international trade and capital flows and through changes in national production and consumption patterns The earlier chapters of the report present global and regional projections for the 1980s and consider international aspects of adjustment in trade energy and finance It then turns to adjustment problems of different groups of developing countries and a consideration of the prospects for human development The report also includes the 1981 World Development Indicators a set of 25 tables of economic and social indicators for 124 countries **World Geography Today**

David M. Helgren, Robert J. Sager, 1995 **E-Adoption and Technologies for Empowering Developing Countries: Global Advances** Sharma, Sushil K., 2012-01-31 This book reviews the impact technology has had on individuals and organizations whose access to media and resources is otherwise limited including topics such as electronic voting electronic delivery systems social Web applications and online educational environments Provided by publisher The Decline of Arab Oil Revenues Abdel Majid Farid, Hussein Sirriyeh, 2022-06-01 First published in 1986 The Decline of Arab Oil Revenues explores the fall in the economic value of Arab oil reserves in the 1980s Some of the threats to Arab countries include depletion of oil resources rise of alternative sources of energy international policies designed to control oil prices and growing conflicts of interest between producing and consuming countries The editors suggest that any decline in oil revenues would negatively affect the economic political social and psychological structure of Arab societies since they are yet to explore non oil sources of wealth Consequently the editors stress on the importance of researching the desert which covers 94% of Arab lands as a potential source of wealth Given the current global shift towards sustainable forms of energy this book is a timely reminder of the economic and political implications of such a shift on Arab countries for students of political science international relations geography and economics **China and the Persian Gulf** Dr. Mordechai Chaziza, 2019-11-14 Since China announced the Belt and Road Initiative BRI in 2013 the Gulf States have regarded it as a means for diversifying their national economies in order to reduce dependence on oil revenues and to achieve their national development strategy The Persian Gulf region has a significant role in the successful implementation of BRI Emerging strategic diplomatic and financial partnerships will enable China to control the flow of its exports to world markets The BRI has five major goals Policy coordination facilities connectivity free trade financial integration and people to people bonds Facilities connectivity which focuses on transportation and energy infrastructure is the initiative's priority The integration between the national development plans of Gulf monarchies the economic reconstruction plans of Iraq and Iran and the new

economic goals of Saudi Arabia with Chinas Belt and Road vision have converged to bring forward opportunities The implementation of the new Silk Road strategy will unleash a regional infrastructure boom by connecting China with Asia Europe and Africa by land and sea boosting renminbi internationalization Nevertheless there are challenges that could complicate the envisaged bilateral partnerships Saudi Arabia The strategic synergy between the BRI and Saudi Vision 2030 has forged a joint economic development path but external conflicts Yemen Iran could derail plans Iran While Tehran has a special geographical status in West Asia Washingtons decision to withdraw from the Iran nuclear agreement might create Sino Iranian trade barriers The UAE In July 2018 bilateral relations were elevated to a comprehensive strategic partnership The synergy between the BRI and UAE Vision 2021 is multifaceted trade energy infrastructure and logistics financial services military ties tourism and cultural cooperation but very complex Most of the Gulf States are governed by monarchies are at the primary stage of industrialization and are susceptible to US and European influence The challenges Chinas ascendancy poses for the US and the inevitable geopolitical fight back in conjunction with Gulf regional turbulence mean that the BRI project will face substantive challenges in the years ahead **The Saudi Arabian Economy** Mohamed A.

Ramady,2010-09-05 The Saudi Arabian economy has changed almost beyond recognition since the oil boom days of the 1980s and the Kingdom itself has changed too economically socially and demographically In the second edition of *The Saudi Arabian Economy* Mohamed Ramady uses several overlapping themes to establish and develop a framework for studying the fundamental challenges to the Saudi economy Particular attention is paid to the benefits of short term planning and long term diversification intended to shield the economy from potentially destabilizing oil price fluctuations and the pace and diversity of domestic reforms The author examines the core strengths and evolution of various financial institutions and the Saudi stock market in the face of globalization before analyzing the private sector in detail Topics discussed include The hydrocarbon and minerals sector including the emergence of the competitive petrochemical sector The impact of small and medium sized businesses and the evolving role of family businesses The growing role of women in the Saudi economy The role of privatization and FDI as engines of change and the position of public private partnerships The establishment of a foundation for a knowledge based economy Finally the author offers an analysis of the key challenges facing the Saudi economy paying particular attention to the potential costs and benefits of globalization and membership in the WTO Employment education economic and social stability and Saudi Arabia s place in the Gulf Cooperation Council as well as Saudi Arabia s evolving strategic economic relations with China and other countries are offered as keys to the consensus building needed to ensure the Kingdom s healthy economic future *The Foreign Policies Of Arab States* Bahgat Korany, Ali El-Din Hillal Dessouki,2019-07-09 Middle East politics have been proverbial for their changeability The 1970s ushered in petro politics for instance but OPEC s international status declined markedly in the following decade Similarly the Arab world s ostracism of Egypt in the 1970s following its separate peace with Israel was turned around in the 1980s the late 1980s also

brought PLO acceptance of the State of Israel Interstate relations were not the only arena to experience significant alterations state society relations also underwent dramatic changes such as the acceleration of privatization in erstwhile socialist regimes Then the 1990s opened with a political earthquake the Gulf Crisis The second edition of this highly acclaimed text offers a penetrating analysis of trends in Arab foreign policies since the book was originally published in 1984 including an early analysis of the effects of Iraq s invasion of Kuwait and the subsequent coalition victory over Iraq In addition the authors have included new chapters on Jordan at the heart of the Arab world and on the Sudan the region s link to sub Saharan Africa Their inclusion allows a fuller understanding of the foreign policies of states that occupy crucial geopolitical positions but wield little tangible power Moreover in many of its chapters the book raises the crucial question of how the foreign policies of these countries can cope with the prevalence of political change

Revolutions and Revolutionary Movements James DeFronzo,2021-09-30 With crucial insights and indispensable information concerning modern day political upheavals the sixth edition of *Revolutions and Revolutionary Movements* provides a representative cross section of many of the most significant revolutions of the modern era Students can trace the historical development of eleven revolutions using a five factor analytical framework Attention is devoted to clearly explaining all relevant concepts and events the roles of key leaders and the interrelation of each revolutionary movement with international economic and political developments and conflicts New to this edition Expanded coverage of women and revolution with profiles of individual women revolutionaries Coverage of the recent student movement in Hong Kong as well as economic developments in China Chinese international influence and international economic development projects and trade relations with the US during the Trump administration Changes in US policy toward Cuba during the Trump administration Examination of the cancellation of the Iran nuclear agreement by the Trump administration Trump administration policies towards Iran the impacts on Iran and Iranian reactions and Iranian and Saudi Arabian involvement in Yemen Coverage of the near extinction of geographic ISIS caliphate terrorist attacks and the implications of US policy on Palestinians and Middle Eastern countries during the Trump administration Examination of persisting economic inequality corruption and recent South African political developments and government actions Analysis of revolutionary movements in Venezuela and Bolivia and coverage of major political developments and events in both countries Trump administration policy toward authoritarian states in the Middle East and implications for the possibility of pro democracy movements in Middle Eastern countries Updated student resources include multiple orienting maps summary and analysis sections chronologies and documentary resources

Diplomatic Strategies of Rising Nations in the Global South Jacqueline Anne Braveboy-Wagner,2024-07-12 At a time of change in the international system this book examines how non traditional leading nations from the Global South have fared to date and what the chances are of their rise to continue In the second decade of

the twenty first century the enthusiasm of observers of the international scene about the rise of the rest is waning as many countries that were expected to lead the evolving multipolar order are experiencing economic contraction and governance problems In order to predict further developments the contributors to this volume focus on the types and sources of the diplomatic strategies that must be executed by rising states if they are to preserve domestic advances as well as gain influence regionally and internationally Through a comprehensive examination of case studies from Latin America Africa Asia and the Middle East they show that while there are commonalities among these rising states unique domestic conditions values and traditions impact and predict diplomatic strategizing and the ability for sustained projection on the international scene
