International Tourism Development and the Gulf Cooperation Council States Marcus L. Stephenson, Ala Al-Hamarneh, 2017-07-14 This book examines the challenges facing the development of tourism in the six member states of the Gulf Cooperation Council GCC Bahrain Kuwait Oman Qatar Saudi Arabia and the United Arab Emirates UAE This region which largely comprises the Arabian Peninsula possesses some of the fastest growing economies in the world and is remarkably unique It shares similar associations and affinities tribal histories royal kinship political associations Bedu cultural roots Islamic heritage rapid urbanization oil wealth rentier dynamics state capitalist structures migrant labour economic diversification policies and institutional restructuring Therefore this volume takes the study of tourism away from its normative unit of analysis where tourism in the region is being examined within the context of the Middle East and the wider Islamic and Arab world towards an enquiry focusing on a specific geo political territory and socially defined region Although international tourism development in the region embodies a range of challenges complexities and conflicts which are deeply contextualized in this volume the approach overall does not endorse

the normative Gulf bashing position that has predominated within the critical enquiries in the region. It presents a forward looking and realistic assessment of international tourism development examining development potentialities and constructive ways forward for GCC states and the region as a whole. This edited volume provides a real attempt to examine critically ways in which tourism and its development intersect with the socio cultural economic political environmental and industrial change that is taking place in the region. By doing so the book provides a theoretically engaged analysis of the social transformations and discourses that shape our contemporary understanding of tourism development within the GCC region. Moreover it deciphers tourism development's role within the context of the GCC states undergoing rapid transformation urbanization ultra modernization internationalization and globalization. In addition to state specific illustrations and destination case studies the work provides insights into relatable themes associated with international tourism development in the region such as tourism's relationship with religion heritage and identity the environment and sustainability mobility and cross border movements the transport industry image production and destination branding mega development and political stability and instability. The book combines theory with diverse case study illustrations drawing on disciplinary knowledge from such fields as sociology political economy and social geography. This timely and original contribution is essential reading for students researchers and academics in the field of tourism studies and related subject areas along with those who have regional interests in Middle East studies including Gulf and Arabian Peninsula studies.

Where is the enemy? What have been the real victories and defeats since 9 11? How are we actually fighting this war and how can it possibly be won? Filled with astonishing disclosures Suskind's book shows readers what he calls the invisible battlefield a global

Contemporary Cases in U.S. Foreign Policy Ralph Carter,2021-03-12 This engaging case study approach brings together a diverse set of contributors to help students question motives consider alternatives and analyze outcomes in many of the most controversial foreign policy issues now confronting the United States Many actors from the president and members of Congress to interest groups NGOs and the media compete to shape U S foreign policy While previous editions of this popular text focused more on national security issues in the wake of 9 11 and the War on Terror the 13 case studies in this edition deal with a wide range of policy areas national security homeland security diplomacy trade immigration epidemics climate change and Russian interference in the 2016 presidential election Many reflect how the demarcation between foreign and domestic policy has become even more blurred and polarization has come to play a significantly increased role in American foreign policy
