A Passion for Nature Donald Worster, 2008 Donald Worster s *A Passion for Nature* is the most complete account of the great conservationist and founder of the Sierra Club ever written It is the first to be based on Muir s full private correspondence and to meet modern scholarly standards yet it is also full of rich detail and personal anecdote uncovering the complex inner life behind the legend of the solitary mountain man It traces Muir from his boyhood in Scotland and frontier Wisconsin to his adult life in California right after the Civil War up to his death on the eve of World War I It explores his marriage and family life his relationship with his abusive father his many friendships with the humble and famous including Theodore Roosevelt and Ralph Waldo Emerson and his role in founding the modern American conservation movement Inspired by Muir s passion for the wilderness Americans created a long and stunning list of national parks and wilderness areas Yosemite most prominent among them Yet the book also describes a Muir who was a successful fruit grower a talented scientist and world traveler a doting father and husband and a self made man of wealth and political influence The winner of numerous book awards *A Passion for Nature* was also named a Best Book of 2008 by Washington Post Book World It is the first comprehensive biography of Muir to appear in six decades **US Environmental History** John Wills, 2012-11-28 Environmental issues in the USA are more important now than ever before The devastation inflicted by Hurricane Katrina growing evidence of global warming and a struggling national energy supply highlight the unfolding crisis Environmental fears translate into US automobile giants plying consumers with fuel efficient cars in the MPG Lounge of sales Politicians talk of energy independence and getting tough on polluters Fears gravitate around a fast approaching doomsday scenario an

environmental endgame of wholesale collapse unless something is done Yet fears of doomsday are nothing new John Wills shows how the current environmental crisis is firmly rooted in the past As well as explaining how today's problems are manifestations of older systems of economics culture and politics he also argues that America has already witnessed a range of doomsday scenarios both real and imagined He identifies and explores a cast of doomsday landscapes that includes the Battle of the Wilderness in Virginia the Santa Barbara Oil Spill the Fable for Tomorrow town featured in Rachel Carson's Silent Spring 1962 and Nevada's Doom Towns 1 and 2 blown apart by atomic testing in the 1950s He reflects on contemporary ruminations over whether nature as a category endures given both the rising contamination of the US landscape and consumer proclivity for celebrating fake mementos of the outdoors such as plastic lawn flamingos and artificial plants And most significantly he poses the question of whether Americans have been inviting doomsday through their long term environmental actions

**Black Swan Song** Rod Giblett, 2021-05-06 Combining memoir and studies in the Environmental Humanities, *Black Swan Song* weaves together an autobiographically based account of the unique life and work of Rod Giblett. For over 25 years, he was a leading local wetland conservationist, environmental activist, and pioneer transdisciplinary researcher and writer of fiction and non-fiction. He has researched, written, and published more than 25 books in the environmental humanities, especially wetland cultural studies and psychoanalytic ecology. *Black Swan Song* traces Rod's early and later life and work, from being born in Borneo as the child of Christian missionaries, through his childhood in Bible College, being a High School dropout, and studying at three universities, to becoming an academic activist and author, and now a writer. Following in the footsteps of *New Lives of the Saints: Twelve Environmental Apostles*, *Black Swan Song* also comprises conversations in conservation counter-theology between the twelve minor biblical prophets and twelve environmental apostles such as Henry David Thoreau, Aldo Leopold, John Muir, and Rachel Carson. It also introduces the lives and works of twelve more environmental apostles such as John Clare, Rebecca Solnit, John Charles Ryan, and others who have made a valuable contribution to green thinking and living. *Black Swan Song* mixes modes and genres such as memoir, essay, story, criticism, etc., making up the writer's black swan song. It provides ways of living and being with the earth in dark and troubled times by providing resources of a journey of hope for learning to live bio and psycho-symbiotic livelihoods in bioregional home habitats of the living earth and in the Symbiocene, the hoped-for age superseding the Anthropocene.

*The Poetics and Politics of the Desert* Catrin Gersdorf, 2009-01-01 This study explores the ways in which the desert as topographical space and cultural presence shaped and reshaped concepts and images of America. Once a territory outside the geopolitical and cultural borders of the United States, the deserts of the West and Southwest have since emerged as canonical American landscapes. Drawing on the critical concepts of American studies and on questions and problems raised in recent debates on ecocriticism, *The Poetics and Politics of the Desert* investigates the spatial rhetoric of America as it developed in view of arid landscapes since the mid-nineteenth century. Gersdorf argues that the integration of the desert into America catered to the entire spectrum of ideological and political responses to the history and culture of the US, maintaining that the Americanization of this landscape was and continues to be staged within the idiomatic parameters and in reaction to the discursive authority of four spatial

*Bird on Fire* Andrew Ross, 2011-10-27 Phoenix Arizona is one of America's fastest growing metropolitan regions It is also its least sustainable one sprawling over a thousand square miles with a population of four and a half million minimal rainfall scorching heat and an insatiable appetite for unrestrained growth and unrestricted property rights In *Bird on Fire* eminent social and cultural analyst Andrew Ross focuses on the prospects for sustainability in Phoenix a city in the bull's eye of global warming and also the obstacles that stand in the way Most authors writing on sustainable cities look at places that have excellent public transit systems and relatively high density such as Portland Seattle or New York But Ross contends that if we can't change the game in fast growing low density cities like

Phoenix the whole movement has a major problem Drawing on interviews with 200 influential residents from state legislators urban planners developers and green business advocates to civil rights champions energy lobbyists solar entrepreneurs and community activists Ross argues that if Phoenix is ever to become sustainable it will occur more through political and social change than through technological fixes Ross explains how Arizona s increasingly xenophobic immigration laws science denying legislature and growth at all costs business ethic have perpetuated social injustice and environmental degradation But he also highlights the positive changes happening in Phoenix in particular the Gila River Indian Community s successful struggle to win back its water rights potentially shifting resources away from new housing developments to producing healthy local food for the people of the Phoenix Basin Ross argues that this victory may serve as a new model for how green democracy can work redressing the claims of those who have been aggrieved in a way that creates long term benefits for all Bird on Fire offers a compelling take on one of the pressing issues of our time finding pathways to sustainability at a time when governments are dismally failing in their responsibility to address climate change
