Save The Earth And Go To Space:

Bezonomics Brian Dumaine, 2021-05-11 Jeff Bezos has become the era's biggest business story. At one point the richest man on the planet, Amazon's executive chairman has built one of the most efficient wealth creation machines in history with more than 2 percent of U.S. household income currently being spent on the hundreds of millions of products speedily shipped from the company's global warehouses. All this convenience, however, has a cost. Bezonomics promises massive job disruptions and the further infiltration of AI and Big Tech into our lives. In Bezonomics, award-winning Fortune magazine writer Brian Dumaine unveils the principles Bezos uses to gain increasing market power: customer obsession, extreme innovation, and long-term thinking, all driven by artificial intelligence, and shows how these tactics are being replicated by companies worldwide. If you want to know what the most unstoppable business model of the future will look like, this is a vital read. **Space**

Expansionism and Criminology Dawn L. Rothe, Victoria E. Collins, 2025-02-18 We have entered a recent zeitgeist: the era of the new space age, driven by billionaires' technological advancements and a few dominating state powers. While the race to space may be said to offer new opportunities for humanity, we ask: is it predicated on the same logics and historical patterns of the past? This question guides our approach and critical assessment of human expansionism into space. **Space Expansionism and Criminology: The Emerging Terrain of Crime, Harm, and Violence** offers readers a critical analysis of space expansionism and today's race to space that has come to define our contemporary era. Taking a retrospective and prospective approach, we delve into the choices being made, the justifications being offered, and those excluded from the hegemonic discourse of the benefits of humans as extraplanetary beings. **Space Expansionism and Criminology** includes chapters on the historical roots of today's space race, weaponization and realpolitik, space junk and debris, space mining and resource extrapolation, the burgeoning space tourism market, the manufacturing of space nostalgia from the 1950s through today, and efforts towards and claims making for space colonization to save Earth and humanity. **LPES and the Battle to Save Planet Earth** Joey

Destefanis, 2004 **Jeff Bezos** Helena Hunt, 2018-12-11 Over five hundred quotations from the man Warren Buffett called the most remarkable businessperson of our age, Jeff Bezos started Amazon in 1994 as an online bookstore based out of his garage. Since then, the ever-expanding enterprise has revolutionized shopping and in many important ways invented e-commerce as we know it. Today, Bezos's vast empire includes everything from cloud computing and fresh food delivery to movie production and consumer electronics. In recent years, Bezos also has invested in rocket technology, newspaper publishing, and artificial intelligence. Every arm of his business, however, is guided by a fundamental goal: to give customers what they want before they even think to ask for it. Jeff Bezos: In His Own Words offers a unique look into the mind of one of history's most successful entrepreneurs by collecting more than five hundred of Bezos's quotes on business, technology, customer service, e-commerce, innovation, entrepreneurship, and more. Meticulously curated from interviews, speeches, shareholder letters, and other sources, this book creates a comprehensive picture of Jeff Bezos, his obsessions, and what makes

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores

the role of private mining rights in the utopian imaginary of space colonisation. It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier. Written in an engaging style, the book investigates a novel case study in the history of capitalism and the commons: the emergence of a nascent space mining industry undergirded by a contentious legislative framework. In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources. This unilateral act of pre-emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation. Using this central dynamic between privately held mining rights and outer space as a global commons, Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity. The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets, public law and private power, the commons and exclusive property. The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics, prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space. This book is compelling reading for anyone interested in the social study of space law, economics, technology, politics and property rights.

This book will make you happy to live on this planet, a good thing because you're not leaving anytime soon. New York Times Book Review From the bestselling authors of *Soonish*, a brilliant and hilarious off world investigation into space settlement. EARTH IS NOT WELL. The promise of starting life anew somewhere far, far away, no climate change, no war, no doomscrolling beckons, and settling the stars finally seems within our grasp. Or is it? Critically acclaimed bestselling authors Kelly and Zach Weinersmith set out to write the essential guide to a glorious future of space settlements, but after years of research, they aren't so sure it's a good idea. Space technologies and space businesses are progressing fast, but we lack the knowledge needed to have space kids build space farms and create space nations in a way that doesn't spark conflict back home. In a world hurtling toward human expansion into space, *A City on Mars* investigates whether the dream of new worlds won't create nightmares both for settlers and the people they leave behind. In the process, the Weinersmiths answer every question about space you've ever wondered about and many you've never considered. Can you make babies in space? Should corporations govern space settlements? What about space war? Are we headed for a housing crisis on the Moon's Peaks of Eternal Light, and what
