## **Saving Lives Buying Time Economics Of Malaria Drugs In An Age Of Resistance:**

**Saving Lives, Buying Time** Institute of Medicine, Board on Global Health, Committee on the Economics of Antimalarial Drugs, 2004-10-09 For more than 50 years low cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections Today however these drugs no longer work against the deadliest form of malaria that exists throughout the world Malaria deaths in sub Saharan Africa currently just over one million per year are rising because of increased resistance to the old inexpensive drugs Although effective new drugs called artemisinins are available they are unaffordable for the majority of the affected population even at a cost of one dollar per course *Saving Lives Buying Time Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments provides an overview of the current drug crisis and offers recommendations on maximizing access to and effectiveness of antimalarial drugs The book finds that most people in endemic countries will not have access to currently effective combination treatments which should include an artemisinin without financing from the global community Without funding for effective treatment malaria mortality could double over the next 10 to 20 years and transmission will intensify *Saving Lives, Buying Time* Kenneth Arrow, 2006 *Saving Lives, Buying Time* Institute of Medicine (U.S.). Committee on the Economics of Antimalarial Drugs, 2004

**Saving Lives, Buying Time** Kenneth Joseph Arrow, Institute of Medicine (U.S.). Committee on the Economics of Antimalarial Drugs, 2004 **Salt, Sugar, and Malaria Pills** Mohga Kamal-Yanni, 2012 **The Oxford Handbook of Africa and Economics** Célestin Monga, Justin Yifu Lin, 2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the *Oxford Handbook of Africa and Economics* reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope

and ambition of the book      *The Oxford Handbook of the Economics of the Biopharmaceutical Industry* Patricia M. Danzon, Sean Nicholson, 2012-04-24 This volume examines the economics of the biopharmaceutical industry with eighteen chapters by health economists      [Deadly Monopolies](#) Harriet A. Washington, 2011-10-04 From the award winning author of *Medical Apartheid* an exposé of the rush to own and exploit the raw materials of life including yours Think your body is your own to control and dispose of as you wish Think again The United States Patent Office has granted at least 40 000 patents on genes controlling the most basic processes of human life and more are pending If you undergo surgery in many hospitals you must sign away ownership rights to your excised tissues even if they turn out to have medical and fiscal value Life itself is rapidly becoming a wholly owned subsidiary of the medical industrial complex *Deadly Monopolies* is a powerful disturbing and deeply researched book that illuminates this life patent gold rush and its harmful and even lethal consequences for public health It examines the shaky legal ethical and social bases for Big Pharma's argument that such patents are necessary to protect their investments in new drugs and treatments arguing that they instead stifle the research competition and innovation that can drive down costs and save lives In opposing the commodification of the body Harriet Washington provides a crucial human dimension to an often all too abstract debate Like the bestseller *The Immortal Life of Henrietta Lacks* *Deadly Monopolies* reveals in shocking detail just how far the profit motive has encroached in colonizing human life and compromising medical ethics It is sure to stir debate and instigate change      *Improving Effective Coverage in Health* Damien de Walque, Eeshani Kandpal, Adam Wagstaff, Jed Friedman, Moritz Piatti-Fünfkirchen, Anja Sautmann, Gil Shapira, Ellen Van de Poel, 2022-05-18 In many low and middle income countries health coverage has improved dramatically in the past two decades but health outcomes have not As such effective coverage a measure of service delivery that meets a minimum standard of quality remains unacceptably low *Improving Effective Coverage in Health* examines one specific policy approach to improving effective coverage financial incentives in the form of performance based financing PBF a package reform that typically includes performance pay to frontline health workers as well as facility autonomy transparency and community engagement This Policy Research Report draws on a rich set of rigorous studies and new analysis When compared with business as usual in low income settings with centralized health systems PBF can result in substantial gains in effective coverage However the relative benefits of PBF the performance pay component in particular are less clear when it is compared with two alternative approaches direct facility financing which provides operating budgets to frontline health services with facility autonomy on allocation but not performance pay and demand side financial support for health services that is conditional cash transfers and vouchers Although PBF often results in improvements on the margins closing the substantial gaps in effective health coverage is not yet within reach for many countries Nonetheless important lessons and experiences from the rollout of PBF over the past decade can guide health financing into the future In particular to be successful health financing reform may need to pivot from performance pay while retaining the elements of direct facility

financing autonomy transparency and community engagement      *Agricultural Supply Chain Management Research* Onur Boyabath, Burak Kazaz, Christopher S. Tang, 2021-12-09 This book focuses on three essential elements of agricultural supply chains Planting and Growing Processing and Selling and Government Interventions For decades most agricultural economists applied macro economic theory in decisions pertaining to the optimization of food production and distribution However few researchers used micro economic theory to examine how individual farmers respond to market information incentive pricing mechanisms and different market structures in the trade of agricultural goods Examining challenges in agricultural supply chain operations through the lens of micro economic theory is imperative because it can enable policymakers and social enterprises to develop and design market information provision policy incentive contracts and market structures for improving farmer and consumer welfare In each chapter contributing authors motivate their research questions by providing the context and articulating the importance of their questions They present their analysis to examine the respective research questions and explain their results At the end of each chapter they provide a short list of future research questions

*Entrepreneurship, Innovation, and the Growth Mechanism of the Free-Enterprise Economies* Eytan Sheshinski, Robert J. Strom, William J. Baumol, 2021-03-09 How much credit can be given to entrepreneurship for the unprecedented innovation and growth of free enterprise economies In this book some of the world s leading economists tackle this difficult and understudied question and their responses shed new light on how free market economies work and what policies most encourage their growth The contributors take as their starting point William J Baumol s 2002 book *The Free Market Innovation Machine* Princeton which argued that independent entrepreneurs are far more important to growth than economists have traditionally thought and that an implicit partnership between such entrepreneurs and large corporations is critical to the success of market economies The contributors include the editors and Robert M Solow Kenneth J Arrow Michael M Weinstein Douglass C North Barry R Weingast Ying Lowrey Nathan Rosenberg Melissa A Schilling Corey Phelps Sylvia Nasar Boyan Jovanovic Peter L Rousseau Edward N Wolff Deepak Somaya David J Teece Naomi R Lamoreaux Kenneth L Sokoloff Yochanan Shachmurove Ralph E Gomory Jonathan Eaton Samuel S Kortum Alan S Blinder Robert J Shiller Burton G Malkiel and Edmund S Phelps

**Key Issues in Pharmaceuticals Law** José Luis Valverde, 2007 The focus of *Key Issues in Pharmaceuticals Law* is on the ongoing achievement of an authentic world code for medicinal products a so called Pharmacopoeia Through scientific technical harmonization The legal dimension of medicinal products conditions the whole sector and it acquires a global dimension through the demand to protect people s health Hence it is necessary to go forward to total harmonization of all its aspects A global legal statute for medicinal products is justified by the very nature of the product by its social control and the need for it to circulate freely although limitations can be accepted for reasons of solidarity with less favored populations Awareness must arise that the challenge for healthcare is not going to find an adequate answer at the world level without a qualitative change in the world organization of the UN The globalized world we live in demands reinforced continental solidarity if we are to confront the common problems and bring about international order A scientific technical code on the quality of medicinal products is essential for a statute on medicines That code is the Pharmacopoeia Publisher
