School Improvement In An Era Of Change:

School Improvement in an Era of Change David Hopkins, Mel Ainscow, Mel West, 1994 *School Improvement for Real* David Hopkins, 2003-09-02 As societies continue to set educational goals that are on current performance beyond the capacity of the system to deliver strategies for enhancing student learning through school and classroom intervention have become increasingly important Yet as David Hopkins argues in his book many of the educational initiatives recently developed under the umbrella of school improvement are inadequate or unhelpful Simply blaming teachers and delegating financial responsibility he maintains has little positive impact on classroom practice This is the bleak context within which school improvement has to operate today School Improvement for Real offers a genuine alternative a strategy for educational change that focuses on student achievement by modifying classroom practice and adapting the management arrangements within the school to support teaching and learning It outlines an approach to school improvement that has a medium term systemic orientation providing both principles and suggestions for better practice The author s experience in the field of school improvement ensures that the text is informed by a practical wisdom that is so often lacking from the more typical managerial texts on improvement and effectiveness *School Improvement* Zijian Li, Michael Williams, 2006 School improvement is at the centre of educational reform and is perceived by many as a key to social and economic advance It contributes to determining the personal fulfilment and career paths of individual students and consequently engages the interest of parents and community members It is an ever present commitment of teachers and managers in schools Policy makers and politicians at international national and local levels devote much time and effort to their search for better schools School improvement has also attracted the attention of researchers and scholars in many countries They have been drawn from various disciplines and fields within the educational studies community including psychology sociology history evaluation and studies in curriculum and assessment There is now an established body of findings from studies conducted in many contexts This book brings together leading experts drawn from many countries and several continents reflecting diverse approaches to educational policy and practice evaluation and research Variations between countries and between local communities within countries are highlighted The possibilities and difficulties inherent in transferring evidence from one educational system at a number of levels to another are clearly discussed What emerges from the cross national and cross cultural evidence are several significant threads currently under active investigation including school structure and management classroom organisation school leadership teacher training and staff development curriculum and assessment community involvement lifelong learning and special provision for students with special educational needs *School Improvement International Perspectives* is written for national educational policy makers teachers and student teachers governing bodies and parents from various levels of schooling and university researchers and scholars **Developmental Planning for School Improvement** David Hopkins, 1995-01-01 This text represents the experiences from six English
