what school could be The book addresses current systemic problems and solutions as it Highlights global examples of successful school change Describes strategies that improve educational opportunities and performance Explores promising approaches in developing new learning opportunities Outlines conditions for supporting wide scale educational improvement This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools We can make the schools we have more efficient more effective and more equitable all while creating powerful opportunities to support all aspects of students development You won t find a better book on system change in education than this one We learn why schools don t change how they can improve what it takes to change a system and in the final analysis the possibilities of system change Above all The Education We Need renders complexity into clarity as the writing is so clear and compelling A powerful read on a topic of utmost importance Michael Fullan Professor Emeritus OISE University of Toronto I cannot recommend this book highly enough Tom tackles long standing and emerging educational issues in new ways with an impressive understanding of the challenging complexities but also feasible possibilities for ensuring excellence and equity for all students Carol Campbell Associate Professor Ontario Institute for Studies in Education University of Toronto *Socially Collaborative Schools* Peter A Barnard,2018-09-22 The inherited model of schooling based on same age tutor groups is not only wrong but anti learning and unsafe When examined from a systems perspective the assumptions are revealed This explains why schools fail to respond to reform and why reform is the wrong approach It blames the same age structure as the direct cause of bullying poor parent partnership mental health issues and more pointing out the system s separation from psychology and child welfare When schools adopt a mixed age system tutor groups home groups mixed by age these adverse effects are resolved The book calls for wholesale change to the way schools organize relationships and issues of connectivity The author uses insights and research from his work with hundreds of schools worldwide transitioning from the same age system to one based on mixed age This book rejects the use of pro social programs add ons and fixes in favor of one able to design in empathy emotional intelligence and character
