The School I'd Like Catherine Burke,Ian Grosvenor,2003-12-08 In 2001 The Guardian launched a competition called The School I d Like in which young people were asked to imagine their ideal school This vibrant groundbreaking book presents material drawn from that competition offering a unique snapshot of perceptions of today s schools by those who matter most the pupils The book is wonderfully illuminated by children s essays stories poems pictures and plans Placing their views in the centre of the debate it provides an evaluation of the democratic processes involved in teaching and learning by identifying consistencies in children s expressions of how they wish to learn highlighting particular sites of disease in the education system today illustrating how the built environment is experienced by today s children posing questions about the reconstruction of teaching and learning for the twenty first century This book offers a powerful new perspective on school reform and is essential reading for all those involved in education and childhood studies including teachers advisors policy makers academics and anyone who believes that children s voices should not be ignored **School Work** ,1905

School Leadership in the Caribbean Paul Miller,2013-05-06 Successful school leadership is an issue currently being debated up and down Caribbean territories Key issues in the ongoing debate include students outcomes and participation in the regional Caribbean Secondary Examinations CSEC teacher recruitment and retention teacher training and continuing professional development upgrading and parental involvement These issues point to leadership at various levels whether in its exercise or in its influence and are examined within and across national and regional education systems Particular attention is given to debates around improving outcomes for students teacher development and the role of the principal in leading school improvement A source of debate about practice of school leadership in the Caribbean surrounds the issue of gender Where are men in teaching Where are men in leadership positions and positions of responsibility Unlike in some countries where for example men tend to hold more leadership positions than women especially at the secondary phase of education in the Caribbean this is not the case there are more female teachers at every level and more female teachers occupy leadership positions at every level Within this book gendered leadership as practised and enacted in the Caribbean is examined from religious social historical and political positions pointing to a clear political dichotomy There is no unitary definition of what can count as school leadership in the Caribbean despite clear similarities of practices and approaches What this volume argues however is that within the Caribbean region there are many similarities of experience for the practice and exercise of school leadership which draw on a common framework of teacher training a common language and a common socio political history that existed well before the formation of CARICOM through British colonisation This book does not dwell on the period of British colonisation but discusses the extent to which this period in Caribbean history has influenced the practice of school leadership today most notably in areas such as curricular and teacher training models Education in emergency situations such teaching and learning in severe weather conditions such as

hurricanes is also spotlighted As a whole the themes in this edited volume proffer an evidence based approach to contemporary issues in school leadership in the Caribbean and extend the current literature in the field *Public School Magazine* ,1898 **Manual of the School Law of New Brunswick** New Brunswick,1887 *School* ,1908 **University High School Journal** ,1927 **Handbook of Adolescent Development** Sandy Jackson,Luc Goossens,2020-01-29 Handbook of Adolescent Development fills a gap in the literature on adolescent development and behaviour all of the authors of the various chapters were invited to include as many findings on European adolescents as possible Through this specific emphasis the handbook provides a complement to other reviews of the literature that are mostly based on North American samples The contributors are all eminent researchers in the field and the individual chapters cover their specific areas of expertise Theories of adolescence along with emotional physical and cognitive issues are explored Topics covered include families peer relations school and leisure time as well as problem areas such as depression drug consumption and delinquency Handbook of Adolescent Development also incorporates a comprehensive review of the literature in the area and considers avenues for future research This multidisciplinary text will be of interest to those studying and researching in the fields of developmental psychology sociology demography epidemiology and criminology Resources in Education ,1998
