Committee on Books for the College Art Library,1920 **The Architectural Setting of the Cult of Saints in the Early Christian West c.300-c.1200** John Crook,2000-01-13 This book explores the way in which church architecture from the earliest centuries of Christianity has been shaped by holy bones the physical remains or relics of those whom the Church

venerated as saints The Church's holy dead continued to exercise an influence on the living from beyond the grave and their earthly remains provided a focus for prayer The memoriae house churches and crypts of early Christian Rome the elaborately decorated monuments containing the bodies of the bishops of Merovingian Gaul the revival of ring crypts in the Carolingian empire the crypts tomb shrines and later high shrines of medieval England all demonstrate how the presence of a holy body within a church influenced its very architecture This is the first complete modern study of this hitherto somewhat neglected aspect of medieval church architecture in western Europe **Medieval Architecture** Arthur Kingsley Porter, 1908 VOL 1
