Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **Modernism and the Professional Architecture Journal** Torsten Schmiedeknecht, Andrew Peckham, 2018-06-27 The production of this book stems from two of the editors longstanding research interests the representation of architecture in print media and the complex identity of the second phase of modernism in architecture given the role it played in postwar reconstruction in Europe While the history of postwar

reconstruction has been increasingly well covered for most European countries research investigating postwar architectural magazines and journals across Europe their role in the discourse and production of the built environment and particularly their inter relationship and differing conceptions of postwar architecture is relatively undeveloped Modernism and the Professional Architecture Journal sounds out this territory in a new collection of essays concerning the second phase of the reception and assimilation of modernism in architecture as it was represented in professional architecture journals during the period of postwar reconstruction 1945 1968 Professional architecture journals are often seen as conduits of established facts and knowledge The role mainstream publications play however in establishing movements trends or debates tends to be undervalued In the context of the complex undertaking of postwar reconstruction the shortage of resources political uncertainty and the biographical complexities of individual architects the chapters on key European architecture journals collected here reveal how modernist architecture and its discourse was perceived and disseminated in different European countries

The Laboratory of Progress Joseph Jung, 2022-07-29 The Laboratory of Progress Switzerland in the 19th Century tells the improbable story of how a small backward mountainous agricultural country with almost no raw materials became an industrial powerhouse a hub of innovation a touristic mecca and a pioneer in transportation all in the course of a single century That a tiny landlocked country should become a dominant steamship builder for the rest of the world that a country that had never seen a cotton plant should become the world's second largest textile producer that a country with hardly any level terrain should come to boast the world's most highly developed railway network and that a country whose main export was impoverished emigrants should be transformed into one of the world's major financial centres these astonishing developments among many others are explored and explained both through the specific stories of individual innovators and through a prescient analysis of the political economic societal and cultural structures that formed the context in which Switzerland's astonishing transformation took place The book is a compelling read both for professional historians and for general readers with an interest in Switzerland it highlights the roles of transport networks and individual pioneers in industrial and political development

Gestures in Time Phineas Harper, Markus Bogensberger, 2019-12-02 This book features the winner and another five outstanding projects from the 19th Architecture Prize of the Land Steiermark They are as engaging and diverse as the region from a tiny sliver of riverside to one of the most visited Basilicas in the Catholic world From architects taking their first steps to those at the very height of their careers From the Mur valley to nearly a kilometer above sea level The stories these projects tell describe a different way of doing architecture They speak of agents of social equity and cultivators of culture and the spirit above economic goals In a world addicted to speed the careful gestures in time of Styria's richest architecture show what is possible when we slow down

Der Orient in der Schweiz Francine Giese, Leïla el-Wakil, Ariane Varela Braga, 2019-04-01 Der vorliegende Band untersucht die faszinierende und immer noch wenig bekannte orientalisierende Architektur der Schweiz Die in fünf thematischen Sektionen gegliederten Beiträge stellen bislang unveröffentlichtes Material vor und diskutieren die Rezeption islamischer Kunst und Architektur in den unterschiedlichen Landesregionen anhand ausgewählter Fallstudien aus dem 19 und frühen 20 Jahrhundert Im Vordergrund stehen dabei Fragen nach der Entstehung und Funktion orientalisierender Interieurs der Beziehung von Architektur und religiöser Identität der lokalen und globalen Rezeption des neo maurischen Stils sowie der Bedeutung des Orients für nationale Ausstellungen und die dekorativen Künste Die insgesamt fünfzehn Beiträge des zweisprachigen Sammelbandes deutsch französisch zeigen nicht nur die Relevanz des künstlerischen Phänomens für die Schweiz sondern auch für den größeren europäischen Kontext auf und sollen zur Revalorisierung dieses wichtigen Denkmalbestandes beitragen Ce volume examine le phénomène fascinant et encore méconnu de l'architecture orientalisante de Suisse Organisée en cinq sections thématiques les contributions

documentent de façon largement inédite la réception de l'art et de l'architecture islamiques dans plusieurs régions du pays
travers une sélection d'études de cas allant du 19^e siècle au début du 20^e siècle. L'accent est mis sur les questions touchant aux
intérieurs orientalisants, l'architecture et l'identité religieuse, la réception locale et globale du style néo-mauresque ainsi que la
place tenue par l'Orient dans les expositions et les arts décoratifs. Les quinze contributions de cette anthologie bilingue
allemand-français montrent non seulement l'importance de ce phénomène artistique en Suisse mais largissent également la réflexion
au contexte européen pour contribuer à révaloriser ce remarquable patrimoine architectural.
