## **Science And Dissent In England 1688 1945:**

**Science and Dissent in England, 1688-1945** Paul Wood, 2004 Science and Dissent in England 1688 1945 presents essays by internationally recognised experts on the relationships between puritanism dissent nonconformity and science in England It reassesses the topic and develops a better sense of the role played by dissenting protestants in the pursuit of science and technology in England from the Glorious Revolution to the end of the Second World War By bringing together scholars from different periods Science and Dissent in England 1688 1945 develops a unique overview exploring the continuities and discontinuities between scientific inquiry and dissenting Protestantism in England which provides a fresh perspective on the subject Dissent and the Bible in Britain, c.1650-1950 Scott Mandelbrote, Michael

Ledger-Lomas, 2013-10-31 The claim that the Bible was the Christian s only rule of faith and practice has been fundamental to Protestant dissent Dissenters first braved persecution and then justified their adversarial status in British society with the claim that they alone remained true to the biblical model of Christ s Church They produced much of the literature that guided millions of people in their everyday reading of Scripture while the voluntary societies that distributed millions of Bibles to the British and across the world were heavily indebted to Dissent Yet no single book has explored either what the Bible did for dissenters or what dissenters did to establish the hegemony of the Bible in British culture The protracted conflicts over biblical interpretation that resulted from the bewildering proliferation of dissenting denominations have made it difficult to grasp their contribution as a whole This volume evokes the great variety in the dissenting study and use of the Bible while insisting on the factors that gave it importance and underlying unity Its ten essays range across the period from the later seventeenth to the mid twentieth century and make reference to all the major dissenting denominations of the United Kingdom The essays are woven together by a thematic introduction which places the Bible at the centre of dissenting ecclesiology eschatology public worship and family religion while charting the political and theological divisions that made the cry of the Bible only so divisive for dissenters in practice **The Textual Culture of English Protestant Dissent**

**1720-1800** Tessa Whitehouse, 2015-12-17 Religious dissenters and their literary and social heritage are the principal subjects of this book At its heart is a group of English men whose activities were local transcontinental and circum Atlantic Drawing on letters lecture notes manuscript accounts of academies and a range of printed texts and paratexts The Textual Culture of English Protestant Dissent 1720 1800 explores the connections between dissent education and publishing in the eighteenth century By considering Isaac Watts and Philip Doddridge in relation to their mentors students friends and readers it emphasizes the importance they and their associates attached to personal relationships in their private interactions and in print It argues that this contributed to a distinctive literary style as well as particular modes of textual production for moderate orthodox dissenters which reached beyond their own community to address and influence global discourses about education enlightenment and history The book s focus on textual culture foregrounds relationships between forms as well as

considering texts as they existed in one form or another In examining textual culture this book emphasises adaptation transformation fluidity and communality it approaches the human relationships that make texts including friendships reading communities intellectual exchange and business arrangements with as much care as the content of the texts themselves The book demonstrates that models of family and social authorship among Romantic era dissenters advanced by Michelle Levy Daniel White and Felicity James were rooted in the domestic culture at earlier academies and in the example of members of the Watts Doddridge circle

**Industrial Enlightenment** Peter M. Jones, 2017-10-03 Industrial Enlightenment explores the transition through which England passed between 1760 and 1820 on the way to becoming the world's first industrialised nation In drawing attention to the important role played by scientific knowledge it focuses on a dimension of this transition which is often overlooked by historians The book argues that in certain favoured regions England underwent a process whereby useful knowledge was fused with technological know how to produce the condition described here as Industrial Enlightenment At the forefront of the process were the natural philosophers who entered into a close and productive relationship with technologists and entrepreneurs Much of the evidence for this study is drawn from the extraordinary archival record of the activities of Matthew Boulton 1728 1809 and his Soho Manufactory The book will appeal to those keen to explore the dynamics of change in eighteenth century England and to those with a broad interest in the cultural history of science and technology

**The Blackwell Companion to Religion in America** Philip Goff, 2010-03-25 This authoritative and cutting edge companion brings together a team of leading scholars to document the rich diversity and unique viewpoints that have formed the religious history of the United States A groundbreaking new volume which represents the first sustained effort to fully explain the development of American religious history and its creation within evolving political and social frameworks Spans a wide range of traditions and movements from the Baptists and Methodists to Buddhists and Mormons Explores topics ranging from religion and the media immigration and piety though to politics and social reform Considers how American religion has influenced and been interpreted in literature and popular culture Provides insights into the historiography of religion but presents the subject as a story in motion rather than a snapshot of where the field is at a given moment

**Faith and Reason in the Reformations** Terence J. Kleven, 2021-12-06 The five hundredth anniversary of the Protestant Reformation reawakened a long standing and spirited conversation between philosophic science and religious faith a conversation which continues to have consequences on how we understand both science and faith This book brings scholars together to reflect on the topic of the Protestant Reformation as well as the Roman Catholic Counter Reformation the nature of science and the unity of the Church Five chapters in this collection represent five distinct theological formulations within Christianity the other seven chapters are from a variety of historic philosophic and theological starting points on the topic These twelve accounts range from theologies informed by the Classical Philosophy of Plato and Aristotle medieval Jewish and Roman Catholic writers Moses Maimonides and Thomas More writers of the Protestant Reformation

Martin Luther John Calvin Richard Hooker and William Shakespeare the founders of modern science Francis Bacon and T H Huxley and the modern day theologies of Abraham Kuyper Flannery O Connor H R Niebuhr and Dietrich Bonhoeffer Fifty Years of Religious Studies in Canada Harold Coward,2014-11-07 In Canadian universities in the early 1960s no courses were offered on Hinduism Buddhism or Islam Only the study of Christianity was available usually in a theology program in a church college or seminary Today almost every university in North America has a religious studies department that offers courses on Western and Eastern religions as well as religion in general Harold Coward addresses this change in this memoir of his forty five year career in the development of religious studies as a new academic field in Canada He also addresses the shift from theology classes in seminaries to non sectarian religious studies faculties of arts and humanities the birth and growth of departments across Canada from the 1960s to the present the contribution of McMaster University to religious studies in Canada and Coward s Ph D experience there the Centre for Studies in Religion and Society at the University of Victoria and the future of religious studies as a truly interdisciplinary enterprise Coward s retrospective while not a history as such documents information from his varied experience and wide network of colleagues that is essential for a future formal history of the discipline His story is both personally engaging and richly informative about the development of the field *Heaven on Earth* Martin Spence,2015-04-20 In nineteenth century Britain a large number of prominent Anglican and Presbyterian Evangelicals rejected the idea that salvation meant going to heaven when you die Instead they proposed that God would establish his kingdom on earth renewing the creation and reanimating embodied humans to live in a world of science and progress This book introduces the writings and activities of these women and men among whom were counted the ardent social reformer Lord Shaftesbury the highly respected clergyman Edward Bickersteth the popular author Charlotte Elizabeth Tonna and the General Secretary of the Evangelical Alliance Thomas Rawson Birks The book shows that the catalyst for such theological revisionism was the end times doctrine known as premillennialism While commonly characterized as a gloomy and sectarian belief the book argues that premillennialism in Victorian Britain was actually an optimistic and often liberalizing creed It dissolved older Evangelical assumptions about the dissimilarities between time and eternity body and soul heaven and earth The book demonstrates that far from being eccentric pessimists premillennialists were actually pioneers of trends in nineteenth century Christian theology that stressed the importance of the incarnation prioritized social justice and even entertained the idea of universal salvation *Of Apes and Ancestors* Ian Hesketh,2009-10-03 Tell me sir is it on your grandmother s or your grandfather s side that you are descended from an ape In June of 1860 some of Britain s most influential scientific and religious authorities gathered in Oxford to hear a heated debate on the merits of Charles Darwin s recently published *Origin of Species* The Bishop of Oxford Soapy Samuel Wilberforce clashed swords with Darwin s most outspoken supporter Thomas Henry Huxley The latter s triumph amid quips about apes and ancestry has become a mythologized event symbolizing the supposed war between science and Christianity But did the

debate really happen in this way Of Apes and Ancestors argues that this one dimensional interpretation was constructed and disseminated by Darwin s supporters becoming an imagined victory in the struggle to overcome Anglican dogmatism By reconstructing the Oxford debate and carefully considering the individual perspectives of the main participants Ian Hesketh argues that personal jealousies and professional agendas played a formative role in shaping the response to Darwin s hypothesis with religious anxieties overlapping with a whole host of other cultural and scientific considerations An absorbing study Of Apes and Ancestors sheds light on the origins of a debate that continues unresolved to this day *Placing the Enlightenment* Charles W. J. Withers,2008-09-15 The Enlightenment was the age in which the world became modern challenging tradition in favor of reason freedom and critical inquiry While many aspects of the Enlightenment have been rigorously scrutinized its origins and motivations its principal characters and defining features its legacy and modern relevance the geographical dimensions of the era have until now largely been ignored *Placing the Enlightenment* contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions to its content and concerns Investigating the role space and location played in the creation and reception of Enlightenment ideas Charles W J Withers draws from the fields of art science history geography politics and religion to explore the legacies of Enlightenment national identity navigation discovery and knowledge Ultimately geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition Lavishly illustrated and engagingly written *Placing the Enlightenment* will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world *Robert Willis (1800-1875) and the Foundation of Architectural History* Alexandrina Buchanan,2013 The first full scale biography of Robert Willis the founding father of architectural history WINNER of the Cambridge Association for Local History book award 2016 Robert Willis was the archetypal nineteenth century polymath Officially as Jacksonian Professor of Natural and Experimental Philosophy at the University of Cambridge he specialized in the study of mechanism which he also taught at the Royal School of Mines in London In the field of science he was an experimentalist inventor and educational innovator Meanwhile in his spare time he pursued his passion pioneering the serious study of architectural history Initially his work was aimed at architects his role in providing an intellectual underpinning to the contemporary Gothic Revival was acknowledged by the award of the gold medal of the Royal Institute of British Architects in 1862 However his main contribution was more historical Starting with Canterbury in 1844 over the course of his career he investigated almost every English cathedral and developed an approach combining documentary and archaeological research which remains in use today His studies culminated in the monumental *Architectural History* of the University of Cambridge still the definitive account of its subject In this fascinating and lavishly illustrated intellectual biography drawn from extensive archival and architectural research the author sheds new light on the interconnections between Willis s varied fields of interest and his fundamental role in the

creation of a discipline ALEXANDRINA BUCHANAN is both an architectural historian and an archivist her introduction to archives came through cataloguing the papers of Robert Willis at the Cambridge University Library She is now Lecturer in Archive Studies at the University of Liverpool **Democracy, Intelligent Design, and Evolution** Susan P.

Liebell, 2013-09-05 Should alternatives to evolution be taught in American public schools or rejected as an establishment of religion Democracy Intelligent Design and Evolution argues that accurate science education helps shape a democratic temperament Rather than defending against Intelligent Design as religion citizens should defend science education as crucial to three aspects of the democratic person political citizenship economic fitness and moral choice Through an examination of *Tammy Kitzmiller et al v Dover Area School District* contemporary political theory and foundational American texts this volume provides an alternative jurisprudence and political vocabulary urging American liberalism to embrace science for citizenship **Socinianism And Arminianism** Martin Mulsow, Jan Rohls, 2005 This volume studies Socinianism in its

relationship to liberal currents in reformed Protestantism namely Dutch Remonstrants English Latitudinarians and parts of the French Huguenots What effects did its transition from Poland to the modernized intellectual milieu in the Netherlands and England have **Between the Pigeonholes** Alison Falby, 2020-12-15 Aldous Huxley described Gerald Heard as that rare being a learned man who made his mental home on the vacant spaces between the pigeonholes Heard's off beat interests made him a cultural and intellectual pioneer on both sides of the Atlantic in the middle decades of the twentieth century Despite accolades from such figures as E M Forster who characterized him as one of the most penetrating minds in England and Christopher Isherwood who described him upon his death as one of the few great magic mythmakers and revealers of life's wonder Heard is largely unknown today *Between the Pigeonholes* is the first published full length study of Gerald Heard Alison Falby examines Heard's ideas and contexts in interwar Britain and postwar America demonstrating his significance in several important twentieth century movements These movements include popular science and psychology psychical research Eastern spirituality pacifism cooperativism and Californian counter culture All of Heard's involvements expressed his desire to convey religious ideas in the modern languages of biological social and physical science Falby also traces Heard's shifting political leanings from left liberal in the early 1930s to libertarian in the early 1960s She finds that his modernist theological approach conventionally associated with liberal religion and politics provided spiritual fodder for those on both the Left and the Right Isherwood and W H Auden on the one hand and Clare Boothe Luce and *Spiritual Mobilization* on the other Using Heard as a prism through which to examine popular ideas Falby shows that the twentieth century contained much political and religious heterogeneity This heterogeneity illustrates the diverse and overlapping roots of both liberal religion and conservative politics in the twenty first century **The Power of Knowledge** Jeremy Black, 2014-01-14 A thought provoking analysis of how the acquisition and utilization of information has determined the course of history over the past five centuries and shaped the world as we know it today *Defending Sin* Hans Madueme, 2024-05-28 The

conflict between the natural sciences and Christian theology has been going on for centuries Recent advances in the fields of evolutionary biology behavioral genetics and neuroscience have intensified this conflict particularly in relation to origins the fall and sin These debates are crucial to our understanding of human sinfulness and necessarily involve the doctrine of salvation Theistic evolutionists have labored hard to resolve these tensions between science and faith but Hans Madueme argues that the majority of their proposals do injustice both to biblical teaching and to long standing doctrines held by the mainstream Christian tradition In this major contribution to the field of science and religion Madueme demonstrates that the classical notion of sin reflected in Scripture the creeds and tradition offers the most compelling and theologically coherent account of the human condition He answers pressing challenges from the physical sciences on both methodological and substantive levels Scholars pastors students and interested lay readers will profit from interacting with the arguments presented here

**Rethinking Order** Nancy Cartwright, Keith Ward, 2016-06-30 This book presents a radical new picture of natural order The Newtonian idea of a cosmos ruled by universal and exceptionless laws has been superseded replaced by a conception of nature as a realm of diverse powers potencies and dispositions a dappled world There is order in nature but it is more local diverse piecemeal open and emergent than Newton imagined In each chapter expert authors expound the historical context of the idea of laws of nature and explore the diverse sorts of order actually presupposed by work in physics biology and the social sciences They consider how human freedom might be understood and explore how Newton's idea of a universal designer might be revised in this new context They argue that there is not one unified totalizing program of science aiming at the completion of one closed causal system We live in an ordered universe but we need to rethink the classical idea of the laws of nature in a more dynamic and creatively diverse way *History of Technology Volume 29* Ian

Inkster, 2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather educated gents practitioners instrument makers craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental commercial and cognitive resources required to pursue innovative production projects *It Takes Two to Do Science* Henri Eisendrath, 2009 The editors hope that this book will serve as a catalyst for young scientists to understand the importance of teamwork and to enjoy its benefits Book Jacket
