Teaching Science in Elementary and Middle School Cory A. Buxton, Eugene F. Provenzo, 2007-02-26 I believe the experiments in this text can be well integrated into any science education course and help create an environment of exploration Willis Walter Jr Florida AM University This textbook should be a companion of all elementary and middle school pre service and in service teachers who are interested in educating students of different abilities and backgrounds Benjamin C Ngwudike Jackson State University Science is almost always thought of as a solitary content area practiced by lone practitioners in isolated laboratories The reality is that science is highly dependent upon culture and history This textbook meaningfully presents these relationships in a fashion accessible to college level teacher candidates Claudia A Balach Slippery Rock University of Pennsylvania Teaching Science in Elementary and Middle School A Cognitive and Cultural Approach is an introductory science curriculum and methods textbook for pre service teachers in primary and middle schools The primary purpose of the book is to provide an introduction to the teaching of science with an emphasis on guiding the pre service teacher toward conceptual understanding of core standards based science content from the four major scientific disciplines application of scientific methods and processes of inquiry to the learning of these science concepts development of scientific language that is both expressive and constitutive in the formation of scientific reasoning the ability to guide learners through numerous core scientific experiments that help to illuminate items 1 3 evaluation of social and cultural factors that shape and influence both science and science education analysis of the local context in which science must be understood as well as the global context synthesis of science as interrelated with other aspects of the world and how this idea can be taught to students through integrated and thematic instruction The approach throughout is clear

and practical and is designed to foster reflective teaching rooted in research and theory Teaching Science in Elementary and Middle School A Cognitive and Cultural Approach is a synthesis of current knowledge in science education cognition and culture The authors provide a text that fosters the development of teachers who feel prepared to engage their students in rich science learning experiences Science for All Children National Science Resources Center (U.S.),1997-01-06 This easy to read and practical book shows how to bring about the changes recommended in the National Science Education Standards It provides tools that are needed when putting into practice inquiry based science in any school district

The Future of Science in Elementary Schools Senta A. Raizen,Arie M. Michelsohn,1994-02-09 Scientific literacy depends upon children s early engagement in science It is in the elementary school years that teachers have an opportunity to cultivate and nourish their students innate curiosity about the world Well taught science classes help give students the skills

to investigate problems logically and systematically and make informed decisions based on evidence skills that can serve young people the rest of their lives Unfortunately many teachers are ill prepared to teach these classes Drawing on the knowledge and experience of a panel of leaders in elementary education and in science education and the results of a survey of 142 teacher education programs editors Senta A Raizen and Arie M Michelson offer a new vision for preparing prospective teachers of grades K through six in science content and pedagogy a vision that will transform teachers from people who merely pass on someone else s knowledge to creative facilitators of children s learning through involvement in the process of science investigation The authors include a three part interchangeable model for preparing teachers in science and they outline the basics of what prospective elementary school teachers need to learn in science courses and in science pedagogy courses including fundamental underlying concepts habits of mind and effective instructional strategies The recommended courses and programs will arm teachers with powerful tools necessary for a true understanding of science learning in children
