Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading It sets
the educational issues firmly in the context of the social cultural and political dynamics that inform and animate them and
give them their meaning It does so by setting out to understand their historical and comparative dimensions Establishing the
historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar The
comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world
More than this however this collection takes us into the realm of international influences It underlines how debates in this
area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the
broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and
homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle
preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up
and taken seriously in different localities or even more broadly Most of all it enables us to enrich and broaden our
understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This
collection of articles by leading scholars based in several different countries will be a significant contribution to the research
field but also a major resource when put to good use by policy makers and practitioners as it should surely be *Life, Earth*
