God and the Cosmos Harry Lee Poe, Jimmy H. Davis, 2012-02-16 Theologian

Harry Lee Poe and chemist Jimmy H Davis argue that God's interaction with our world is a possibility affirmed equally by the Bible and the contemporary scientific record. Rather than confirming that the cosmos is closed to the actions of the divine, advancing scientific knowledge seems to indicate that the nature of the universe is actually open to the unique type of divine activity portrayed in the Bible.

Circles and the Cross Loren Wilkinson, 2023-08-21

Circles and the Cross is an invitation to explore two mysteries. One is the miracle of the cosmos: why is there something and not nothing? The other is the miracle of consciousness: why should this collection of stardust be an I and not just an it? Our basic response to those mysteries is wonder, and from wonder have grown the three great trees of human culture: religion, art, and science. This exploration is undertaken in the light of a third mystery: the cross of Christ is the clearest picture we have of the triune Creator of both cosmos and consciousness. That self-emptying of the Creator out of love for the creation helps us understand the pleasures, paradoxes, and pains of science; it helps us understand how evolution can be another name for creation; it casts light on the Enlightenment and Romanticism. In particular, it illuminates the environmental movement, an ethic in search of a religion.

Loren Wilkinson, drawing on fifty years of teaching and writing about our relationship to creation, invites you to join this journey into understanding how the cross of Christ sheds light on the mysteries that surround us and gives us hope in a difficult age.

A Physicist Examines Hope in the Resurrection John F. Wilson, 2016-12-22

John Polkinghorne, ordained member of the Royal Society, past President of Queen's College, Cambridge, Knight Commander of the Order of the British Empire, 2002 Templeton Prize winner, theoretical physicist and theologian, writes in breathless style to unfold core Christian doctrine in dialogue with science. His work deftly addresses how one would interpret and commend Christian faith in the contemporary world as he elucidates the key topics in the dialogue of religion with science. Polkinghorne's work addresses the hope Christians have present and future in the faithfulness of a loving God who stands alongside them today and for all eternity. Eschatological hope enables and empowers Christian life and emerges in God's resurrection of Jesus from the horrific crucifixion. Polkinghorne ably supports his thesis with a strong argument for the resurrection built on the kenotic acts of God. His thesis sees Christian eschatology as the advent of hope, the heart of faith. In Christian eschatology, as argued by Polkinghorne and supported in the work of Jürgen Moltmann and Nicholas T. Wright, Christ's presence is not some far-off event but present reality.
