On semiotics in language education

Abstract: This paper examines the progenitors of the semiotic concepts in current Second Language Acquisition (SLA) theory as well as some concepts that could further inform recent trends in SLA theory and practice. Through the connections between recent ecology models of language learning (e.g., Kramsch 2002, 2006, 2010) or an “ecological-semiotic perspective” (e.g., van Lier 2002, 2004) and fundamental concepts in semiotic theory such as the *signifying order* (Danesi), *multimodality*, (Kress), *modeling systems theory* (Sebeok), and *Umwelt theory* (von Uexküll), this paper also considers a recent draft of an ACTFL position statement on the *Use of the Target Language in the Classroom*.

Keywords: semiotic theory and SLA; L1 use; signifying order; symbolic competence; multimodality; semiotic modeling

1 Introduction

Language education in America has drawn its theoretical influences predominantly from the fields of linguistics and psychology. In 2000, Marcel Danesi lamented in his book *Semiotics in Language Education* that, until then, “[the] semiotic view of language as a representational device interconnected with other representational devices has not as yet penetrated the mindset of Second Language Acquisition researchers” (Danesi 2000: 22). Danesi pointed out that

[the] attractive aspect of semiotic inquiry is that it is geared towards investigating the premise that all knowledge is interconnected with representation. Signs are employed by human beings across cultures to represent and classify the world. The result is that knowledge structures the world over, no matter how seemingly diverse they might appear, are assembled with the same basic signifying properties. (Danesi 2000: 167)

In the meantime, a significant shift in SLA theory has taken place towards “ecological-semiotic approaches (e.g., Van Lier 2004) without direct reference to

Semiotics In Language Education:

Semiotics in Language Education Marcel Danesi, 2012-10-25 Semiotics has had a profound impact on our comprehension of a wide range of phenomena from how animals signify and communicate to how people read TV commercials This series features books on semiotic theory and applications of that theory to understanding media language and related subjects The series publishes scholarly monographs of wide appeal to students and interested non specialists as well as scholars AAS is a peer reviewed series of international scope *The Ecology and Semiotics of Language Learning* Leo van Lier, 2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time Language as Social Semiotic Michael Alexander Kirkwood Halliday, 1978 This volume assembles Professor Halliday's most important recent essays on the functions of language in social communication The investigation of language as social semiotic means interpreting language within a sociocultural context in which the culture itself is interpreted in semiotic terms as an information system to put it another way The notion of language as one resource albeit a principal one in the exchange of meanings which constitute a culture requires a focus on language from the outside inwards interpreting language by reference to its place in the social process Professor Halliday's interest in linguistic questions is ultimately an applied one a concern with language in relation to the process and experience of socialization and education The sociolinguistic patterns of the community the language of family neighbourhood and school and the personal experience of language from earliest infancy are among the most fundamental elements in a child's environment for learning This emphasis is directly reflected in the last part of this volume on sociolinguistics and education but it is indirectly present throughout in discussion of areas ranging from the theoretical perspective and the sociosemantic nature of discourse to language in urban society and antilanguages Publisher **Semiotics in Language Education** Director of the Program in Semiotics and Communication Theory Marcel Danesi, PH.D., Marcel Danesi, 2000 **Semiotics and Second-language**

Pedagogy James White Brown,1991 Semiotics has had an enormous impact on interdisciplinary studies over the past twenty years yet in spite of its methodological and practical influences on literary criticism art architecture and music to name but a few areas no full length study of its applications to second language education has appeared to date Semiotics and Second Language Pedagogy presents a coherent synthesis of semiotics and second language pedagogical concepts In addition to a speculative part it has an applied part where theoretical insights are made explicit and shown to operate in actual teaching
