**Alfred Jules Ayer**

## **Sensedata And Perception Ge Moore And Aj Ayer:**

*The Metaphysics of G. E. Moore* David O'Connor,2012-12-06 In this book setting aside his consideration of specifically ethical topics I try to provide a comprehensive interpretation of Moore s thought Against the background of this general interpretation I examine in detail his work on some of the central problems of metaphysics and because Moore s being able to sustain a consistent anti skepticism is essential to the survival of the base from which he works on those problems of epistemology too The interpretation of which I speak involves my taking as the centerpiece of Moore s philosophical work his book *Some Main Problems of Philosophy* written in 1910 as the text of a lecture series but left unpublished for over forty years thereafter That book is aptly titled for the issues with which Moore deals in it are indeed among the main problems of philosophy Not least of these are the problems of formulating a general categorial deSCription of the world and then of defending that formulation However while I will discuss Moore s work in light of its contribution to this project of taking metaphysical inventory it is important to note that he in common with many other major figures in contemporary analytical philosophy did not approach specific philosophical puzzles with a view to possibly integrating solutions to them into a comprehensive theory about reality as a whole that is into what might be called a metaphysical system **Merleau-Ponty**

**and Contemporary Philosophy of Perception** Peter Antich,2023-08-04 This book draws on Merleau Ponty s phenomenology to develop new and promising solutions to contemporary debates about perception In providing an extension and defense of Merleau Ponty s account of perceptual content and of the relation between perception and the world it demonstrates the value of Merleau Ponty s insights for philosophy of perception today The author focuses on two main topics the contents and the nature of perception In the first half of this book the author tackles debates about the content of perception namely what sorts of properties or features of the world reveal themselves to us in perception and in what modes Drawing on Merleau Ponty s description of perceptual sense the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content including whether we can perceive moral properties In the second half he turns to the nature of perception Here he argues that Merleau Ponty s account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question realism and intentionalism The author shows how this combination can be developed defends it from objections and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations *Merleau Ponty and Contemporary Philosophy of Perception* will appeal to scholars and advanced students working on phenomenology and the philosophy of perception *Berkeley's analysis of perception* George J. Stack,2011-12-07 No detailed description available for Berkeley s analysis of perception *Sensation and Perception* D. W. Hamlyn,2022-09-01 First published in 1961 *Sensation and Perception* aims to cast light upon the nature of perception itself This the author believes can be achieved only through an

understanding of the concepts of sensation and perception A survey of the principal attempts to arrive at such an understanding brings out the fact that perception has most often been assimilated to sensation or judgment The author believes that both of these views are wrong but that an attention to the history of thought can provide an explanation of the temptation to accept them A final chapter gives the author s own views on the nature of sensation and perception As such it would be of interest both to philosophers and to those psychologists who are concerned with the nature of perception

George Pitcher, 2015-03-08 Presented here in a lucid simple style is an extended defense of a behavioral and direct realist theory of sense perception Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905     *Russell's Theory of Perception* Sajahan Miah, 2006-05-30 In Russell's Theory of Perception Sajahan Miah re-examines and evaluates the development of Russell's concept of perception and the relation of perception to our knowledge of the external world With the introduction of logical construction in which physical objects are constructed from actual and possible sense data Russell's theory of perception seems to become a causal theory with phenomenalist overtones The book argues that there is a consistency of purpose and direction which motivated Russell to introduce logical construction The purpose was to strike a compromise between his empiricism and his realism and to establish a bridge between the objects of perception and the objects of physics and common sense     *A. J. Ayer: Memorial Essays* Alfred Jules Ayer, 1991 A J Ayer who died in 1989 was acknowledged as one of Britain's most distinguished philosophers In this memorial collection of essays leading Western philosophers reflect on Ayer's place in the history of philosophy and explore aspects of his thought and teaching The volume also includes a posthumous essay by Ayer himself A Defence of Empiricism These essays are undoubtedly a fitting tribute to a major figure but the collection is not simply retrospective rather it looks forward to present and future developments in philosophical thought that Ayer's work has stimulated     **The Routledge Dictionary of Philosophy** Michael Proudfoot, A.R. Lacey, 2009-12-04 A dictionary of philosophy that includes a guide to philosophy online     **Perception** Frank Jackson, 1977-05-05 What is the nature of and what is the relationship between external objects and our visual perceptual experience of them In this book Frank Jackson defends the answers provided by the traditional Representative theory of perception He argues among other things that we are never immediately aware of external objects that they are the causes of our perceptual experiences and that they have only the primary qualities In the course of the argument sense data and the distinction between mediate and immediate perception receive detailed defences and the author criticises attempts to reduce perceiving the believing and to show that the Representative theory makes the external world unknowable Jackson recognises that his views are unfashionable but argues in detail that they are to be preferred to their currently favoured competitors It will become an obvious point of reference for all future work on the philosophy of perception     *Spectator in the Cartesian Theater* Peter Slezak, 2023-08-01 The Cartesian Theater is Dennett's famous metaphor for the idea that a homunculus or little man watches the screen on which our thoughts appear However contrary to much academic teaching and scholarship Spectator in the Cartesian Theater Where Theories of Mind Went Wrong since Descartes shows that

Descartes was not guilty of this fallacy for which he has been blamed. In his physiological writings neglected by philosophers, Descartes explained that the pseudo explanation arises not from what is included in our theory of consciousness but rather from what is missing. We fail to notice that the theory is incomplete because we are intuitively doing part of the explanatory work. That is, we are the spectators in the Cartesian Theater. With detailed critiques, Peter Slezak shows that Searle's Chinese Room Argument, Kripke's theory of proper names, Davidson's semantics of natural language, and Kosslyn's theory of visual imagery rely on what is intuitively meaningful to us rather than what follows from the theory. Slezak offers a novel solution to the elusive logic of the Cogito argument, showing it to be akin to the Liar Paradox. Since Descartes' perplexity is our own, this shows how the subjective certainty of consciousness and the mind-body problem can arise for a physical system. An intelligent computer would think that it isn't one.

*The Epistemology of the Cyrenaic School* Voula Tsouna, 1998-12-10. The Cyrenaic school was a fourth-century BC philosophical movement related both to the Socratic tradition and to Greek Scepticism. In ethics, Cyrenaic hedonism can be seen as one of many attempts made by the associates of Socrates and their followers to endorse his ethical outlook and to explore the implications of his method. In epistemology, there are close philosophical links between the Cyrenaics and the Sceptics, both Pyrrhonists and Academics. There are further links with modern philosophy as well, for the Cyrenaics introduced a form of subjectivism which in some ways preannounces Cartesian views endorsed by Malebranche and Hume and developed by Kant. This 1998 book reconstructs Cyrenaic epistemology, explains how it depends on Cyrenaic hedonism, locates it in the context of ancient debates, and discusses its connections with modern and contemporary epistemological positions.

Philosophy - Basic Notions, Volume 2 Nicolae Sfetcu, 1900. A basic introduction to the world of philosophy with answers to the deepest questions we all ask ourselves through the lens of the world's greatest philosophers, from Plato and Confucius to modern thinkers. A guide to the fundamental nature of existence, society, and the way we think. After an overview of philosophy with the history of philosophy, branches of philosophy, philosophical concepts, and philosophical schools and traditions, specific topics in philosophy are addressed, such as God, religion, good and evil, ethics, animal rights, politics, political philosophy, appearance and reality, science, philosophy of science, mind, philosophy of mind, and art, aesthetics. Philosophy is the study of general and fundamental problems concerning such matters as existence, knowledge, values, reason, mind, and language. Philosophical methods include questioning, critical discussion, rational argument, and systematic presentation. Classical philosophical questions include both abstract questions: Is it possible to know something and prove it? What is most real? and more practical and concrete questions: Is there an optimal way to live? Is it better to be just or unjust? Do people have free will? Philosophy is distinguished from other ways of approaching these problems by its critical, generally systematic approach and reliance on rational arguments. Other investigations are closely related to art, science, politics, or other pursuits. For example, is beauty objective or subjective? Are there many scientific methods or just one? Is political utopia a hopeful dream or hopeless fantasy? The main sub-fields of academic philosophy include metaphysics,

concerned with the fundamental nature of reality and being epistemology about the nature and foundations of knowledge and its limits and validity ethics aesthetics political philosophy logic philosophy of science and the history of Western philosophy Many philosophical debates that began in antiquity are still debated today
