## **Sensory Changes In The Elderly:**

*Changes in Sensory Motor Behavior in Aging* A.-M. Ferrandez, N. Teasdale, 1995-12-11 Recently studies on aging processes and age related changes in behavior have been expanding considerably probably due to the dramatic changes observed in the demographics This increase in the overall age and proportion of elderly people has heightened the severity of problems associated with the safety and well being of elderly persons in everyday life Many researchers working on motor control have thus focused more intensely on the effects of age on motor control This new avenue of research has led to programs for alleviating or delaying the specific sensory motor limitations encountered by the elderly e g falls in an attempt to make the elderly more autonomous The aggregation of studies from different perspectives is often fascinating especially when the same field can serve as a common ground between researchers Nearly all contributors to this book work on sensory motor aging they represent a large range of affiliations and backgrounds including psychology neurobiology cognitive sciences kinesiology neuropsychology neuropharmacology motor performance physical therapy exercise science and human development Addressing age related behavioral changes can also furnish some crucial reflections in the debate about motor coordination aging is the product of both maturational and environmental processes and studies on aging must determine how the intricate interrelationships between these processes evolve The study of aging makes it possible to determine how compensatory mechanisms operating on different subsystems and each aging at its own rate compensate for biological degenerations and changing external demands This volume will contribute to demonstrating that the study of the aging process raises important theoretical questions

**Sensory Changes in the Elderly** Francis B. Colavita, 1978 **Site Planning and Design for the Elderly** Diane Y. Carstens, 1993-02-15 Design for the elderly is at the forefront of architectural topics today Yet while much has been written about the design of indoor spaces little work has been done on planning outdoor spaces to accommodate the needs of the elderly Site Planning and Design for the Elderly specifically addresses this issue drawing from a large body of original research current knowledge and theory to provide the background knowledge and specific information necessary for informed decision making throughout the site planning and design process More than just a reference on accessibility standards this volume offers key insights into the needs and concerns of older people in the built environment and presents guidelines and alternatives for responsive site planning and design Organized in a clear step by step format for easy reference issues and specific guidelines are provided for each stage of the planning and design process within the context of housing for older people Moreover architects landscape architects urban designers developers and students will find the topics covered applicable to other settings where older people are a part of the user profile such as downtown renewal hospital and park planning projects Numerous illustrations and case studies highlight major points throughout the text The first sections of this volume provide valuable background information on housing options available to seniors and outline design implications of the social and physiological changes associated with advancing

age Critical design and management issues are discussed objectives are outlined and implementation strategies are developed including methods for promoting wayfinding enhancing personalization and maximizing opportunities for social interaction The body of this volume provides specific guidelines for each stage of development Site planning areas addressed include site selection the layout of housing units including relationships between facilities offering different levels of care recreational amenities and circulation systems Detailed guidelines for the location spatial configuration detailing and amenities of major site components and recreational facilities are also provided Entryways parking patios rooftop developments and gardening centers are among the specific areas covered A brief outline of the major issues affecting use of each site component is particularly useful for making decisions regarding facility provision and for prioritizing development alternatives Critical detailing and amenity specifications are pinpointed and thoroughly described Paving materials signage lighting site furniture and pedestrian street crossings are among those elements examined A concise overview in tabular form of the major guidelines presented throughout closes this practical volume It is possible to design a site that will not only enhance the lives of elderly residents but will be cost effective and highly marketable as well Site Planning and Design for the Elderly provides practical solutions to the problems of exterior design for one of the fastest growing segments of the U S population today

**Experimental Psychology, Cognition, and Human Aging** Donald H. Kausler, 2012-12-06 This book is a major revision and extension of my earlier book *Experimental Psychology and Human Aging* which appeared in 1982 The intervening years have seen a remarkable expansion of psychological research on human aging especially on topics dealing with cognition They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research As my lecture notes for my course in the psychology of aging grew so did my apprehension regarding the task ahead of me in revising the first edition The research explosion in cognitive aging forced several major changes in content from the first to the second edition Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition Similarly the single prior chapter on perception and attention became two chapters as did the single prior chapter on thinking Another change from the first edition is in the addition of some review of the effects of abnormal aging on various cognitive processes particularly in regard to memory functioning To keep the revision within reasonable length some sacrifices had to be made The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter However the major topics from the first edition were retained and in fact added to by the inclusion of important topics and issues that emerged over the past eight years *Clinical Neurology of Aging* Martin Albert, MD, PhD, FAAN, Janice Knoefel, MD, MPH, 2011-01-11 Aging does not automatically imply decline Many older people find joy in their friendships and their willingness to look at the world with a calmer view than they may have had in youth This book clinically focused is designed to help clinicians help older persons maintain that joy *Sensorimotor Impairment in the Elderly* George E. Stelmach, Volker Hömberg, 2012-12-06 Proceedings of the NATO Advanced Research Workshop Bad Windsheim Germany September 11-13 1992 *Brain Mechanisms and Psychotropic Drugs* Andrius Baskys, Gary Remington, 1996-03-14 Written by recognized experts in their fields *Brain Mechanisms and Psychotropic Drugs* integrates clinical psychopharmacology with basic neuroscience and offers the latest in treatment approaches for major psychiatric

disorders The text is divided into three major sections The first two sections focus on basic neuroscience covering fundamental concepts such as ion channels synapses second messenger mechanisms and the aging brain The second section contains chapters on serotonin dopamine acetylcholine GABA glutamate and peptides The final section is clinically oriented and discusses major psychotropic drug classes antidepressants neuroleptics mood stabilizers benzodiazepines and cognition enhancing drugs This is a must have volume for all those involved in the clinical use of psychotropic medications from medical students to practitioners and researchers
