Sensory Quality in Foods and Beverages Anthony A. Williams, R. K. Atkin, 1983 **Sensory Quality in Foods and Beverages**, 1983 *Instrumental Assessment of Food Sensory Quality* David Kilcast, 2013-09-30

Instrumental measurements of the sensory quality of food and drink are of growing importance in both complementing data provided by sensory panels and in providing valuable data in situations in which the use of human subjects is not feasible. Instrumental assessment of food sensory quality reviews the range and use of instrumental methods for measuring sensory quality. After an introductory chapter, part one goes on to explore the principles and practice of the assessment and analysis of food appearance, flavour, texture and viscosity. Part two reviews advances in methods for instrumental assessment of food sensory quality and includes chapters on food colour measurement using computer vision, gas chromatography, olfactometry, GC/O, electronic noses and tongues for in vivo food flavour measurement and non-destructive methods for food texture assessment. Further chapters highlight in-mouth measurement of food quality and emerging flavour analysis methods for food authentication. Finally, chapters in part three focus on the instrumental assessment of the sensory quality of particular foods and beverages, including meat, poultry and fish, baked goods, dry crisp products, dairy products and fruit and vegetables. The instrumental assessment of the sensory quality of wine, beer and juices is also discussed.

Instrumental assessment of food sensory quality is a comprehensive technical resource for quality managers and research and development personnel in the food industry and researchers in academia interested in instrumental food quality measurement. It reviews the range and use of instrumental methods for measuring sensory quality. It explores the principles and practice of the assessment and analysis of food appearance, flavour, texture and viscosity. It reviews advances in methods for instrumental assessment of food sensory quality.

Sensory Evaluation of Food Hildegarde Heymann, Harry T. Lawless, 2013-11-08

The field of sensory evaluation has matured in the last half century to become a recognized discipline in the food and consumer sciences and an important part of the foods and consumer products industries. Sensory professionals enjoy widespread recognition for the important services they provide in new product development, basic research, ingredient and process modification, cost reduction, quality maintenance and product optimization. These services enhance the informational support for management decisions, lowering the risk that accompanies the decision-making process. From the consumers' perspective, a sensory testing program in a food or consumer products company helps ensure that products reach the market with not only good concepts but also with desirable sensory attributes that meet their expectations. Sensory professionals have advanced well beyond the stage when they were simply called on to execute taste tests and to provide statistical summaries of results. They are now frequently asked to participate in the decision process itself to draw reasoned conclusions based on data and to make recommendations. They are also expected to be well-versed in an increasingly sophisticated battery of test methods and statistical procedures, including multivariate analyses. As always, sensory professionals also need to understand people for

people are the measuring instruments that provide the basic sensory data People are notoriously variable and difficult to calibrate presenting the sensory specialist with many additional measurement problems that are not present in instrumental methods **Methods of Analysis of Food Components and Additives** Semih Otles,2011-11-16 With diet health and food safety news making headlines on a regular basis the ability to separate identify and analyze the nutrients additives and toxicological compounds found in food and food components is more important than ever This requires proper training in the application of best methods as well as efforts to improve existing methods Instrumentation and Sensors for the Food Industry E Kress-Rogers,C J B Brimelow,2001-10-03 The first edition of this book quickly established itself as the standard reference in its field and the second edition consolidates this reputation Keeping up with the rapid change in this area there are 16 new contributors and 8 completely new chapters as well as major revisions to existing chapters making this second edition a substantially longer book Instrumentation and sensors for the food industry 2nd edition begins with two introductory chapters to set the scene part one covers in line measurement of food processing operations including colour measurement the measurement of food composition by a range of techniques and the measurement of pressure temperature level flow and viscosity Part two reviews instrumental techniques in the quality control laboratory including the measurement of rheological properties texture water and microbiological activity Part three has five chapters devoted to the increasingly widespread use of electronic noses chemosensors biosensors immunosensors and DNA probes Comprehensively revised and expanded edition of a standard work in its field Authoritative and practical guide to the range of instrumentation and sensors available Written by a distinguished international panel of experts
