Political Globalization James A. Yunker, 2007-08-05 According to conventional opinion world government would be undesirable because it might develop into global tyranny as well as almost certainly entailing bureaucratic overload This work vigorously contests this conventional opinion on the basis of an innovative plan for a limited world government tentatively designated the Federal Union of Democratic Nations Although the proposed federation would represent a quantum advance beyond the United Nations of today it would at the same time operate under some key restraints such as the reserved right of member nations to withdraw from the Federal Union at their own unilateral discretion Yunker argues that despite these restraints the Union would make a valuable contribution to the future security and prosperity of human civilization He makes a compelling case that political globalization could and should complement the ongoing economic and cultural globalization of the contemporary era Visionary yet pragmatic this book represents the most up to date comprehensive and sophisticated advocacy of world government to be found in world federalist literature Although Political Globalization is most directly aimed at international relations specialists and policy makers it will also be highly illuminating and thought provoking to all those with a serious interest in humanity s long term future

Regional Economic Analysis of Power, Elections, and Secession Moriki Hosoe, 2018-01-30 The main object of this book is to explain some of the mechanisms of integration and secession among regions from the point of view of game theory To attain this goal the incentives of regions in a country to unite or to secede and the conditions in the way for the member countries of a federation to leave peacefully are examined Tensions over

secession have become more and more serious including separatist tensions in China India Iraq Myanmar and Sri Lanka Studies included in this book stress differing preferences in the type of policy in each region and the influence of a third region on the power of secession Decentralization strategies of tax subsidy policy and governance policy in a political or economic group composed of two regions are shown to be important as a way to avoid wasteful conflict for the secession incentive of a minority region How those incentives depend on heterogeneity costs associated with different preferences over the type of region and the relative size of the two regions is shown Also provided is an analytical framework in which secessions are the equilibrium outcome of explicit civil conflict where regions with different preferences invest in costly conflict activities Finally an empirical analysis is made of determinant factors of secession movements in many regions to verify the validity of our theories of secession This book is recommended to researchers who are interested in a new economic geography and an interdisciplinary approach for regional economics *The Paralysis of Analysis in African American Studies* Stephen Ferguson II, 2023-09-21 Stephen C Ferguson II provides a philosophical examination of Black popular culture for the first time From extensive discussion of the philosophy and political economy of Hip Hop music through to a developed exploration of the influence of the postmodernism poststructuralist ideology on African American studies he argues how postmodernism ideology plays a seminal role in justifying the relationship between corporate capitalism and Black popular culture Chapters cover topics such as cultural populism capitalism and Black liberation the philosophy of Hip Hop music and Harold Cruse's influence on the cultural turn in African American studies Ferguson combines case studies of past and contemporary Black cultural and intellectual productions with a Marxist ideological critique to provide a cutting edge reflection on the economic structure in which Black popular culture emerged He highlights the contradictions that are central to the juxtaposition of Black cultural artists as political participants in socioeconomic struggle and the political participants who perform the rigorous task of social criticism Adopting capitalism as an explanatory framework Ferguson investigates the relationship between postmodernism as social theory current manifestations of Black popular culture and the theoretical work of Black thinkers and scholars to demonstrate how African American studies have been shaped *Pattern and Repertoire in History* Bertrand M. ROEHNER, Tony Syme, Bertrand M Roehner, 2009-06-30 The aim of this book is to analyze clusters of similar elementary occurrences that serve as the building blocks of more global events Making connections between seemingly unrelated case studies Roehner and Syme apply scientific methodology to the analysis of history Their book identifies the recurring patterns of behavior that shape the histories of different countries separated by vast stretches of time and space Taking advantage of a broad wealth of historical evidence the authors decipher what may be seen as a kind of genetic code of history *The Dynamic of Secession* Viva Ona Bartkus, 1999-06-28 This book first published in 1999 offers an explanation for the occurrence of secessionist conflict based on a comparative study of numerous historical examples **The British National Bibliography** Arthur James Wells, 2003 Reader's Guide to

Women's Studies Eleanor Amico,1998-03-20 The Reader's Guide to Women's Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women's studies. Some 200 scholars have contributed to the project which adopts a multi-layered approach allowing for comprehensive treatment of its subject matter. Entries range from very broad themes such as Health General Works to entries on specific individuals or more focused topics such as Doctors.

Flashpoints in the War on Terrorism Derek S. Reveron, Jeffrey Stevenson Murer,2013-05-13 This volume offers a comprehensive overview of international political violence by bringing together foreign policy experts on several regions who examine conflicts in the Fertile Crescent the Balkans the Post Soviet Region the Himalayas Southeast Asia and sub-Saharan Africa. With cogent assessments of civil conflicts that threaten to be part of a global jihad each chapter both dissects the historical roots and socio-economic causes that catalyze terrorism in those areas as well as posits ways for the United States to meet the myriad of foreign policy challenges posed by the growing threat of contemporary international terrorism.

Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis Alaverdov, Emilia, Bari, Muhammad Waseem,2023-02-17 Migration is not a new phenomenon it has a centuries long history since the world's population has been characterized by the desire to relocate not only from one country to another but from one continent to another as well. However there is a significant difference between the migrations of the past and the current one. Today's migration is complicated by the strong emotional reaction and hostile attitude from society. The study of migration processes needs interdisciplinary approaches. The Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis presents emerging research and case studies on global migration in the modern world. Through interdisciplinary approaches it further showcases the current challenges and approaches in regulation. Covering topics such as forced migration human trafficking and national identity this major reference work is an excellent resource for migration specialists government officials politicians sociologists economists students and educators of higher education researchers and academicians.

Econophysics and Data Driven Modelling of Market Dynamics Frédéric Abergel, Hideaki Aoyama, Bikas K. Chakrabarti, Anirban Chakraborti, Asim Ghosh,2015-01-27 This book presents the works and research findings of physicists economists mathematicians statisticians and financial engineers who have undertaken data driven modelling of market dynamics and other empirical studies in the field of Econophysics. During recent decades the financial market landscape has changed dramatically with the deregulation of markets and the growing complexity of products. The ever increasing speed and decreasing costs of computational power and networks have led to the emergence of huge databases. The availability of these data should permit the development of models that are better founded empirically and econophysicists have accordingly been advocating that one should rely primarily on the empirical observations in order to construct models and

validate them The recent turmoil in financial markets and the 2008 crash appear to offer a strong rationale for new models and approaches The Econophysics community accordingly has an important future role to play in market modelling The Econophys Kolkata VIII conference proceedings are devoted to the presentation of many such modelling efforts and address recent developments A number of leading researchers from across the globe report on their recent work comment on the latest issues and review the contemporary literature **The Terrorist Threat from Thailand** Rohan Gunaratna,Arabinda Acharya,2013 The first book to thoroughly examine the terrorist conflict in Thailand in the context of global jihad
