*London Docklands* Brian C. Edwards, 2013-10-22 *London Docklands Urban Design in an Age of Deregulation* discusses the process and products of the first 10 years of the London Docklands. The book is comprised of 10 chapters that are organized into three parts. The first part talks about the potentials of the London Docklands. The second part presents the area of studies which are the Isle of Dogs, Surrey Docks, Wapping, and the Royal Docks. The last part deals with the observations and speculations. The text will be a great source to urban planners, particularly those who are involved in projects that deal with cities that are in close proximity to large bodies of water. Architectural Possibilities in the Work of Eisenman Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings, revealing underlying characteristics and arguing for their productive continuity and transformative role. The book explores Eisenman's approach to architectural form generation and thinking. It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s. Following an introductory chapter addressing the theme of potentialities, the book is organised in two parts. The first part focuses on key period writings of Eisenman, framing the close reading around a practice of resistance, the architect's approach to history as analysis, and the transformative conceptualisation of time. In the second part, the book undertakes an analysis of select projects from the 1980s and 1990s. Three formal preoccupations and conceptual orientations ground manipulations, figuration, and spatial events. This part of the book previously unpublished material from the Peter Eisenman fonds, Canadian Centre for Architecture, Montreal, provides primary source material. A concluding chapter addresses Eisenman's teaching, its relation to his larger project, and possible legacies for educators, practitioners, scholars, and theorists.

**Intertwining:** Steven Holl, 1996-04 To his earlier articulated concept of anchoring, which connects a construction with the history of the ground, locale, and region, Holl adds the concept of intertwining, which is illuminated by sensory, perceptual, conceptual, and emotional experiences. Illustrates with drawings, plans, and photographs projects in Japan, Finland, Germany, Switzerland, Holland, Korea, and Norway. No index. Annotation copyright by Book News Inc, Portland, OR. **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl.** Avery Library, 1993. Lotus International, 2001. Many Urbanisms Martin J. Murray, 2022-02-15 Winner 2023 Choice Outstanding Academic Title. Now for the first time in history, the majority of the world's population lives in cities. But urbanization is accelerating in some places and slowing down in others. The sprawling megacities of Asia and Africa, as well as many other smaller and medium-sized cities throughout the Global South, are expected to continue growing. At the same time, older industrial cities in wealthier countries are experiencing protracted socioeconomic decline. Nonetheless, mainstream urban studies continues to treat a handful of superstar cities in Europe and North America as the exemplars of world urbanism, even though current global growth and development represent a dramatic break with past patterns. Martin J. Murray offers a groundbreaking guide to the multiplicity, heterogeneity, and

complexity of contemporary global urbanism He identifies and traces four distinct pathways that characterize cities today tourist entertainment cities with world class aspirations struggling postindustrial cities megacities experiencing hypergrowth and instant cities or master planned cities built from scratch Murray shows how these different types of cities respond to different pressures and logics rather than progressing through the stages of a predetermined linear path He highlights new spatial patterns of urbanization that have undermined conventional understandings of the city exploring the emergence of polycentric fragmented haphazard and unbounded metropolises Such cities he argues should not be seen as deviations from a norm but rather as alternatives within a constellation of urban possibility Innovative and wide ranging *Many Urbanisms* offers ways to understand the disparate forms of global cities today on their own terms *Avery Index to Architectural Periodicals* Avery Library,1997
