Kellert, Judith Heerwagen, Martin Mador, 2011-09-26 When nature inspires our architecture not just how it looks but how buildings and communities actually function we will have made great strides as a society Biophilic Design provides us with tremendous insight into the why then builds us a road map for what is sure to be the next great design journey of our times Rick Fedrizzi President CEO and Founding Chairman U S Green Building Council Having seen firsthand in my company the power of biomimicry to stimulate a wellspring of profitable innovation I can say unequivocally that biophilic design is the real deal Kellert Heerwagen and Mador have compiled the wisdom of world renowned experts to produce this exquisite book it is must reading for scientists philosophers engineers architects and designers and most especially businesspeople Anyone looking for the key to a new type of prosperity that respects the earth should start here Ray C Anderson founder and Chair Interface Inc The groundbreaking guide to the emerging practice of biophilic design This book offers a paradigm shift in how we design and build our buildings and our communities one that recognizes that the positive experience of natural systems and processes in our buildings and constructed landscapes is critical to human health performance and well being Biophilic design is about humanity's place in nature and the natural world's place in human society where mutuality respect and enriching relationships can and should exist at all levels and should emerge as the norm rather than the exception Written for architects landscape architects planners developers environmental designers as well as building owners Biophilic Design The Theory Science and Practice of Bringing Buildings to Life is a guide to the theory science and practice of biophilic design Twenty three original and timely essays by world renowned scientists designers and practitioners including Edward O Wilson Howard Frumkin David Orr Grant Hildebrand Stephen Kieran Tim Beatley Jonathan Rose Janine Benyus Roger Ulrich Bert Gregory Robert Berkebile William Browning and

Vivian Loftness among others address The basic concepts of biophilia its expression in the built environment and how biophilic design connects to human biology evolution and development The science and benefits of biophilic design on human health childhood development healthcare and more The practice of biophilic design how to implement biophilic design strategies to create buildings that connect people with nature and provide comfortable and productive places for people in which they can live work and study Biophilic design at any scale from buildings to cities begins with a few simple questions How does the built environment affect the natural environment How will nature affect human experience and aspiration Most of all how can we achieve sustained and reciprocal benefits between the two This prescient groundbreaking book provides the answers

Twentieth-century American Architecture Carter Wiseman,2000 Presents a survey of twentieth century American landmark buildings and their architects including Louis Sullivan Frank Lloyd Wright and Frank Gehry

The Meritocracy Trap Daniel Markovits,2019 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people
