Louis Isadore Kahn, 1977 Louis I. Kahn Klaus-Peter Gast, Louis I. Kahn, 1999 1999 is the twenty fifth anniversary of Louis
Kahn's death In the second half of the twentieth century Louis Kahn's designs took on enormous significance for international
architecture Kahn belonged to that generation of architects which perfected and simultaneously surpassed Modernism Most
of Kahn's projects were realised in the USA and several large projects were built in Asia From Kahn's early work to larger
projects such as the National Capital of Bangladesh in Dhaka and the Kimbell Art Museum in Fort Worth the documented
works all illustrate the human aspect in Kahn's work *Louis I. Kahn* Louis I. Kahn, Heinz Ronner, Sharad Jhaveri, Alessandro
Vasella, 1977 Louis I. Kahn Complete work 1935-74 RONNER, VASELLA, JHAVERI, 1976-01-01 This book owes its concept
to the transparency of the work process of Louis I Kahn whose ideas are preserved in the wealth of sketches and drawings
The Art Museums of Louis I. Kahn Patricia Cummings Loud, Louis I. Kahn, 1989 Complete works Klaus-Peter
Gast, Louis I. Kahn, 2001 Louis Kahn is considered to be one of the most outstanding architects of the 20th Century whose
impact can only be compared to that of Le Corbusier This book discusses Kahn's late modernist works including the Richards
Medical Building **Hugo Häring** Peter Blundell Jones, 1999 Peter Blundell Jones Professor of Architecture at the
University of Sheffield has long been concerned with the organic movement in architecture and has written extensively about
it including a substantial work on Hans Scharoun The present book is not just a biography of Häring but an unusually
detailed analysis of his architectural work including many unbuilt projects which have never before been published It also
includes an account of Häring's theory with translated extracts from his many writings Through setting Häring within his
historical context and differentiating his position from figures such as Mies Le Corbusier and Hannes Meyer Peter Blundell
Jones suggests a radical reframing of the early Modern Movement He was aided in the development of the book by Häring's
personal assistant in the late years Margot Aschenbrenner who was trained as a philosopher Jaquette **Louis I. Kahn -**
Exposed concrete and hollow stones Roberto Gargiani, 2014-07-09 Through sheer determination and courage Kahn has
researched the nature of concrete in the form of precast cast in place or blocks Each of his renowned works in exposed
concrete such as the Yale Art Gallery the Richards Laboratories the Bath House the Salk Institute the National Assembly the
Kimbell Museum the Exeter Library and the Yale Center for British Art is itself an important chapter in the history of
architecture for the exploration into concrete's formal expression beyond the lesson of Le Corbusier Kahn's obsession on
concrete fabrication processes on the formwork and the mix design is systematically examined in two volumes The authors
illustrate Kahn's vision with documents that have never been revealed in other essays drawing heavily from original sketches
plans specifications worksite photographs and correspondences with collaborators engineers technicians and contractors The

first volume *Exposed Concrete and Hollow Stones* focuses on the first ten year period of Kahn's research on concrete. Moving through the many construction systems experienced by Kahn from the discovery of exposed concrete in the form of *b ton brut* at the Yale Art Gallery to the precast and poured in place techniques to the values of joint growth and ornament the essay culminates in the reconstruction of the artistic and technical characteristics of two great worksite the Richards Laboratories and the First Unitarian Church and School. The second volume *Towards the Zero Degree of Concrete* covers the following fourteen years and leads the reader along Kahn's path to the true nature of concrete focusing on his main techniques and poetic discoveries such as the liquid stone of the Salk Institute the smooth finish at Bryn Mawr and the concept of monolithic at the Yale Center for British Art.

Louis I. Kahn's Trenton Jewish Community Center Susan G. Solomon, 2000. The Building Studies series examines important buildings through original documents detailed text photography and drawings in an affordable format.

Louis I. Kahn in Rome and Venice Elisabetta Barizza, 2021-07-22. This book examines the idea of organism in the work of Louis I Kahn from the turning point of Rome to the project for Venice. It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career when he was working on a particular design method based on an entirely novel way of interacting with the past. Beginning with a meticulous documentation and analysis of Kahn's experiences in the twenty years from 1930 to 1950 the book sheds new light on the relationship between Kahn's work and the modern movement. The arguments are supported by case studies including that of the Palazzo dei Congressi in Venice based on Kahn's words like his lessons in Venice at IUA International University of Art in 1971 and others as the Trenton Bath House the Salk Institute La Jolla the Kimbell Museum Fort Worth the Yale Gallery and the Mellon Center for British Art New Haven and more. Unlike much of the by now well established literature on Kahn's work *Louis I Kahn in Rome and Venice* suggests that the basic premise of Kahn's invention is the idea of spatial constructive organism which explains how he created forms that were inextricably anchored in the past without imitating any one kind of ancient architecture. The main objective of the book is to explain Kahn's methodology to architects and students showing how he was able to design an architectural object with the characteristics of the best designed objects organisms in which each part contributes with the whole to creating something made of indivisible parts.

Trajectories in Architecture Michael Jasper, 2023-04-21. *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture. Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories. These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date. *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture. The book provides potentially transformative new interpretations of influential architects and key projects from

the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities. In so doing, the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression. *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier, Peter Eisenman, Zaha Hadid, John Hejduk, Louis I. Kahn, and I. M. Pei. **Nationalism and Architecture** Raymond Quek, Darren Deane, Sarah Butler, 2012. Bringing together case studies from Europe, North and South America, the Middle East, Africa, Asia, and Australia, this book provides an exploration of the relationship between architecture and nationalism. It includes essays grouped together in three thematic sections: Revisiting Nationalism, Interpreting Nationalism, and Questioning Nationalism. **Seeing and Making in Architecture** Taiji Miyasaka, 2013-08-22. You always aim to achieve that moment of insight that leads to ingenuity and novelty in your design, but sometimes it remains elusive. This book presents a variety of techniques for mapping and making hands-on design-build projects and relates this work to real architecture. It helps you to learn new ways of seeing and making that will enhance your creative design process and enable you to experience moments that lead to ingenuity in design. Each of the book's two parts, *Seeing* and *Making*, is organized according to technique, which ranges from quantitative analysis and abstraction to pattern and scale, to provide you with a framework for mapping and hands-on exercises. Interviews with architects Yoshiharu Tsukamoto, Atelier Bow Wow, and Jesse Reiser and Nanako Umemoto give you perspective on using these exercises in practice. *Elements of Architecture* Mikkel Bille, Tim Flohr Sorensen, 2016-02-26. *Elements of Architecture* explores new ways of engaging architecture in archaeology. It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment, considering how people in the past have not just dwelled in buildings but have existed within them. The book engages with the meeting point between these two perspectives. For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans, they must also address the performances as well as temporal and affective impacts of these material remains. The contributions in this volume investigate the way time, performance, and movement, both physically and emotionally, are central aspects of understanding architectural assemblages. It is a book about the constellations of people, places, and things that emerge and dissolve as affective, mobile, performative, and temporal engagements. This volume juxtaposes archaeological research with perspectives from anthropology, architecture, cultural geography, and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture. Documenting the ephemeral, relational, and emotional meeting points with a category of material objects that have defined much research into what it means to be human, *Elements of Architecture* elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies. **Modern Architecture and Religious Communities, 1850-1970** Kate Jordan, Ayla Lepine, 2018-04-17. Social groups formed around shared religious beliefs encountered significant change and challenges between the 1860s and

the 1970s This book is the first collection of essays of its kind to take a broad thematically driven case study approach to this genre of architecture and its associated visual culture and communal experience Examples range from Nuns holy spaces celebrating the life of St Theresa of Lisieux to utopian American desert communities and their reliance on the philosophy of Teilhard de Chardin Modern religious architecture converses with a broad spectrum of social anthropological cultural and theological discourses and the authors engage with them rigorously and innovatively As such new readings of sacred spaces offer new angles and perspectives on some of the dominant narratives of the nineteenth twentieth and twenty first centuries empire urban expansion pluralism and modernity In a post traditional landscape religious architecture suggests expansive ways of exploring themes including nostalgia and revivalism engineering and technological innovation prayer and spiritual experimentation and the beauty of holiness for a brave new world Shaped by the tensions and anxieties of the modern era and powerfully expressed in the space and material culture of faith the architecture presented here creates a set of new turning points in the history of the built environment

Architecture, Power and National Identity Lawrence Vale, 2014-05-01 The first edition of Architecture Power and National Identity published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea
