**The Meaning Revolution** Fred Kofman,2018-05-01 Advisor of Leadership at Google and former vice president of leadership at LinkedIn claims that the biggest driver of motivation is the chance to serve a larger purpose beyond our careers and ourselves rather than salary benefits bonuses or other material incentives companies that are able to successfully focus their people their teams and their culture around meaning outperform their competition Fred Kofman s approach to leadership has little to do with the standard practices taught in business school and traditional books Bringing together economics and business theory communications and conflict resolution family counseling and mindfulness mediation Kofman argues in The Meaning Revolution that our most deep seated unspoken and universal anxiety stems from our fear that our life is being wasted that the end of life will overtake us when our song is still unsung Material incentives salary and benefits account for perhaps 15 percent of employees motivation at work The other 85 percent is driven by a need to belong a feeling that what we do day in and day out makes a difference that how we spend our time on earth serves a larger purpose beyond just ourselves Kofman claims that transcendental leaders wherever they are in the hierarchy are able to put aside their self interests and help others to feel connected with others on a team or in an organization on a great mission and part of an ennobling purpose He argues that every organization involved in work that is nonviolent and non addictive has what he calls an immortality project at its core And the challenge for leaders is to identify and expand on that core to inspire all stakeholders to take part

**Mirages of the Self** Timothy J. Reiss, 2003 Through extensive readings in philosophical, legal, medical, and imaginative writing, this book explores notions and experiences of being a person from European antiquity to Descartes. It offers quite new interpretations of what it was to be a person to experience who-ness in other times and places, involving new understandings of knowing, willing, and acting, as well as of political and material life, the play of public and private passions and emotions. The trajectory the author reveals reaches from the ancient sense of personhood as set in a totality of surroundings inseparable from the person to an increasing sense of impermeability to the world in which anger has replaced love in affirming a sense of self. The author develops his analysis through an impressive range of authors, languages, and texts from Cicero, Seneca, and Galen through Avicenna, Hildegard of Bingen, and Heloise and Abelard to Petrarch, Montaigne, and Descartes.

*The Psychology of Prenatal Development* Klaus Evertz, 2024-11-22 This important book introduces the basics of prenatal psychology and works through the current scientific findings in the psychology and psychosomatics of pregnancy and birth. Through exploring bio-psycho-social relationships as well as historical and cultural perspectives, this interdisciplinary approach easily breaks down specialist discussions into easy-to-understand concepts. Bridging the gap between foetal programming and psychological research and practice, this accessible book presents the history of the field and the basic concepts of prenatal development before exploring the behavioural dimensions of life before, during, and immediately after birth. Topics include sensory and emotional development in the womb, perception and brain development, the influence of environmental factors, and prenatal imprinting and long-term effects. The author also delves into the concept of attachment and support and analyses body symptoms, sensations, feelings, and inner images in dreams and imaginations through the role of art, creations, and biographical narratives. As a whole, this book provides a therapeutic synopsis of the entire existence which begins with conception. Explaining how experiences in the prenatal period influence basic psychological imprints across the lifespan, this book is an essential resource for students in a wide range of interrelated disciplines, including developmental psychology, paediatric medicine, neuroscience, infancy and early child development, nursing, social work, and early childhood education. It may also be of interest to researchers, clinicians, and related professionals.
