Philosophers Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture The Concept of Love in 17th and 18th Century Philosophy Herman de

Dijn, 2007 Love is joy with the accompanying idea of an external cause Spinoza's definition of love manifests a major paradigm shift achieved by seventeenth century Europe in which the emotions formerly seen as normative forces of nature were embraced by the new science of the mind This shift has often been seen as a transition from a philosophy laden with implicit values and assumptions to a more scientific and value free way of understanding human action But is this rational approach really value free Today we tend to believe that values are inescapable and that the descriptive mechanical method implies its own set of values Yet the assertion by Spinoza Malebranche Leibniz and Enlightenment thinkers that love guides us to wisdom and even that the love of a god who creates and maintains order and harmony in the world forms the core of ethical behavior still resonates powerfully with us It is evidently an idea Western culture is unwilling to relinquish This collection of insightful essays offers a range of interesting perspectives on how the triumph of reason affected not only the scientific philosophical understanding of the emotions and especially of love but our everyday understanding as well

This volume explores emotion in medieval and early modern thought and opens a contemporary debate on the way emotions figure in our cognitive lives Thirteen original essays explore the key themes of emotion within the mind the intentionality of emotions emotions and action and the role of emotion in self understanding and social situations Macedonio Fernández: Between Literature, Philosophy, and the Avant-Garde Federico Fridman, 2022-01-13 At Macedonio Fernández's funeral in 1952 Jorge Luis Borges delivered the following elegy In those years I imitated him to the point of transcription to the point of devout and passionate plagiarism I felt Macedonio is metaphysics Macedonio is literature This is the first book available in English that collects essays by the world's leading scholars on Macedonio Fernández one of Borges's most important mentors and a still enigmatic thinker of the early 20th century Macedonio's philosophy metaphysics ethics and experimental writing laid the foundations for Borges's own theoretical and literary matrix Nonetheless Borges helped shape a myth of Macedonio as a thinker who could not translate his oratorical geniality into written intelligibility So despite the centrality of Macedonio to Borges's thought his work has remained almost unknown to English speaking readers Contributors to this volume demonstrate however that this myth reduces the complexities of Macedonio's life and creative process as each chapter shines new light on his texts Conceived as both a companion for new readers of Macedonio's writings and an invitation for specialists to revisit his work through new perspectives essays in this volume provide extensive background and bibliographical references as well as English translations of Macedonio's original texts This collection seeks to serve as a catalyst for the continued discovery and rediscovery of Macedonio Fernández's texts and the ways they might help us to rediscover the singularities of our own present moment The Practical Philosophy Robert Lewis Dabney, 1897 50 Christan Books - Scripture, Theology, Philosophy and Spirituality (Including Christian Novels) Johann Wolfgang von Goethe, Martin Luther, Henryk Sienkiewicz, Henry Van Dyke, David Hume, James Allen, Ralph Waldo Emerson, Andrew Murray, John Bunyan, Grace Livingston Hill, Thomas Paine, Voltaire, Lew Wallace, John Milton, Charles M. Davis, 2024-06-10 *Moving Beyond Theoria Towards Theosis* focuses on the telos of man as understood in Plato's theoria envisioned in the allegory of the cave and early Christian reinterpretation of theoria as theosis In his famed allegory of the cave Plato maintains that real life exists beyond our base perceptions of reality and is found in the realm of ideas Theoria is eternal rest in this realm and is understood as the telos of mankind Plato's theoria underwent change as it was reinterpreted under middle Platonic and neo Platonic thought These systems incorporated a more mature idea of the divine than Plato but still minimized the material world This book explores how early Christianity inherited Plato's cosmology and terminology Theoria was also reinterpreted within the Christian context Eventually the term was abandoned for theosis Theosis is beyond theoria as it includes
