Science question is about what is real Why don't neutrinos care about what we think of as mass What is mass That sort of thing The nature of reality is an ongoing theme Next day we speculate on some details of the spaceship And we ask the paper clip question And drop the name of the Castle City Mountain Machine Some referencing to the book before they left planet earth A little rambling about our own time Back at the start of the blooming pandemic I might avoid cussing in these descriptions for they will be on the website or both websites Our own Lunanity de and Smashwords In the Love Letter is much cussing Not at Luna who is partly my imagination and partly a real person Muse A goddess We explain that much later Day six might have been two days Some talk of the previous novel and the second novel before it is let go to concentrate our resources my brain and the things in the world And some bits beyond it And there is some real time report but not with any news of the outer world That is not often let into the dwelling that will one day have hot water Day seven talk wanders from fiction to current random events Some various science and it might be noted that your narrator is at times philosophical Sometimes a little flippant Mostly light hearted and optimistic Day 008 delves into the entertaining value of the banal in the here and now back then now A short short story of bunny dominance And a wondering about a couple of our characters The ninth day is a little from book two still the very beginning and Zara has someone to question So far she has only punched him once very hard in the face For those not familiar with her character now we have some clues To demonstrate proof of purpose aside from an imagined discourse with my dear friend Luna after some trivial but philosophical bantering we finally got Barbaralba and Namor back to Anamata Island after a long and brutal journey that can be read in the first part of Second Genesis It is what we eventually decided to call the Castle City Story For some time it was Ali Sam Barbaralba but Ali does not get a big roll in the novel She is vital but not in the foreground of the story Namor talks for his first time on a telephone and the two Islands are excited about their return and curious about the men from Gadavida There is just the mention of Zarathustra about to be part of the Eden story The planet is called Eden By the humans They decided that many thousands of years back on the space ship

Summary of the summary book of Love Letter for Luna The summaries in the book of summaries reads a bit like a short version of the letter It is meant both as a little teaser to evoke interest in the new world philosophy of the crazy theological scientist And reference Locus Synopsis What is theological science pray tell Do we need religion some ask And maybe there is an answer Something like a species that knows little about the universe and is becoming conscious of knowing they will freak out and make up some stories to feel safer at night So religion is likened unto a safety blanket Then we start to understand the cosmos We are in it and of it Can we know it all not likely But we can take more control of the planet we still depend on and the rest of the solar system Why Mostly because we can And thus we must In the Torah it was asked what if they should take from the tree of knowledge and become like us What's the answer They will know and no longer need believe No longer be ruled so easily by lies And the beautiful question from such an old book What if they take from the tree

of life and live forever And there are two other questions that one will come upon when sitting long enough around the campfire and looking into the heavens Is there anything out there that can kill us Are there any resources to be had Once asked we have no choice For we know We are just getting started In the beginning are our stories Whitaker's Books in Print ,1990 **Australian National Bibliography** ,1978 Red and the Black Volume I EasyRead Comf Stendhal,2006-11 The Red and the Black is a reflective novel about the rise of poor intellectually gifted people to High Society Set in 19th century France it portrays the era after the exile of Napoleon to St Helena The influential sharp epigrams in striking prose leave reader almost as intrigued by the author s talent as the surprising twists that occur in the arduous love life
