A History of Women Philosophers M.E. Waithe, 2013-03-07 Like their predecessors and like their male counterparts most women philosophers of the 20th century have significant expertise in several specialities Moreover their work represents the gamut of 20th century philosophy s interests in moral pragmatism logical positivism philosophy of mathematics of psychology and of mind Their writings include feminist philosophy classical moral theory reevaluated in light of Kant Mill and the 19th century

feminist and abolitionist movements and issues in logic and perception Included in the fourth volume of the series are discussions of L Susan Stebbing Edith Stein Hedwig Conrad Martius Simone de Beauvoir Simone Weil Mary Whiton Calkins Gerda Walther and others While pre 20th century women philosophers were usually self educated those of the 20th century had greater access to academic preparation in philosophy Yet for all the advances made by women philosophers over two and a half millennia the philosophers discussed in this volume were sometimes excluded from full participation in academic life and sometimes denied full professional academic status

Empathy Vanessa Lux, Sigrid Weigel, 2017-09-14 This book digs into the complex archaeology of empathy illuminating controversies epistemic problems and unanswered questions encapsulated within its cross disciplinary history The authors ask how a neutral innate capacity to directly understand the actions and feelings of others becomes charged with emotion and moral values associated with altruism or caregiving They explore how the discovery of the mirror neuron system and its interpretation as the neurobiological basis of empathy has stimulated such an enormous body of research and how in a number of these studies the moral values and social attitudes underlying empathy in human perception and action are conceptualized as universal traits It is argued that in the humanities the historical cultural and scientific genealogies of empathy and its forerunners such as Einf hlung have been shown to depend on historical preconditions cultural procedures and symbolic systems of production The multiple semantics of empathy and related concepts are discussed in the context of their cultural and historical foundations raising questions about these cross disciplinary constellations This volume will be of interest to scholars of psychology art history cultural research history of science literary studies neuroscience philosophy and psychoanalysis

On the Problem of Empathy Edith Stein, 2013-12-19 Edith Stein scholar and nun is known today as much for her life as for her work Because she was of Jewish descent she was forced to sacrifice herself in the gas chambers of Auschwitz in 1942 But even before her conversion to Catholicism she had distinguished herself as a scholar by her work as Husserl's assistant in Freiburg and by her inaugural dissertation on empathy The present work is a translation of this dissertation as it was published in 1917 in Halle The conception of empathy that Edith Stein develops here follows very closely the work of Husserl in Volume II of the *Ideas* Martinus Nijhoff 1952 At the same time it is in contrast with his later *Cartesian Meditations* Martinus Nijhoff 1963 which attempt to resolve a somewhat different problem Thus Edith Stein presents a distinction between the living body *Leib* as the center of orientation of the spatial world and the material body *Körper* understood as a physical thing Since Maurice Merleau-Ponty also had access to Volume II of the *Ideas* when formulating his notion of the lived body *le corps vécu* it is not surprising to find his conception strikingly similar to that of Edith Stein at the same time as it presents some provocative contrasts Though Edith Stein does not use the term her concept of the spatial world adumbrates the *Lebenswelt* which plays such a prominent role in

contemporary phenomenology and existentialism In her chapter on the mind Edith Stein presents a concept of the cultural sciences and the method appropriate to them as opposed to the method of natural sciences She develops this contrast in terms of Wilhelm Dilthey's reliving understanding *nachlebendes Verstehen* with emendations in the context of her particular analysis Also of interest is her outline of an approach to the structure of feeling as a basis for understanding value that takes into consideration Max Scheler's work This work in general is richly stimulating in its clear concise analyses apt examples and relevance to problems that continue to concern philosophers today The translator it may be noted is a grand niece of Edith Stein who is presently serving as assistant professor of philosophy at the State University College of New York at Oswego Publisher

Person in the World Mary Catherine Baseheart, 2013-03-14 Edith Stein has become almost a legend in recent years largely because of her heroic personality and her death in Auschwitz at the hands of the Nazis She is known also as an eminent German Jewish Christian intellectual and feminist but more in the realm of the sacred than of the secular Both are essential to understanding her To know the real Edith Stein one must have some knowledge of her as philosopher for philosophy was central to her very being For this reason the present work is designed to be of interest to the general reader as well as to philosophers Many of the latter have given evidence of interest in Stein's phenomenology and may welcome an introduction that gives clues to its substance and quality Those who knew Edith Stein personally and professionally Edmund Husserl Roman Ingarden Hedwig Conrad Martius Peter Wust and other friends at the universities of Göttingen and Freiburg affirm her genius and her passionate pursuit of truth in philosophy James Collins distinguished American historian of philosophy who discovered some of her works about the time she died wrote that we may expect critical studies on her philosophy to multiply rapidly with the issuance of her collected works and the recognition of her high philosophical genius The fact is that this has not happened although fourteen of her major works have been published posthumously by Nauwelaerts and Herder and many are available from other sources

Logos of Phenomenology and Phenomenology of The Logos. Book Two Anna-Teresa Tymieniecka, 2006-06-30 The human being is today at the center of scientific social ethical and philosophical debates The Human Condition in the unity of everything there is alive under whose aegis the present selection of essays falls offers the urgently needed new approach to reinvestigating humanness While recent advances in the neurosciences genetics and bio engineering challenge the traditional abstract conception of human nature indicating its transformability thus putting in question the main tenets of traditional philosophical anthropology in the new perspective of the Human Creative Condition the human individual is seen in its emergence and unfolding within the dynamic networks of the logos of life and within the evolution of living types Just the same the creative logos of the mind lifts the human person into a sphere of freedom Within the networks of the logos we retrieve the classical principles human subject ego self body soul person reinterpret them to counter the naturalistic critique Tymieniecka Thus principles of a new philosophical anthropology satisfying the requirements of the present time are laid down

Women Phenomenologists

on Social Ontology Sebastian Luft, Ruth Hagengruber, 2018-10-24 This edited volume examines women's voices in phenomenology many of which had a formative impact on the movement but have been kept relatively silent for many years. It features papers that truly extend the canonical scope of phenomenological research. Readers will discover the rich philosophical output of such scholars as Edith Stein, Hedwig Conrad Martius, and Gerda Walther. They will also come to see how the phenomenological movement allowed its female proponents to achieve a position in the academic world few women could enjoy at the time. The book explores the intersection of social ontology, phenomenology, and women scholars in phenomenology. The papers offer a fresh look at such topics as the nature of communities, shared values, feelings, and other mental content. In addition, coverage examines the contributions of Jewish women to the science who were present at the beginning of the phenomenological movement. This remarkable anthology also features a paper on Gerda Walther written by Linda Lopez McAlister, former editor of the feminist journal *Hypatia*, who had met Walther in 1976. This book features work from the conference *Women Phenomenologists on Social Ontology* held at the University of Paderborn. Overall, it collects profiles and analysis that unveil a hidden history of phenomenology.

Religion and the Unconscious Ann Belford Ulanov, Barry Ulanov, 1975-01-01 In *Religion and the Unconscious*, Ann and Barry Ulanov provide a thoughtful study of the relationship between religion and depth psychology. An insightful contribution to the entire area of pastoral counseling, this book demonstrates how to combine religion and depth psychology in order to provide more effective counseling.

Introduction to Computational Cultural Psychology Yair Neuman, 2014-02-06 Draws on state-of-the-art computer technology to introduce a novel approach for studying the interface of culture and psychology.

One (Un)Like the Other Michael F. Andrews, 2024-09-01 Aims to rethink ethics and transcendence in light of the phenomenology of empathy and social ontology. *One (Un)Like the Other* responds to the question: What are the conditions of possibility that make genuine knowledge of other persons and therefore love possible? By providing an original interpretive framework for exploring ethics in relation to empathy and transcendence from multiple perspectives in continental philosophy, empathy is described as a trace of what remains essentially and irreducibly other in every act of givenness. The use of the phenomenological method places *Einführung* theory in its rich historical context, beginning with Husserl and the early phenomenologists and extending to contemporary issues that explore otherness in light of consciousness, gender, embodiment, community, intentionality, emotions, intersubjectivity, values, language, and apophatic discourse. The implications of recasting empathy in an interpretive and dialogical model of reciprocity envision new paradigms of understanding ethics as an infinite playing field. No longer subservient to metaphysics and ontology, empathy is described as an act of infinite concern, a hermeneutics of suspicion that transcends epistemological theory and ethical command. Drawing on Husserl, Scheler, Stein, Heidegger, Levinas, Derrida, and others, this study presents an examination and expansion of empathy as an encounter with otherness in its most radical and transcendent forms.

Animals, Empathy, and Anthropomorphism Carlo Salzani, 2025-05-05 This open access book explores the role of imagination in animal ethics and its constitutive links to empathy sympathy and anthropomorphism The book argues for the constitutive role of imagination in ethical deliberation but acknowledges that there exist important limits to its use However limit is here understood not merely negatively as restriction and insufficiency but rather positively as condition of possibility so what the book explores and analyses are the conditions for a positive and fruitful use of the imagination in ethics The book uses as a frame the questions and issues raised in J M Coetzee s *The Lives of Animals* to explore some central and salient themes
