months Rabbit s white meat has a high quality flavor that needs to be eaten to be believed but even on a more objective measure nutritional value compared to other domestic meats like chicken beef and pork rabbits come out on top Rabbit meat has a better protein to fat ratio is low in cholesterol and has high concentrations of important vitamins and minerals Once the decision to raise meat rabbits on the homestead has been made the first step is to build a structure to house them a rabbitry The options for rabbitries can vary widely by the skills of the builder and the needs of the homestead Rabbits can thrive in almost any climate as long as they are kept dry and have the ability to avoid cold direct winds but have good ventilation While colony keeping is an option most keepers choose to keep each adult animal in an individual pen Commercially available pens are usually a simple and versatile wire cage available from most ag and feed stores that can be used indoors or out suspended or placed on the ground or a shelf These pens come individually or can be purchased and used in groups Other pre made rabbitry structures can vary greatly in size and cost and can be made for indoor or outdoor use If building your own there are free plans available online or you can build your own design as long as some basic criteria are met When locating the rabbitry ensure a supply of electricity for lights and fans A water source and food storage should be as close as possible as well Rabbits also need a feeder a waterer and a nesting box for birthing and raising kits The nesting box can be purchased or built and should correspond to the size of the rabbit breed Ready to learn more Read This Book Now
