Henry Smith Williams, A complete world history should properly speaking begin with the creation of the world as man s habitat and should trace every step of human progress from the time when man first appeared on the globe Unfortunately the knowledge of to day does not permit us to follow this theoretical obligation We now know that the gaps in the history of human evolution as accessible to us to day vastly exceed the recorded chapters that in short the period with which history proper has at present to content itself is a mere moment in comparison with the vast reaches of time which in recognition of our ignorance we term prehistoric But this recognition of limitations of our knowledge is a quite recent growth no older indeed than a half century Prior to 1859 the people of Christendom rested secure in the supposition that the chronology of man s history was fully known from the very year of his creation One has but to turn to the first chapter of Genesis to find in the margin the date 4004 B C recorded with all confidence as the year of man s first appearance on the globe One finds there too a brief but comprehensive account of the manner of his appearance as well as of the creation of the earth itself his abiding place Until about half a century ago as has just been said the peoples of our portion of the globe rested secure in the supposition that this record and this date were a part of our definite knowledge of man s history Therefore one finds the writers of general histories of the earlier days of the nineteenth century beginning their accounts with the creation of man B C 4004 and coming on down to date with a full and seemingly secure chronology Our knowledge of the world and of man s history has come on by leaps and bounds since then with the curious result that to day no one thinks of making any reference to the exact date of the beginnings of human history unless indeed it be to remark that it probably reaches back some hundreds of thousands of years The historian can speak of dates anterior to 4004 B C to be sure The Egyptologist is disposed to date the building of the Pyramids a full thousand years earlier than that And the Assyriologist is learning to speak of the state of civilisation in Chaldea some 6000 or 7000 years B C with a certain measure of confidence But he no longer thinks of these dates as standing anywhere near the beginning of history He knows that man in that age in the centres of progress had attained a high stage of civilisation and he feels sure that there were some thousands of centuries of earlier time during which man was slowly climbing through savagery and barbarism of which we have only the most fragmentary record He does not pretend to know anything except by inference of the dawns of civilisation Whichever way he turns in the centres of progress such as China Egypt Chaldea India he finds the earliest accessible records covering at best a period of only eight or ten thousand years giving evidence of a civilisation already far advanced Of the exact origin of any one of the civilisations with which he deals he knows absolutely nothing The Creation of Man with its fixed chronology is a chapter that has vanished from our modern histories To be continue in this ebook **Books Out Loud** ,2007 *A Manual of the Ancient History of the East, Volume 1* Francois Lenormant,2024-09-18 Recent antiquarian research in the hands of a greatly expanded scholarship has completely revolutionized ancient Oriental history The last 150 years have been prolific of discoveries going

to enlarge our knowledge of the pre Hellenic world First came the original memoirs of the discoverers and decipherers then great works combining their fruits into connected history and rehandling the old narratives in their light and now we are having all that condensed and separated from critical apparatus and presented in forms for popular reading and instruction Among works of the latter class this of Lenormant is positively one of the best we have yet seen Its clear and brief narrative contains the latest results of the most advanced Orientalists in their respective fields and the whole is woven together by a scholar whose own life has been devoted successfully to the same round of subjects This is volume one out of two covering the histories of the Israelites Egyptians Assyrians and Babylonians **Books Written in Stone: Volume 1** J. Marc. Merrill, 2012-03-06 The Great Pyramid mysteries abound For example Why was the subterranean chamber apparently abandoned and yet it is larger than the Queen s Chamber and the King s Chamber combined Why is there a pit in the floor of the subterranean chamber and why does the narrow passage that snakes south off the subterranean chamber come to a sudden end after 53 feet Why was sand from the Sinai hidden behind the wall of the horizontal passage to the Queen s Chamber and why is there a sudden drop in that passage Why was the Grand Gallery built so large in comparison to the ascending passage and why are the slots in the ramps of the Grand Gallery empty Why was the antechamber to the King s Chamber built with both limestone and granite blocks and what purpose could the so called Granite Leaf have served Egyptologists pyramidologists and others outside these two camps have attempted to explain such anomalies Their theories are examined and compared to a new vision that answers not just some of the questions about the Great Pyramid but all of them as revealed in Books Written in Stone Enoch the Seer the Pyramids of Giza and the Last Days The Secret Doctrine (Vol. 1-3) Helena Blavatsky, 2019-04-26 The Secret Doctrine is one of the most influential esoteric and occult books of all time In the first part of the book the author explains the origin and evolution of the universe itself in terms derived from the Hindu concept of cyclical development While in the second part she describes the origins of humanity through an account of Root Races said to date back millions of years **Words on Cassette, 2002** R R Bowker Publishing, 2002 **Forthcoming Books** Rose Arny, 1998 **The History of Antiquity (Vol. 1-6)** Max Duncker, 2023-11-16 In The History of Antiquity Volumes 1 6 Max Duncker delivers an exhaustive examination of ancient civilizations employing a meticulously scholarly approach that reflects the rigor of 19th century historiography Duncker s narrative weaves together political cultural and social threads from the early Mesopotamian societies to the fall of the Roman Empire presenting a comprehensive chronology marked by rich detail and insightful interpretations His literary style embraces a formal yet accessible tone inviting readers into the multifaceted world of antiquity while contextualizing the significance of historical events and figures within a broader cultural framework Max Duncker was a prominent German historian deeply influenced by the emerging trends of his time particularly the focus on empirical research and critical analysis in history His background in philology and his engagement with philosophical ideas of history powered his endeavor to illuminate the lives and legacies of ancient
