Korea's Development Under Park Chung Hee Hyung-A Kim, 2004-08-02 Based on personal interviews with the principal policy makers of the 1970s Korea's Development under Park Chung Hee examines how the president sought to develop South Korea into an independent autonomous sovereign state both economically and militarily Kim provides a new narrative in the complex task of exploring the paradoxical nature and effects of Korea's rapid development which maintains that any judgement of Park must consider his achievements in the socio economic cultural and political context in which they took place Aspects of Park's government analyzed include his abhorrence of Korea's reliance on the US presence the Korean model of state guided industrialization Park's rapid development strategy the role of the ruling elites Park's clandestine nuclear development program the heavy chemical industrialisation of the 1970s The prevailing popularity of Park in the eyes of the Korean public is significant and relevant to their acceptance of how their national development was achieved This book tells that story while simultaneously recognizing the flaws in the process With a great deal of material never before published scholars of Korean politics and history at all levels will find this book a stimulating account of South Korea in the 1960s and 1970s

State-Directed Development

Atul Kohli, 2004-08-30 Why have some developing country states been more successful at facilitating industrialization than others An answer to this question is developed by focusing both on patterns of state construction and intervention aimed at promoting industrialization Four countries are analyzed in detail South Korea Brazil India and Nigeria over the twentieth century The states in these countries varied from cohesive capitalist mainly in Korea through fragmented multiclass mainly in India to neo patrimonial mainly in Nigeria It is argued that cohesive capitalist states have been most effective at promoting industrialization and neo patrimonial states the least The performance of fragmented multiclass states falls somewhere in the middle After explaining in detail as to why this should be so the study traces the origins of these different state types historically emphasizing the role of different types of colonialisms in the process of state construction in the developing world

Rank and Privilege Linda A. Rodriguez, 1997-08-01 Dr Linda A Rodr_guez has assembled a new collection of essays that finally provides the historical context necessary to understand the Latin American military The articles included here examine a variety of time periods and nations from the counterinsurgency army of New Spain to the nineteenth century War

of the Pacific to the modern relationship between the military and development The contributors look at the ways in which Latin America's armed forces have changed over time and how external threats as well as internal rivalries have shaped the military Together these essays trace the roots of the military's power and the growth of its political influence **Coups from Below**

J. Kandeh, 2004-11-26 *Coups from Below* represents the first major effort at studying coups carried out by the lumpen section or the subalterns of the armed forces of African states No previous study has attempted to examine coup making by those in the bottom ranks of the military as a distinct pattern of intervention in African studies Kandeh examines this pattern as broadly symptomatic of state failure especially the inability of political leaders to institutionalize power eradicate mass poverty and promote socioeconomic development Kyrgyzstan Country Study Guide Volume 1 Strategic Information and Developments IBP USA, 2013-08 Kyrgyzstan Country Study Guide Strategic Information and Developments

Introduction to the Sociology of Development Andrew Webster, 1990-03-01 This text provides a comprehensive introduction to the latest debates in the sociology of development linking theoretical and empirical issues of social change primarily though not exclusively through reference to the Third World This book covers general conceptions of modernisation and underdevelopment and points to new attempts at their synthesis as well as exploring the policy implications of different development models *Challenges to Democratic Governance in Developing Countries* Gedeon Mudacumura, Göktuğ Morçöl, 2014-01-04 Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries statistics show that the majority of these countries have not yet achieved significant improvements in living standards While some regions make strides towards improving the living conditions of their citizens Sub Saharan Africa for instance is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries As a result the institutional foundations of these countries are weakened public funds are misappropriated and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined It is therefore not surprising that a 2008 Transparency International report found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries This book investigates the problems of democratic governance particularly as they relate to corruption and also whether democracy should be based on universal principles or local context and historical factors It also analyses the rule of law in promoting democratic governance and curbing corruption and if governmental non governmental organizations and civil societies are effective in promoting democratic governance and curbing corruption This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries It is premised on the importance of bridging theory and practice which has been lacking in most local and international development publications making of interest to scholars and policy makers alike concerned with

public administration in developing countries **Socio-Economic Development** Adam Szirmai, 2015-06-18 Taking a comparative and multidisciplinary approach this textbook offers a non technical introduction to the dynamics of socio economic development and stagnation
