

The book cover features a painting of a winter landscape. In the foreground, several bare, dark trees stand against a pale, hazy sky. A small evergreen tree is visible on the left. In the background, a snow-covered field leads to a small, dark building. The sun is low on the horizon, creating a warm, golden glow that filters through the trees. The title is written in a large, elegant, black script font across the middle of the cover.

The Rarest Bird in the World

Vernon R. L Head,2016-03-15 Part detective story part love affair and pure adventure storytelling at its best a celebration of the thrill of exploration and the lure of wild places during the search for the elusive Nechisar Nightjar In 1990 a group of Cambridge scientists arrived at the Plains of Nechisar in Ethiopia On that expedition they collected more than two dozen specimens saw more than three hundred species of birds and a plethora of rare butterflies dragonflies reptiles mammals and plants As they were gathering up their findings a wing of an unidentified bird was packed into a brown paper bag It was to become the most famous wing in the world This wing would set the world of science aflutter Experts were mystified The wing was entirely unique It was like nothing they had ever seen before Could a new species be named based on just one wing After much discussion a new species was announced Nechisar Nightjar or Camprimulgus Solala which means only wing And so birdwatchers like Vernon began to dream Twenty two years later he joins an expedition of four to find this rarest bird in the world In this gem of nature writing Vernon captivates and enchants as he recounts the searches by spotlight through the Ethiopian plains and allows the reader to mediate on nature exploration our need for wild places and the human compulsion to name things The Rarest Bird in the World is a celebration of a certain way of seeing the world and will bring out the explorer in everyone who reads it
