Rational Behaviour And The Design Of Institutions Concepts Theories And Models:

Rational Behaviour and the Design of Institutions Hannu Nurmi, 1998 The structures of the world's national and international political and economic institutions have largely resulted from intuitive and ad hoc organization with reforms taking place on a costly trial and error basis This book offers a comprehensive evaluation of the tools which can be used for a more rational and formal approach to institutional design As new institutions and indeed new national governments are being formed and developed all the time there is a considerable need for formal models that can facilitate their design This book offers conceptual approaches and theories that shed new light on how various social and political institutions can emerge as the outcome of goal directed rational behaviour The author provides tools for evaluating existing institutions and for setting up new ones demonstrating the applicability of decision and game theoretic tools social choice theory and mechanism design to the construction of political and economic institutions Using these approaches he particularly discusses the practical implications for the design of institutions in the European Union This important book will be welcomed by students and scholars interested in government and political science rational choice theory methodology in the social sciences and the microeconomics of rational behaviour

Theory and Applications of Relational Structures as Knowledge

Instruments Harrie de Swart, Ewa Orlowska, Gunther Schmidt, Marc Roubens, 2004-01-30 Relational structures abound in our daily environment relational databases data mining scaling procedures preference relations etc As the documentation of scientific results achieved within the European COST Action 274 TARSKI this book advances the understanding of relational structures and the use of relational methods in various application fields The 12 revised full papers were carefully reviewed and selected for presentations The papers are devoted to mechanization of relational reasoning relational scaling and preferences and algebraic and logical foundations of real world relations

Analytic Philosophy in Finland, 2016-08-09 Finland is internationally known as one of the leading centers of twentieth century analytic philosophy This volume offers for the first time an overall survey of the Finnish analytic school The rise of this trend is illustrated by original articles of Edward Westermarck Eino Kaila Georg Henrik von Wright and Jaakko Hintikka Contributions of Finnish philosophers are then systematically discussed in the fields of logic philosophy of language philosophy of science history of philosophy ethics and social philosophy Metaphilosophical reflections on the nature of philosophy are highlighted by the Finnish dialogue between analytic philosophy phenomenology pragmatism and critical theory

Advances in Behavioral Economics Friedel

Bolle, Michael Carlberg, 2012-12-06 This volume is dedicated to Horst Todt who celebrated his seventieth anniversary on March 14 2000 All the contributors know Horst Todt personally and with the exception of two younger co authors have accompanied his scientific career for several years some as his assistants some as his colleagues at the Frankfurt or Hamburg University some as fellow members in scientific societies All who know him acknowledge inspiring conversations on a broad field of issues often reaching far beyond the scope of economics Being friendly and entertaining and without

exaggerated personal ambition he often initiated work which others completed In particular the two editors of this volume experienced and enjoyed the stimulating atmosphere at his Chair of Economics at the Hamburg University We like to remember these scientifically and personally fruitful years under the tutorship of Horst Todt The editors would like to thank the contributors to this volume for their readiness to cooperate and for the promptness of their delivery Power Indices and Coalition Formation M.J. Holler,Guillermo Owen,2013-06-29 In recent years publications on power indices and coalition formation have multiplied Obviously the application of these concepts to political institutions more specifically to the analysis of the European Union and as it seems the election of the President of the United States is getting more and more popular There are however also new theoretical instruments and perspectives that support these applications First of all the probabilistic model of coalition formation has to be mentioned which is made operational by the multilinear extension of the characteristic function form of coalition games This instrument triggered off a reinterpretation of existing power indices and the formulation of new indices This development is accompanied by an intensive discussion of the concept of power in general what do we measure when we apply power measures and the properties that an adequate measure of power has to satisfy Various concepts of monotonicity were proposed as litmus test The discussion shows that the underlying theories of coalition formation play a decisive role New results will be discussed in this volume Its contributions put flesh and blood on the theoretical innovations and their applications that led to a growing interest in power indices and coalition formation

Social Choice and Democratic Values Eerik Lagerspetz,2015-11-26 This book offers a comprehensive overview and critique of the most important political and philosophical interpretations of the basic results of social choice assessing their plausibility and seeking to identify the links between the theory of social choice and the more traditional issues of political theory and philosophy In this regard the author eschews a strong methodological commitment or technical formalism the approach is instead based on the presentation of political facts and illustrated via numerous real life examples This allows the reader to get acquainted with the philosophical and political dispute surrounding voting and collective decision making and its links to social choice theory *Dancing the Self* William Sturman Sax,2002 Over a period of ten years William Sax studied the inhabitants of the former kingdom of Garhwal located in north India He saw and took part in many performances of the pandav lila a ritual reenactment of scenes from the Mahabharata in dance *Journal of Economic Literature* ,1999 *Handbook of Social Choice and Welfare* Amartya Sen,Kotaro Suzumura,2007 **Journal of Public Policy** ,2001
