Why Psychosis Is Not So Crazy Stijn Vanheule, 2024-09-17 An expert's guide to humanizing psychosis through communication offers key insights for family and friends to support loved ones during mental health crises Are we all a little crazy Roughly 15 percent of the population will have a psychotic experience in which they lose contact with reality Yet we often struggle to understand and talk about psychosis Interactions between people build on the stories they tell each other stories about the past about who they are or what they want In psychosis we can no longer rely on these stories this shared language So how should we communicate with someone experiencing reality in a radically different way than we are Drawing on his work in psychoanalysis Stijn Vanheule seeks to answer this question which carries significant implications for mental health as a whole With a combination of theory from Freud to Lacan present day research and compelling examples from his own patients and well known figures such as director David Lynch and artist Yayoi Kusama he explores psychosis in an engaging way that can benefit those suffering from it as well as the people who care for and interact with them

Corpus Anarchicum Hamid Dabashi, 2012-09-24 This book is a meditation on and an attempt to understand suicidal violence in the immediate context of its most recent political surge the decade between 2001 and 2011 from the suicidal mission of Muhammad Atta and his band in the United States to the suicide of Mohamed Bouazizi in 2010 in Tunisia After the former a devastating military strike and occupation of two Muslim countries commenced and after the latter a massive transnational democratic uprising ensued Suicidal violence is neither specific to Islam nor peculiar to our time It has been manifested in practically all cultures and religions and throughout human history But the suicidal violence we witness today is of an entirely different disposition because the bodies both of the assailant and of the assailed on which it is perpetrated are no longer the human body of our Enlightenment assumption What we are witnessing is in fact the contour of a posthuman body The posthuman body as Dabashi here proposes is the body of a contingent and contextual being and as such an object of disposable knowledge while the human body that it has superseded was corporeally integral autonomous rational indispensable and above all the site of a knowing subject
