San Francisco A Guide To Recent Architecture:

San Francisco Kate Fowle, 2003-04 San Francisco is simply one of the most beautiful cities in the world uniquely favoured in its location and topography and with a deep seated conservatism that has ensured the survival of the traditional fabric of the city The dangers of prissy historicism have not been entirely avoided but a real creative tension exists between the the need to maintain San Francisco as a living city and the desire to guard its history and character The city is home to an astonishing number of architects and a corresponding array of contemporary architecture most the work of indigenous firms This guide covers the most important work of the last decade the skyscrapers hotels and vertical malls of downtown the bars clubs and shops in which experimentation gets a free hand and many houses including the rash of homes built at high speed in the aftermath of the Oakland fire disaster

San Francisco Peter Lloyd, 1997 This book looks at how four architects Stanley Saitowitz Jim Jennings Philip Banta and Mark Horton have worked to produce innovative unashamedly modern single family houses appropriate to life in California at the end of the 20th century after the devastating fire of October 1991 razed one of the most desirable residential locations on the American West Coast

The Changing Economic Geography of Globalization Giovanna Vertova, 2006-04-20 The process of globalization has had profound often destabilizing effects on space at all levels i e local regional national international This revealing book analyzes both theoretically and empirically the effects of globalization over space It considers through a dialogue among different

paradigms the ways in which space has become more important in the global economy Globalization has been advocated as a way of shrinking time and space which will lead to a homogenized global market a suggestion challenged in differing ways and with a variety of approaches by all the contributors to this volume Leading authorities from a range of disciplines are represented amongst this impressive list of contributors including Eric Sheppard Björn Asheim Richard Walker and Peter Swann The chapters demonstrate persuasively the continuing and even increasing role of space in the global economy and throughout the book covers viewpoints from the fields of international political economy economic geography regional and local economics This impressive volume which contains a selection of the best in contemporary scholarship will be of interest to the international arena of academicians policy makers and professionals in these or related fields

Architecture of Great Expositions 1937-1959 Rika Devos, Alexander Ortenberg, 2016-03-09 This book investigates architecture as a form of diplomacy in the context of the Second World War at six major European international and national expositions that took place between 1937 and 1959 The volume gives a fascinating account of architecture assuming the role of the carrier of war related messages some of them camouflaged while others quite frank The famous standoffs between the Stalinist Russia and the Nazi Germany in Paris 1937 or the juxtaposition of the USSR and USA pavilions in Brussels 1958 are examples of very explicit shows of force The book also discusses some less known and more subtle messages revealed through an examination of several additional pavilions in both Paris and Brussels of a series of expositions in Moscow of the Universal Exhibition in Rome that was planned to open in 1942 and of London's South Bank Exposition of 1951 all of them related in one way or another to either an anticipation of the global war or to its horrific aftermaths A brief discussion of three pre World War II American expositions that are reviewed in the Epilogue supports this point It indicates a significant difference in the attitude of American exposition commissioners who were less attuned to the looming war than their European counterparts The book provides a novel assessment of modern architecture's involvement with national representation Whether in the service of Fascist Italy or of Imperial Japan of Republican Spain or of the post war Franquista regime of the French Popular Front or of socialist Yugoslavia of the arising FRG or of capitalist USA of Stalinist Russia or of post colonial Britain exposition architecture during the period in question was driven by a deep faith in its ability to represent ideology The book argues that

this widespread confidence in architecture's ability to act as a propaganda tool was one of the reasons why Modernist architecture lent itself to the service of such different masters
