Community Development Approaches to Improving Public Health Robert Ogilvie,2013-09-13 As the rates of chronic diseases like diabetes asthma and obesity skyrocket research is showing that the built environment the way our cities and towns are developed contributes to the epidemic rates of these diseases It is unlikely that those who planned and developed these places envisioned these situations Public health community development planning and other fields influencing the built environment have operated in isolation for much of recent history with the result being places that public health advocates have labelled designed for disease The sad irony of this is that planning and public health arose together in response to the need to create health standards zoning and building codes to combat the infectious diseases that were prevalent in the industrializing cities of late nineteenth and early twentieth century America In recent years the dramatic rise in chronic disease rates in cities and towns has begun to bring public health and planning back together to promote development pattern and policies facilitating physical activity and neighbourly interactions as antidotes In this book a number of such community development efforts are highlighted bringing attention to the need to coordinate planning community development and health policy This book was originally published as a special issue of Community Development

Ilieva, 2016-09-13 This highly original work examines the rise of the urban food planning movement in the Global North and provides insights into the new relationship between cities and food which has started developing over the past decade It sheds light on cities as new spaces for food system innovation and on food as a tool for sustainable urban development Drawing insights from the literature on socio technical transitions the book presents examples of pioneering urban food planning endeavours from North America and Western Europe especially the Netherlands and the UK These are integrated into a single mosaic helping to uncover the conceptual analytical design and organizational innovations emerging

at the interface of food and urban policy and planning The author shows how promising seeds of transition to a shared urban food planning agenda are in the making though the urban food planning niche as a whole still lacks the necessary maturity to lastingly influence mainstream planning practices and the dominant agri food system regime Some of the strategic levers to cope with the current instability and limitations of urban food planning and effectively transition it from a marginal novelty to a normalized domain of policy research and practice are systematically examined to this end The conclusions and recommendations put forward have major implications for scholars activists and public officials seeking to radically transform the co evolution of food cities and the environment

Feeding Cities Christopher Bosso, 2016-11-10 There is enormous current interest in urban food systems with a wide array of policies and initiatives intended to increase food security decrease ecological impacts and improve public health This volume is a cross disciplinary and applied approach to urban food system sustainability health and equity The contributions are from researchers working on social economic political and ethical issues associated with food systems The book s focus is on the analysis of and lessons obtained from specific experiences relevant to local food systems such as tapping urban farmers markets to address issues of food access and public health and use of zoning to restrict the density of fast food restaurants with the aim of reducing obesity rates Other topics considered include building a local food business to address the twin problems of economic and nutritional distress developing ways to reduce food waste and improve food access in poor urban neighborhoods and asking whether the many and diverse hopes for urban agriculture are justified The chapters show that it is critical to conduct research on existing efforts to determine what works and to develop best practices in pursuit of sustainable and socially just urban food systems The main examples discussed are from the United States but the issues are applicable internationally

The American Way of Eating Tracie McMillan, 2012-02-21 The New York Times bestselling work of undercover journalism in the tradition of Barbara Ehrenreich s Nickel and Dimed that fully investigates our food system to explain what keeps Americans from eating well and what we can do about it When award winning and working class journalist Tracie McMillan saw foodies swooning over 9 organic tomatoes she couldn t help but wonder What about the rest of us Why do working Americans eat the way we do And what can we do to change it To find out McMillan went undercover in three jobs that feed America living and eating off her wages in each Reporting from California fields a Walmart produce aisle outside of Detroit and the kitchen of a New York City Applebee s

McMillan examines the reality of our country's food industry in this clear and essential The Boston Globe work of reportage. Chronicling her own experience and that of the Mexican garlic crews, Midwestern produce managers and Caribbean line cooks with whom she works, McMillan goes beyond the food on her plate to explore the national priorities that put it there. Fearlessly reported and beautifully written, The American Way of Eating goes beyond statistics and culture wars to deliver a book that is fiercely honest, strikingly intelligent and compulsively readable. In making the simple case that city or country rich or poor, everyone wants good food, McMillan guarantees that talking about dinner will never be the same again.

Food & Fitness Community Partnerships Laurie Lachance, Laurie Carpenter, Mary Emery, Mia Luluquisen, 2018-02-02. This book describes many of the unique contributions of the Food Fitness program, including a number of early successes, drawing lessons from efforts to form and maintain partnerships and from the strategies employed to create structural change in communities. This important study introduces the Food and Fitness community partnerships and their work to increase access to healthy, locally grown food and opportunities for physical activity in vulnerable communities across the United States. Established in 2007 and funded by the WK Kellogg Foundation, the partnerships are increasing the capacity of communities to participate in policy and systems change to positively affect their health and well-being. The material covered in the chapters provides an illustration of how funders, grantees and partners can work together to create sustainable change at the neighborhood level to ensure that all children and families are able to thrive. A range of studies are looked at from the various initiatives funded nationwide to evaluation methods and results and an explanation of the role of philanthropy in community development from the viewpoint of the funders. This book was originally published as a special issue of Community Development.
