Sangha State And Society:

Sangha, State, and Society Yoneo Ishii, 1986 *Interpreting Proverbs 11:18-31, Psalm 73, and Ecclesiastes 9:1-12 in Light Of, and as a Response To, Thai Buddhist Interpretations* Kari Storstein Haug, 2012-03-19 This book argues that an approach to Buddhist Christian dialogue where biblical texts are analyzed by placing Christian and Buddhist perspectives side by side is a method which provides a good platform for further in depth dialogue

Colors of the Robe Ananda Abeysekara, 2002 Poised to spark debate among scholars of religious studies and other disciplines *Colors of the Robe* sheds new light on the Sri Lankan Buddhist universe of ethics and politics and more important suggests innovative directions for the global study of religion identity culture politics and violence In a volume that surpasses other studies in tracking identifying and locating Sri Lankan Buddhism in its sectarian ethnic cultural social and political constructions Ananda Abeysekara lays down a challenge to postcolonial and postmodern theory He argues that although criticisms have undermined the orientalist constructions of culture they cannot help us understand let alone theorize the emergence of contemporary authoritative discourses that define distinctions involving religion and violence identity and difference Supplanting that aim Abeysekara illuminates the shifting configurations that characterize the relations connected with postcolonial religious identity and culture

State, Society, and Religious Engineering Khun Eng Kuah-Pearce, 2009 The book looks at how religion in Singapore is being subjected to the processes of modernisation and change The Singapore State has consciously brought religion under its guidance It has exercised strong bureaucratic and legal control over the functioning of all religions in Singapore The Chinese community and the Buddhist Sangha have responded to this by restructuring their temple institutions into large multi functional temple complexes There has been quite a few books written on the role of the Singapore State but so far none has been written on the topic the relationship between state society and religion It will help to fill the missing gap in the scholarly literature on this area This is also a topic of great significance in many Asian particularly Southeast Asian countries and it will serve as an important book for future reference in this area of research and comparative studies

Pollwatching, Elections and Civil Society in Southeast Asia William A. Callahan, 2018-05-08 This title was first published in 2000 Corruption has become a major issue in East and Southeast Asia since the financial crisis of 1997 leading to widespread political change across the region But political corruption is not a new issue in Southeast Asia As *Pollwatching Elections and Civil Society in Southeast Asia* shows through in depth studies of Thailand and the Philippines political corruption has been a major point of contention within South East Asian countries for decades

Governance and Civil Society in Myanmar Helen James, 2005-03-21 Most international attention on Myanmar has focused on the political situation where the military in power since 1962 continues to refuse to acknowledge the results of democratic elections and on related human rights issues This book by focusing on education health and environment and on the institutions which

formulate and deliver policy in these fields shows how the international community can make a significant difference to strengthening Myanmar's civil society and to supporting a future democratic form of government by encouraging institutional developments in these fields. Such developments in turn the author argues will re-skill the younger generation, promote economic development and poverty alleviation and through a participatory approach to policy making nurture the conditions from which democracy will grow.

Cultural Politics and Asian Values Michael D. Barr, 2004. This book surveys the political history and pre-history of the Asian values debate. Barr explores the histories and conceptual essences of the world religions involved in or affected by the debate.

Routledge International Handbook of Religion in Global Society Jayeel Cornelio, François Gauthier, Tuomas Martikainen, Linda Woodhead, 2020-11-29. Like any other subject the study of religion is a child of its time. Shaped and forged over the course of the twentieth century it has reflected the interests and political situation of the world at the time. As the twenty-first century unfolds it is undergoing a major transition along with religion itself. This volume showcases new work and new approaches to religion which work across boundaries of religious tradition, academic discipline and region. The influence of globalizing processes has been evident in social and cultural networking by way of new media like the internet, in the extensive power of global capitalism and in the increasing influence of international bodies and legal instruments. Religion has been changing and adapting too. This handbook offers fresh insights on the dynamic reality of religion in global societies today by underscoring transformations in eight key areas: Market and Branding, Contemporary Ethics and Virtues, Intimate Identities, Transnational Movements, Diasporic Communities, Responses to Diversity, National Tensions and Reflections on Religion. These themes demonstrate the handbook's new topics and approaches that move beyond existing agendas. Bringing together scholars of all ages and stages of career from around the world, the handbook showcases the dynamism of religion in global societies. It is an accessible introduction to new ways of approaching the study of religion, practically, theoretically and geographically.

Living with the Vinaya Ryosuke Kuramoto, 2024-11-30. Around the first century BCE Buddhist monks formed monasteries and established relationships with kings and lay people. The rules monks live by, the Vinaya, are a pivotal source of meaning for them and their dealings with society and form the basis of multiple monasticisms across geographical regions and throughout history. The ways in which the Vinaya is understood and practiced therefore must take into account the kind of monasticism that emerges from it. In *Living with the Vinaya* Ryosuke Kuramoto examines the process of creating monasticism in contemporary Myanmar by focusing on how monks acquire, possess and consume material goods. To live as a monk means to obtain resources from society and to own and use these according to monastic rules. Over the centuries as monks interacted more with the world beyond the monastery, the question of what a monk should be became a concern for not only monks but also government authorities and lay people. How monks interpreted and observed the Vinaya became a question of legitimacy and power. Kuramoto's ethnographic analysis reveals the constant re-creation of monasticism in Myanmar resulting from the

interactions between monks and these groups in response to this question He identifies some of the key mechanisms by which monasticism and broader Buddhist institutions are created and transformed and concludes that monastic governance is inseparable from the Buddhist state and the society that surrounds it Religion and Society Gerrie Ter Haar, Yoshio Tsuruoka, 2007 Religion is a driving force of the twenty first century Here is a book that discusses every aspect of this fascinating subject proposing an agenda for future study The authors are leading scholars from all over the world **Civil Society in Burma** Ashley South, 2008 Burma faces a complex of interlinked humanitarian social and political crises The situation is especially grave in areas populated by ethnic minorities many of which have been affected by decades of armed conflict and in the Irrawaddy Delta where in May 2008 some 130 000 people were killed and over two million made homeless by Cyclone Nargis The military government is deeply unpopular and further episodes of mass protest similar to those that occurred in August and September 2007 cannot be ruled out However strategic options for elite level regime change in the country remain limited Therefore local and international actors should focus on incremental approaches to democratization and in particular on the roles of local communities and NGOs The past decade has seen an expansion of previously dormant civil society networks especially within and between ethnic nationality communities This development has been particularly significant in areas affected by ceasefires between armed ethnic groups and the military government The capacities and strategic importance of local NGOs were demonstrated by the impressive civil society responses to the cyclone At the local level models of community participation and the promotion of democracy from below can help to transform state society relations and patterns of governance including in ceasefire areas At the national elite level the development of civil society is a prerequisite for sustainable democratic change Although the promotion of civil society is necessary it is not sufficient to achieve social and political transition in Burma Furthermore community networks are vulnerable to suppression by the militarized state and by armed nonstate actors Such tendencies were demonstrated during the national referendum of May 2008 when the government engineered the endorsement of a new constitution designed to consolidate and perpetuate military rule The challenge for the international community is to work within the constricted environment of military ruled Burma in ways that promote positive change but without exposing local partners to unacceptable risks *Buddhism, Education and Politics in Burma and Thailand* Khammai Dhammasami, 2018-01-11 Drawing on primary sources in Pali Burmese and Thai practising monk Venerable Khammai Dhammasami guides the reader through the complex history of monastic education in two neighbouring countries with very different Buddhist societies Burma and Thailand This book provides a clear account of the ways in which royal leaders and monastic institutions worked to develop monastic education in the face of changing political and economic conditions including colonialism and the political instability of the 19th and 20th centuries It studies influences from both British colonists and Siamese Thai reformers and engages with primary material including documents from Burmese monasteries royal orders royal chronicles and official government records As

the first book to examine monastic education in Burma and Thailand this is a welcome contribution to the social monastic and religious history of Southeast Asia and the growing field of Burmese Buddhist Studies **Authoritarianism and Civil**

Society in Asia Anthony Spires,Akihiro Ogawa,2022-07-08 This book represents a pioneering interdisciplinary effort to analyze Asian civil society under authoritarianism a regime type that is re appearing or deepening after several decades of increased political liberalization By organizing its approach into four main themes this volume succinctly reveals the challenges facing civil society in authoritarian regimes including actions under political repression transitions to democracy uncivil society political capture and legal control It features in depth analyses of a variety of Asian nations from hard authoritarian regimes like China to electoral authoritarian regimes like Cambodia whilst also addressing countries experiencing democratic regression such as the Philippines By highlighting concrete responses and initiatives taken by civil society under authoritarianism it advances the intellectual mandate of redefining Asia as a dynamic and interconnected formation and moreover as a space for the production of new theoretical insight Contributing to our understanding of the tensions dynamics and potentialities that animate state society relations in authoritarian regimes this will be essential reading for students and scholars of civil society authoritarianism and Asian politics more generally *Fundamentalisms*

Observed American Academy of Arts and Sciences,1994-07 The Fundamentalism Project vol 1 Society in Contemporary Laos Boike Rehbein,2017-04-21 Over the past decade Laos exposure to global capitalism has resulted in extensive economic and social transformations Precapitalist social structures both persist and are transformed into a particular configuration of classes This entails increasing social inequality a widening range of habitus and new forms of ethos This book pursues the theoretical aim of shedding light on the old question raised by Max Weber about the relation between capitalism ethos and society The empirical study consists of a description of the social structures their embodiment in the habitus and world views in Laos against the background of a critical revision of Pierre Bourdieu s sociology To achieve these aims the author develops a qualitative methodology as neither Weber nor Bourdieu explained how to empirically study habitus and ethos The empirical material for the book was gathered over a period of more than five years and comprises several hundred life course interviews in all sections of Lao society as well as a representative quantitative survey The author argues that precapitalist social structures persist and continue to shape the social fabric of contemporary Laos At the same time they are transformed by global and local capitalism The book shows how the hierarchies contained in each structure shape the habitus of the Lao population and how these in turn influence the development of a capitalist and a religious ethos The argument makes use of Pierre Bourdieu s sociology and adapts it to the setting of Laos by introducing new as well as indigenous concepts While social structure habitus and beliefs are subject to a capitalist transformation and unification the newly emerging classes and milieus are not copies of Western forms but retain their local history Filling a gap in the literature on Laos and offering new perspectives on core concepts such as habitus class lifestyle work ethic and its religious underpinnings this book will be of

interest to academics in the fields of Sociology Religious Studies and Southeast Asian Studies Explorations in Early Southeast Asian History Kenneth Hall, John K. Whitmore, 2020-08-06 While following the probes of foreign individuals into various obscure parts of Southeast Asia over the centuries is a diverting and entertaining pastime the purpose of this volume is to investigate this past with the mind to question and postulate upon the historical patterns that have developed from earlier study of the area and to bring concepts from other areas and disciplines to bear on the existing information The product of this effort as it is encompassed in this volume is not an attempt at the definitive study of any of the topics It is rather a series of speculations on the directions feasible for the further study of the Southeast Asian past As such the answers proposed in these essays are really questions Are the ideas presented here true within the specific historical contexts for which they have been developed If so can we use these ideas or variations of them to interpret the history of other parts of Southeast Asia If not what other ideas may be brought to bear on these situations in order to understand them The ultimate aim of this volume is thus a challenge to the profession at large not only to criticize what we have done but also to go beyond our postulations and create new ones xi **Religion and Societies** Carlo Caldarola, 2011-06-01 The series Religion and Society RS contributes to the exploration of religions as social systems both in Western and non Western societies in particular it examines religions in their differentiation from and intersection with other cultural systems such as art economy law and politics Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual the religious imagination constructions of tradition iconography or media In addition the formation of religious communities their construction of identity and their relation to society and the wider public are key issues of this series **Buddhism, Power and Political Order** Ian Harris, 2007-06-11 This volume brings together the brightest minds in the study of Buddhism in Southeast Asia to create a more coherent account of the relations between Buddhism and political order in the late pre modern and modern period **Virtuosity, Charisma and Social Order** Ilana Friedrich-Silber, 1995-04-28 This book is a comparative macrosociological study of the interaction between religious virtuosi and society in two civilizations traditional Theravada Buddhism and Medieval Catholicism Merging Weberian sociology with the Maussian tradition of gift analysis and criticizing the neglect of meaning in current comparative historical sociology the author also argues the need for a multidimensional approach capable of addressing the part played by religious orientations in shaping the institutional strength and ideological power of religious elites in the historical framework of the Great Traditions Daedalus , 1973
