Decoding Hindu Chronology Henry Romano, Since ancient times the Hindus have had a lunisolar cycle based on the combination of solar and lunar years determined by the course of the sun and the moon but with the lunar year beginning near the solar year Exactly how their earliest Calendar was arranged remains a mystery Our focus is on the current form of their Calendar developed around 400 under the influence of Greek astronomy and introduced into India at no long time There are two kinds of Hindu years solar and lunar To understand the lunar Calendar we will first explain the solar year which governs the lunisolar system Bengal including Madras s Orissa Tamil and Malayalam districts used solar years for civil purposes General religious rites and festivals are regulated by the lunar year and the details of private and domestic life such as choosing auspicious

occasions for marriages and journeys choosing lucky moments for shaving etc Almanacs that follow the lunar year contain details about the solar year such as the sun's course through the zodiac signs Despite following the solar year almanacs include lunar year details The astronomical solar year determines the civil solar year According to the latter the Calendar begins at the vernal equinox but actually starts at the vernal equinox Because of the rotation of the equinoxes in Western astronomy the zodiac signs correspond to the astronomical solar because they are drawn away extensively from the constellations from which they derive their names Therefore the sun now comes to the vernal equinox before the beginning of Aries not in the constellation Aries but at the end of Pisces From A D 499 522 or 527 referring to different schools when according to their system the signs aligned with the constellations the Hindus disregarded precession about their Calendar According to them Aries begins at or near the star Piscium Hence their astronomical solar year is in fact not the tropical year in the course of which the sun passes from one vernal equinox to the next but a sidereal year the period during which the earth makes one whole rotation in its orbit around the sun regarding the first point of Mesha its start is the moment of the Mesha Sankranti when the sun enters Mesha rather than Aries and it begins not with the actual equinox but with an artificial

W.B. Yeats and Indian Thought Snezana Dabic, 2016-11-14 This book presents an in depth study of the influence of Indian philosophical and religious thought on W B Yeats's poetic and dramatic work It traces the development of this influence and inspiration from Yeats's early impressionistic work to the mature and elaborate incorporation of Indian ideas into the structure themes and symbolism of his writing It recognizes the importance of his Indian friendships Indian essays and shows the limits of his Indianness While providing a comprehensive analysis of Yeats's poetry and his bizarre poetic play The Herne's Egg from an Eastern perspective the book examines how Indian philosophical concepts guided Yeats in constructing his characters imagery and symbology and in shaping the structure of his dramatic narrative Yeats's liminal positioning between Orientalism and Celticism Irish nationalism and British imperialism and his heterogeneous literary aspirations and modernist poetic idiom are probed and explored in order to position him on a pendulum of postcolonial debate The focus in this book is on the aesthetic appreciation of the parts of Yeats's creative opus where he engaged with Eastern thought with genuine interest and enthusiasm when the pendulum swings towards Yeats being a mythopoetic and anticolonial writer
