Santa Lilita:

Beyond the City Felipe Correa, 2016-06-07 During the last decade the South American continent has seen a strong push for transnational integration initiated by the former Brazilian president Fernando Henrique Cardoso who with the endorsement of eleven other nations spearheaded the Initiative for the Integration of Regional Infrastructure in South America IIRSA a comprehensive energy transport and communications network The most aggressive transcontinental integration project ever planned for South America the initiative systematically deploys ten east west infrastructural corridors enhancing economic development but raising important questions about the polarizing effect of pitting regional needs against the colossal processes of resource extraction Providing much needed historical contextualization to IIRSA s agenda Beyond the City ties together a series of spatial models and offers a survey of regional strategies in five case studies of often overlooked sites built outside the traditional South American urban constructs Implementing the term resource extraction urbanism the architect and urbanist Felipe Correa takes us from Brazil s nineteenth century regional capital city of Belo Horizonte to the experimental circular temporary city of Vila Piloto in Tr s Lagoas In Chile he surveys the mining town of Mar a Elena In Venezuela he explores petrochemical encampments at Judibana and El Tablazo as well as new industrial frontiers at Ciudad Guayana The result is both a cautionary tale bringing to light a history of societies that were inscribed and administered and a perceptive examination of the agency of architecture and urban planning in shaping South American lives

Gentry's Rio Mayo Plants Paul S. Martin, David Yetman, Mark E. Fishbein, Philip D. Jenkins, Thomas R. Van Devender, Rebecca K. Wilson, 2021-11-30 The R o Mayo region of northwestern Mexico is a major geographic area whose natural history remains poorly known to outsiders Lying in a region where desert and tropical northern and southern and continental and coastal species converge it boasts an abundance of flora first documented by Howard Scott Gentry in 1942 in a book now widely regarded as a classic of botanical literature This new book updates and amends Gentry s R o Mayo Plants Undertaken with Gentry s support and participation before his death in 1993 it reproduces the original text which appears

here with annotations and contains information on over 2 800 taxa more than twice the 1 200 species first described by Gentry The annotated list of plants includes information on distribution habitat appearance common names and indigenous uses A new introduction provides historical background and a review of geography and vegetation It also describes changes to the land and river wrought by agricultural development expanded grazing and lumbering Throughout the text the authors have endeavored to provide information on Rio Mayo vegetation while emphasizing local knowledge and use of plants to preserve Gentry's field oriented focus and to present botanical information with Gentry's exuberance and style Rio Mayo Plants has long stood as a book that displays a scientist's love of the English language his fondness for native peoples and his eye for beauty in nature This updating of that work fills a gap in the botanical literature of this portion of North America and will be useful not only for botanists but also for biogeographers taxonomists land managers and conservationists **The**

USSR in East Asia Georges Tan Eng Bok,1986 **Conventional Deterrence** John J. Mearsheimer,1985-08-21

Conventional Deterrence is a book about the origins of war Why do nations faced with the prospect of large scale conventional war opt for or against an offensive strategy John J Mearsheimer examines a number of crises that led to major conventional wars to explain why deterrence failed He focuses first on Allied and German decision making in the years 1939 1940 analyzing why the Allies did not strike first against Germany after declaring war and conversely why the Germans did attack the West Turning to the Middle East he examines the differences in Israeli and Egyptian strategic doctrines prior to the start of the major conventional conflicts in that region Mearsheimer then critically assays the relative strengths and weaknesses of NATO and the Warsaw Pact to determine the prospects for conventional deterrence in any future crisis He is also concerned with examining such relatively technical issues as the impact of precision guided munitions PGM on conventional deterrence and the debate over maneuver versus attrition warfare Mearsheimer pays considerable attention to questions of military strategy and tactics Challenging the claim that conventional detrrrence is largely a function of the numerical balance of forces he also takes issue with the school of thought that ascribes deterrence failures to the dominance of offensive weaponry In addition to examining the military consideration underlying deterrence he also analyzes the interaction between those military factors and the broader political considerations that move a nation to war **Carriópolis**
