Language Impact on Second Language and Literacy Learning Kristen L. Pratt, Bogum Yoon, 2022-12-19 Primary Language Impact on Second Language and Literacy Learning Linguistically Responsive Strategies for Classroom Teachers provides educators with foundational knowledge on how students' native languages influence their learning of English language and literacy. Linguistically diverse students increasingly populate current classrooms and it is important for educators to have general linguistic and cross-linguistic knowledge to provide students with equitable access to the language and content of school. By discussing English language learners (ELLs) primary language norms, positive and negative transfer, and culturally sustaining resources, this book helps educators understand how to support ELLs' use of their primary language as an asset when engaging in English language and literacy learning experiences.

Key Topics in Second Language Acquisition Vivian Cook, David Singleton, 2014-04-03 This textbook offers an introductory overview of eight hotly debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences, thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader.

Cosmopolitan English and Transliteracy Xiaoye You, 2016-08-31 Winner CCCC Research Impact Award 2018 Despite the vast number of multilingual speakers in the United States and the pervasive influence of globalization writing studies in this country is still inextricably linked to a nationalistic monolingual English ideology In *Cosmopolitan English and Transliteracy* Xiaoye You addresses this issue by proposing that writing studies programs adopt a cosmopolitan perspective Emphasizing local and global forms of citizenship and

identification You merges a humanistic vision with the rigor of social science arguing that linguistic and cultural differences can be explored to recover human connections normally severed by geographical and semiotic borders You examines several areas of writing affected by globalization He then turns to the composition classroom highlighting the challenges and possibilities of crossing cultural boundaries in academic discourse before introducing a pedagogy aimed at fostering American students translingual and transcultural sensibilities Included is a model for training writing teachers in the context of globalization which aims to help instructors gain practical knowledge about the needs and resources of multilingual writers through communication technologies and cross cultural partnerships By introducing cosmopolitan perspectives into the composition classroom You challenges traditional assumptions about language identity and literacy as they relate to writing studies Innovative and provocative Cosmopolitan English and Transliteracy charts a new way forward for writing programs with a call to focus on global rather than national identity

Suggestopedia and Language Acquisition W. Jane Bancroft,1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **The Janus-Face of Language: Where Are the Emotions in Words and the Words in Emotions?** Cornelia Herbert,Thomas Ethofer,Andreas J. Fallgatter,Peter Walla,Georg Northoff,2018-09-28 Language has long been considered independent from emotions In the last few years however research has accumulated empirical evidence against this theoretical belief of a purely cognitive based foundation of language In particular through research on emotional word processing it has been shown that processing of emotional words activates emotional brain structures elicits emotional facial expressions and modulates action tendencies of approach and avoidance probably in a similar manner as processing of non verbal emotional stimuli does In addition it has been shown that emotional content is already processed in the visual cortex in a facilitated manner which

suggests that processing of emotional language content is able to circumvent in depth semantic analysis Yet this is only one side of the coin Very recent research putting words into context suggests that language may also construe emotions and that by studying word processing one can provide a window to one's own feelings All in all the empirical observations support the thesis of a close relationship between language and emotions at the level of word meaning as a specific evolutionary achievement of the human species As such this relationship seems to be different from the one between emotions and speech where emotional meaning is conveyed by nonverbal features of the voice But what does this relationship between written words and emotions theoretically imply for the processing of emotional information The present Research Topic and its related articles aim to provide answers to this question This book comprises several experimental studies investigating the brain structures and the time course of emotional word processing Included are studies examining the affective core dimensions underlying affective word processing and studies that show how these basic affective dimensions influence word processing in general as well as the interaction between words feelings and expressive behavior In addition new impetus comes from studies that on the one hand investigate how task sublexical and intrapersonal factors influence emotional word processing and on the other hand extend emotional word processing to the domains of social context and self related processing Finally future perspectives are outlined including research on emotion and language acquisition culture and multilingualism In summary this textbook offers scientists from different disciplines insight into the neurophysiological behavioral and subjective mechanisms underlying emotion and language interactions It gives new impulses to existing theories on the embodiment of language and emotion and provides new ways of looking at emotion cognition interactions
