Red Zones Marie-Eve Sylvestre, Nicholas Blomley, Céline Bellot, 2020-01-02 In *Red Zones* Marie Eve Sylvestre Nicholas Blomley and Céline Bellot examine the court imposed territorial restrictions and other bail and sentencing conditions that are increasingly issued in the context of criminal proceedings Drawing on extensive fieldwork with legal actors in the criminal justice system as well as those who have been subjected to court surveillance the authors demonstrate the devastating impact these restrictions have on the marginalized populations the homeless drug users sex workers and protesters who depend on public spaces On a broader level the authors show how red zones unlike better publicized forms of spatial regulation such as legislation or policing strategies create a form of legal territorialization that threatens to invert traditional expectations of justice and reshape our understanding of criminal law and punishment **Our Punitive Society** Randall G. Shelden, Morgan Vélez Young, 2020-12-10 This reader friendly exploration of the primary forces relevant to punishment poverty and political powerlessness highlights the necessity for humane alternatives to our current incarceration binge This provocative overview looks at the business of punishment and at the historical patterns of control regarding slavery the death penalty women the LGBTQ community juveniles and supervision The United States has the world's highest rate of incarceration a form of punishment that separates the least privileged from the rest of society creating populations of damaged lives All of society pays the price for overly punitive sanctions Equal justice is not possible in an unequal society Up to date statistics illustrate the race class and gender inequalities in the criminal justice system The criminal justice system has expanded for half a century Will challenges to policing succeed in narrowing the net of social control Will the cost of maintaining a massive system stimulate a transformation or will stakeholders support minimal reforms that do not threaten their interests The public is largely unaware of most of the workings of the criminal justice system Through this engaging text the authors hope to provide insights that encourage readers to examine the collateral effects of policies to address crime and the role of punishment Pervasive Prejudice? Ian Ayres, 2003-10-15 If you're a woman and you shop for a new car will you really get the best deal If you're a man will you fare better If you're a black man waiting to receive an organ transplant will you have to wait longer than a white man In *Pervasive Prejudice* Ian Ayres confronts these questions and more In a series of important studies he finds overwhelming evidence that in a variety of markets retail car sales bail bonding kidney transplantation and FCC licensing blacks and females are consistently at a disadvantage For example when Ayres sent out agents of different races and genders posing as potential buyers to more than 200 car dealerships in Chicago he found that dealers regularly charged blacks and women more than they charged white men Other tests revealed that it is commonly more difficult for blacks than whites to receive a kidney transplant because of federal regulations Moreover Ayres found that

minority male defendants are frequently required to post higher bail bonds than their Caucasian counterparts Traditional economic theory predicts that free markets should drive out discrimination but Ayres s startling findings challenge that position Along with empirical research Ayres offers game theoretic and other economic methodologies to show how prejudice can enter the bargaining process even when participants are supposedly acting as rational economic agents He also responds to critics of his previously published studies included here These studies suggest that race and gender discrimination is neither a thing of the past nor merely limited to the handful of markets that have been the traditional focus of civil rights laws

Crime, Law and Society MalcolmM. Feeley,2017-07-05 Malcolm Feeley s work is well known to scholars around the world and has influenced two generations of criminologists and legal scholars He has written extensively on crime and the legal process and has published numerous articles in law history social science and philosophy journals two of his books *The Process is the Punishment* and *Court Reform on Trials* have won awards This volume brings together many of his better known articles and essays as well as some of his lesser known but nevertheless important contributions all of which share the common theme of the value of the rule of law albeit a more sophisticated concept than is commonly embraced The selections also reveal the full range of his interests and the way in which his research interests have developed
