**EASTER ISLAND** JoAnne Van Tilburg, 1994 Since Easter Island Rapa Nui was first contacted by the Dutchman Jacob Roggeveen nearly three centuries ago the people culture and most of all the monolithic statues of this remarkable island have been seen by Westerners as an incredible puzzle a riddle with no solution At the heart of the so called mystery of Easter Island stand the gigantic moai the supreme sculptural achievement of the Rapa Nui people and indeed of all Polynesia Re erected upon their rectangular stone platforms lying along ancient transport roads hidden deep in seaside caves or standing upon the slopes of Rano Raraku where they were hewn from the living rock the statues are palpable evidence of the genius and obsession of a people How were they moved What do they mean Nearly 1 000 statues have been meticulously measured drawn mapped and photographed by archaeologist Jo Anne Van Tilburg and her Chilean and Rapa Nui colleagues over more than twelve years of dedicated research Drawing on the insights that have been gained into sculptural techniques design attributes and formal variation the author examines Rapa Nui prehistory in the context of new understandings of ecology and culture Detailed drawings of statues by one of Rapa Nui's most talented artists many published for the first time reveal the fluidity of line and complexity of meaning encoded within these stone figures Historical photographs from museum collections illustrate the vital role played by many Rapa Nui people in the documentation and preservation of their own culture The latest methods of statistical analysis computer imaging and robotics programs are brought to bear upon the perplexing question of statue transport and the author offers an exciting yet compellingly logical model of how a near fourteen ton statue could have been moved almost the entire length of the island Written by the foremost authority on the subject this fascinating book is another important step toward unravelling the mystery of Easter Island

Rapa Nui - Easter Island Ian Conrich, 2016 **Rapanui Easter Island** Denis O'Leary, 2019-05-22 This book is published by Floricanto Press [www.FloricantoPress.com](http://www.FloricantoPress.com) [www.LatinoBooks.Net](http://www.LatinoBooks.Net) [www.LatinoBooks.com](http://www.LatinoBooks.com) This a photographic historical and contemporary description of the island Rapa Nui also known as Easter Island and Isla de Pascua has long been said by natives to be at the navel of the Earth The people of Easter Island knew of no others for hundreds of years and built their

society and belief system until contacted by the outside world in 1722. It is still unknown if the social collapse that followed was from a natural disaster forced by the human contact or more than likely as a result of a combination of the two. In the center of the South Pacific Ocean, Rapa Nui is located 2 191 miles west of the coast of Chile, South America, in the center of the Pacific Ocean. Some 2 704 miles northeast of Tahiti, the island remains even today the most isolated inhabited land on the planet. Today 7 750 people live on Easter Island. A territory of Chile, many who live on the Island consider themselves Rapanui. Before Chilean Spanish is the language spoken by most, but the almost lost language of the island is taught in schools and families to bring the pride of the native islanders to the front. Note that the island and native language is Rapa Nui and the people of the island are Rapanui. Denis O Leary has been an educator for nearly three decades and long served in civil rights organizations as well as been an elected school Trustee for sixteen of those years. Denis O Leary has authored fascinating books that reflect respect for diverse Latin American cultures such as *Alba Walking in the Shadows*, *Esteban's Caravan*, *Children's books about César Chavez* and *Grandpa's Short Handled Hoe*. It is no wonder that when Mr O Leary traveled to the most remote location on Earth, Easter Island, with his wife and son, he wanted to relate what he saw and learned to students and community. Through Denis O Leary's photography, interactions with Rapanui, and research, we are shown a whole story of the mysteries and culture that developed over the centuries at the navel of our planet, the island of Rapa Nui or Easter Island.

The book is subdivided into thematic sections and each chapter is written by renowned specialists in disciplines such as archaeology, anthropology, paleoecology, ethnography, linguistics, ethnobotany, phylogenetics, phylogeography, and history. Contributors have been invited to provide an open and objective vision that includes as many views as possible on the topics considered.
