Stitching the World: Embroidered Maps and Women's Geographical Education Judith A. Tyner,2016-12-05 From the late eighteenth century until about 1840 schoolgirls in the British Isles and the United States created embroidered map samplers and even silk globes Hundreds of British maps were made and although American examples are more rare they form a significant collection of artefacts Descriptions of these samplers stated that they were designed to teach needlework and geography The focus of this book is not on stitches and techniques used in drafting the maps but rather why they were developed how they diffused from the British Isles to the United States and why they were made for such a brief time The events of the late eighteenth and early nineteenth centuries stimulated an explosion of interest in geography The American and French Revolutions the wars between France and England the War of 1812 Captain Cook s voyages and the explorations of Lewis and Clark made the study of places exciting and important Geography was the first science taught to girls in school This period also coincided with major changes in educational theories and practices especially for girls and this book uses needlework maps and globes to chart a broader discussion of women s geographic education In this light map samplers and embroidered globes represent a transition in women s education from accomplishments in the eighteenth century to challenging geographic education and conventional map drawing in schools and academies of the second half of the nineteenth century There has been little serious study of these maps by cartographers and moreover historians of cartography have largely neglected the role of women in mapping Children s maps have not been studied although they might have much to offer about geographical teaching and perceptions of a period and map samplers have been dismissed because they are the work of schoolgirls Needlework historians likewise have not done in depth studies of map samplers until recently *Stitching the World* is an interdisciplinary work drawing on cartography needlework and material culture This book for the first time provides a critical analysis of these artefacts showing that they offer significant insights into both eighteenth and nineteenth century geographic thought and cartography in the USA and the UK and into the development of female education **Bibliographie D'histoire de L'art** ,1992 *Samplers, Early American and English* American Art Association,1914 *American Samplers from the Collection of Mrs. Emma B. Boston collected a very large number of descriptions Mrs Henry E Coe of New York who has a wonderful collection of her own has added a very large number of descriptions enhanced by pictures taken with her kodak Many friends have contributed pictures and to them our thanks are due The Committee Wishes that it could reproduce in the book many more pictures Of very real interest which it has in its archives but it has felt in choosing the illustrations that the pictures must be either typical or necessary to bring out some point under discussion Therefore those only have been chosen which exhibit American types or are interesting historically It is believed that there are here reproduced examples of most of the various stitches and model patterns used in such needlework While many American samplers contain only the alphabet and numerals with added moral mottoes yet others display such sense of artistic feeling and tasteful ornamentation as merit attention About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

American Sampler Designs Dolores M. Andrew,Godfried Bomans,2012-09-15 For over two centuries stitching samplers provided the major form of education for young girls What little knowledge of reading arithmetic and geography they gained came from the discipline and long hours with the needle Today we study and enjoy all forms of samplers for their beauty and charm In this book the trees flowers animals people and houses as well as the alphabets that were the samplers primary exercise are authentically recreated in black line drawings The introduction provides insight into the creation of samplers as well as an often neglected part of our history the education of women This important book originally published in 1996 has been revised and enlarged by the author and joins the distinguished list of International Design Library titles listed on the inside back cover
